Welcome to our 34th annual production sale, this is our 50th year in the Red Angus business! How things have changed in the past half century!

What an exciting time to be in the cattle business! It is nice to see cattle producers financially rewarded for producing the safest, highest quality beef in the world! Cattle Fax recently reported cow calf producers were in the drivers seat of the beef industry and were forecasting all segments of the industry to have strong prices and a profitable year.

It is a simple fact the "economic machine" in the beef business is the commercial cattle producer. If our commercial producers don't make money on the calves they raise, we don't make money on the bulls we sell. We rely on our customer's feedback to help us make our breeding decisions. We feel by staying in touch with and receiving feed back from our friends and customers we have been able to produce genetics that can benefit our customers through the ups and downs of the cattle cycle. With this in mind our current goal is to breed and raise efficient, sound Red Angus cattle with a balanced EPD profile. We are proud to be raising cattle that fit the beef industry needs, from pasture to plate!

We breed our cattle to be deep bodied, long sided and heavy muscled. Soundness of feet and udders and quiet dispositions are not convenience traits here at Broken Heart Ranch, they are required traits.

We cull hard for structure, productivity, efficiency and disposition. We stand behind our cattle because our reputation depends on how they perform. Some of our customers have utilized our genetics for decades. We "Thank You" for the confidence you have shown our program. We are offering one of the most uniform sets of bulls we have raised to perform in your herd.

Helen and Ralph

The calves were weaned the end of October. We will carcass ultrasound the bulls in February and a supplement sheet will be available on our website and sale day that will include carcass data, scrotal circumferences, and updated EPDs. As well, we will be adding videos and color photos of the cattle to the website. After the first eight bulls, the cattle are listed in birth order in the catalog. A sale order will be available the day of the sale.

The bred heifers come out of our replacements. They were ultrasounded by Dr. Pat Bierman, Mandan Veterinary Clinic last fall and their due dates noted in the foot notes of the sale book.

Bricelyn

We have sure had a nice winter and we hope that trend continues on sale day and through calving. It seems after the past four or five tough winters that the Good Lord and Mother Nature had a chat and decided "those good folks of northern plains have had enough. It's time to give them a break!" We thank them and have sure been blessed with our winter thus far!

We will be glad to assist you in any way. The cattle can be viewed at the ranch anytime. Stop in and have a cup of coffee with us; we'd love to have you. Check our website at www.pedersonbhr.com for videos, color photos and further information.

We look forward to seeing you on March 7th.

Logan on Mac

Sale Information

TERMS:

Half down, balance due when picked up or delivered.

DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls or bred heifers picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:

All cattle are on a complete vaccination program. No creep feed.

BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal mea-

surements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

INSPECTION OF CATTLE:

Bulls and heifers will be available for inspection at any time prior to the sale.

SEMEN INTEREST:

We are selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience. Please contact us if you have any questions.

View the Auction Live!
Bid Online... you're ringside
right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Bank Statement is a deep-bodied, easy-keeping bull with a super disposition. He was brought on as a herd bull because you can never have enough easy fleshing, heavy muscled, mild mannered cattle in your herd. The Banker bulls are a uniform set of calves and will add some depth and muscle to your program. His daughters are becoming outstanding looking females that are producing top-notch calves. Semen is available through Genex.

BHR Golden Boy 453B is a deep-ribbed, easy-keeping bull who is correct on his feet and legs. He has worked his way up through the ranks of herd sires and is proving himself in calving ease, heifer pregnancy and carcass. His calves are following that same pattern for fleshing ability and style. His Logan 734B dam is a deep-bodied, good-footed cow with an outstanding udder. Golden Boy daughters are really turning into great cows. They are super-uddered, sound-made cattle that bring in heavy calves in the fall. Golden Boy is making his mark across the globe, being heavily used in South America and North America. Semen is available through ABS.

Durango was our top-selling bull calf in 2007. We have used him on heifers as well as cows and have really liked his calving ease and the growth he passes on to his calves. We were lucky enough to repurchase the walking rights to him and plan on using him heavier in the future. He is a larger framed bull that is long bodied with lots of depth and thickness in an easy-keeping package. His dam is just one of those cows that never misses, producing two other herd bulls and three dandy females. Semen is available through Genex.

Casino is siring larger framed calves with incredible muscle expression, length of body and straight top lines. He is a bull that will definitely add some pounds to your calves. He is a half maternal brother to the now deceased \$54,000 PIE Code Red. Casino calves will add power and performance to your calf crop while adding that style that will standout to your order buyers.

Hector is an exciting addition to our herd bull battery. His half brother is Messmer Packer and his maternal great grandsire is Beckton Hustler. Both bulls are highly utilized in the Genex program. This year's offering represents his second set of calves and they are stylish and heavy muscled. Hector progeny are the type and kind of cattle that cattlemen can base a foundation on for their future.

