This is the first time release of this exciting mating. Nardia (GeneStar FE7 T4 M3), the dam of Jamberoo, is a very feminine, fertile cow. Sire Vitulus Yes Yes Yes (Genestar T4) was Junior and Grand Champion at the Brisbane Show and has sired many US champions. He is a moderately sized bull with a height of 45" and REA of 39 sq in with minimal fat cover. This combination will provide cattle that will produce in all climates.

This mating offers an exclusive combination of fertility, early maturity, muscle power and the ability to finish on grass. Isadora (Genestar M2 T2 FE7) is a half sister to Ardrossan Neron and is one of only 2 daughters of Broken Arrow Opal Nera. She has a wonderful temperament and is a complete cow with fertility, perfect udder, great feet, depth and muscle and obvious longevity. GTL Unique, co-owned with Grassline Cattle Co., was selected in this mating for the correctness, muscle, early maturity and growth of his dam and sire.

Isadora, dam of the Lot 19 embryos

Delvene, dam of GTL Unique, sire of the Lot 19 embryos

SANTA GERTRUDIS COW

Lot 21A: 3/4 heifer calf born 4/21/11 sired by LTL Peyton FM5315. We believe this young cow is one of the top two halfbloods we have bred. Grown entirely on grass from the day she was born, she is out of a daughter of our foundation Santa Gertrudis cow Wendt 785 by the great bull EZ Nova 20N. This cow's tall female line is highly productive and efficient on grass and her sire is a 13 Star Bovigen bull - perfect combination for grass fed production.

22

23

These six black halfblood Low Beau halfbloods are out of Chi Angus heifers whose dams have raised numerous show calves - both steers and heifers. They are all pasture exposed to GTL Waylon W09 FM9956 from July 15 - September 15.

Terms and Conditions

Terms: Terms of the sale are cash or check payable immediately upon conclusion of the sale and before animals will be moved. Seller will reserve the right to require a certified check as settlement before releasing any cattle.

Insurance of Purchases and Risk: All animals are the seller's risk prior to their sale and become property of the buyer as soon as declared sold by the auctioneer. Arrangements will be made to have insurance available when making settlement.

Bidding: All animals sell to the highest bidder. Any disputes or challenges regarding bids will be settled by the auctioneer and his decision will be final.

Health and Export: A vet will be on hand to write interstate health certificates.

Registration and Transfer: All animals sell with registration papers from their respective breed Association and will be transferred after the sale at the seller's expense. In the case of dual registered cattle, both registration papers will be transferred.

Announcements: Any errors or changes of information contained in the catalog will be announced from the auction block and such announcements shall take precedence over information contained in the catalog.

Breeding Guarantee: Every effort will be made to make the most up-to-date information regarding pregnancy check available to the buyers.

Lowline bred females in the sale have been pregnancy examined by a veterinarian and found to be safe in calf. The open heifers selling are guaranteed to be breeders. If a female appears to be a non-breeder within 6 months of the sale (or within 6 months of when she reaches breeding age) she may be returned to the seller at the buyer's expense. The seller will then reserve the right to prove the animal a breeder within a six month period, using any fullblood registered Lowline bull of his choice through AI or natural service. If successful, seller will return animal to buyer, again at buyer's expense. Should the animal fail to prove a breeder, the seller at his option may either return the purchase price to the buyer or replace the animal with another of equal value in full settlement and satisfaction of all claims. In no event shall the seller be responsible for more than the purchase price.

In case the animal in question should develop to be a problem breeder due to negligence or improper management by the buyer or if the female has been subjected to any hormonal or surgical reproduction techniques, the seller's guarantee does not apply. No guarantee is given that bred females will deliver a live calf. No guarantee is given that a female will produce eggs suitable for transplant.

Liabilities: All persons who attend the sale do so at their own risk and Auction Effertz, Ltd. and SLABA and the sale consignors assume no liability for any accidents that may occur. Neither does Auction Effertz, Ltd. or SLABA and the sale consignors assume any liability for loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is also to be clearly understood that Auction Effertz, Ltd. acts only as a medium between the buyer and the seller. They are not responsible in any way for any failure on the part of the buyer and the seller to live up to their obligations or for the truth of any warranties or representations, express or implied. Neither does Auction Effertz, Ltd. assume any financial obligation to collect or enforce collection of monies between parties. Any legal action that may in exceptional cases be taken, must be between the buyer and the seller.

Contract: The above terms and conditions shall constitute a contract between the buyer and the seller of each animal sold.

Mail bid: Mail or wire bids may be furnished. Bids must be in the hands of the sale manager in ample time prior to the sale and will be handled in strict confidence.

Cajun Red, sire of percentage bulls

What are they good for?

1. Calving ease on first calf heifers.

Halfblood calves average weights of 60-70 pounds at birth will vary depending on the genetics of the heifers. They will be in the frame score 4 to 5.5 range again depending on the frame score of the heifers. These vigorous healthy calves will weigh right at or just slightly below the average of your regular calves especially if you start calving your heifers a few weeks earlier than your main cow herd as is common practice. The extra calves you wean (no death loss at birth) will more than make up for any loss in individual weaning weight. These first cross calves will sell right with your regular calves at no discount.

2. Halfblood and first cross Lowline steers will finish at 1,150 to 1,275 pounds if backgrounded on a high roughage diet.

They will work extremely well to run as yearlings on grass and then these yearlings will gain very well and very efficiently in the feedlot. They will finish in a much shorter feeding period saving high corn costs and yardage. Because of their heavy muscled Angus heritage they will yield excellent carcasses with high rib eye area per hundredweight and a high quality grade. The Lowline cross beef is noticeably fine textured and very tender.

3. Use Lowline cross cows to moderate your cow size.

Run more cows per acre and wean more pounds per acre. Sell that total pounds of weaning weight for a higher price per pound. This is especially true from the 2nd year of production and beyond when you can breed the Lowline cross females to a larger framed but easy calving bull of another breed to make a smaller cow be all she can be. Thus she weans a higher percent of her body weight and optimizes her lower annual maintenance costs.

4. Sell Lowline seed stock.

There are an increasing number of Lowline sales across the country to allow you a place to market your registered Lowlines. There is also a great demand for Lowline cross replacement heifers. They make excellent recipients for some embryo transplant programs.

5. Lowline cross steers are ideal for the emerging "Grass Fed Beef" market.

We find that 1/2 to 3/4 blood steers are very well suited for this purpose.

6. High percentage Lowlines are optimum for selling locker beef.

Their smaller carcass size is much more well suited to the modern American family. Their smaller yet fine textured cuts of flavorful beef will gain you rave reviews from your customers and some great "word of mouth" advertising. We are even breeding some of our higher percentage Lowline cows to lower percentage bulls which gives us terrific weaning weights as a percent of the cows body weight.