Drifter is a bull that offers us some completely different genetics for our cow herd. After touring the SSS herd several years ago we knew that we needed to add a herd bull from their program into ours. Drifter is siring some bigger framed calves that are very easy to look at and really have the depth and body we were hoping for. Drifter is a dark red bull with a straight top line, and a ton of substance, volume and rib shape.

It is official – the King is dead. We lost Mr King after one breeding season. We feel that he was going to be one of the good ones. His offspring are just super to be around and have the muscle definition and thickness that will make you happy on sale day. The female factor of this pedigree is where the rancher will add a long-term investment to his program. There are several generations of outstanding cows in the background of this bull's pedigree.

221 T was purchased for use as a heifer bull and has turned into a super calving-ease bull that produces stylish, easy-to-look at cattle. His sons and daughters are clean fronted, straight topped and have a square hip. We are really impressed with how his calves are growing and how nicely balanced they are. His sire, 73P, is an easy-keeping, sound-made, free-moving herd bull that reminded us of a cross between Dakota Copper and Logan 734B. We have collected this bull and plan on making him part of our AI program. Semen is available.

49U was purchased for use on heifers. We toured South View Ranch in Saskatchewan and appreciate their cattle and how they are raised. 49U is a dark red bull that is smooth shouldered and has excellent muscle expression in his rear quarter. He is also a half brother to Fat Tony in the ABS line up. The Gangster calves are moderate framed with plenty of rib shape and substance.

Grand Vaquero is a calving-ease machine that offers plenty of performance. We have used him on heifers with no problem and are impressed with how much length and growth his offspring demonstrate.

Logan could easily be the best herd bull we have raised. His daughters are deep and thick while having some of the best udders and feet in the breed. If you see Logan 734B in the background of a pedigree you can be certain there will be strong maternal genetics for any cowherd. Semen is still available.

We delivered some cattle out to Paul Gaikowski and saw PIE Shooter and decided to do a little horse trading on some semen. Shooter is an impressive bull that we tried on our cows and had some great success on. We didn't end up with many bulls but the one we did get certainly has herd bull potential. The females that we have are just super not only in phenotype but structure and thickness. We will have a few more Shooter calves in the future.

BHR 855 is a smooth made, long sided bull that was used for a cleanup sire for heifers. With Dakota Copper and Grand Vaquero the potential is unlimited.

Broken Heart Ranch

Predicting Profit...

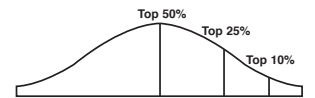

...The Ranchers Guide to EPDs

With a long standing commitment to better serve this continually changing beef industry, Red Angus has prepared for tomorrow's challenges through New & Improved Genetic Predictions (EPDs).

Red Angus has combined databases and subsequent EPD calculations with the American Simmental Association in order to simplify producers' use of crossbreeding programs by supplying them with true multi-breed EPDs. This enhancement enables Red Angus to provide reliable EPDs on all animals in the database, regardless of breed composition. Additionally, with the recent changes to carcass value Red Angus has added Carcass Weight and Yield Grade to its arsenal of ERTs.

EPDs are the most reliable predictors of an animal's true genetic merit. As the only major beef breed to mandate Total Herd Reporting (THR), Red Angus EPDs have the built in advantage of being calculated from 15 years of complete contemporary group data. EPDs have "fast-tracked" beef cattle improvement and removed much of the guesswork associated with selecting range bulls.

Cowherd Building Traits

Profit starts at Reproduction! Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cow herd building traits.

Profitable reproduction can be boiled down to success in these four Economically Relevant Traits:

Calving Ease Direct (CED): The expected progeny difference of calves being born unassisted from two year-old heifers. The Red Angus CED model accounts for contemporary group birth weight differences and calving ease scores.

Heifer Pregnancy (HPG): The expected progeny difference of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): The expected progeny difference of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): The expected progeny difference of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to a higher rate of replacement females that the rancher can't cash crop.

Cows Eat Money! That's why Red Angus published the Mature Cow Maintenance Energy EPD (ME EPD), becoming the first beef breed to evaluate the expense side of the ranchers' profit equation. Here are the facts:

- ME predicts differences in maintenance energy requirements of mature daughters of a bull.
- Maintenance energy requirements are directly related to feed cost - often producers' largest single expense.
- The lower the ME EPD, the less feed daughters require to maintain body condition.
- ME can be used to ensure environmental fit, and to estimate additional feed required by increased growth & milk.

Trait	Abbrev.	Expressed In (units)	50%	25%	10%
Calving Ease Direct	CED	% Probability	5	8	10

It took us all winter to decide which bull would be chosen as Lot 1, but 1158 just kept making the short list every time. He is a wide-topped bull that has tremendous depth, thickness and a square hip. His muscle expression demands attention whenever you look at him. BHR 1158's weaning and yearling ratios are 110 and 116. Durango sires cattle that commercial cattlemen can rely on to add pounds to their calf crop. Lot 1's mother is a second-calf Grand Vaquero daughter that has done a super job. She is a long-sided, feminine cow with a super udder and sound feet and legs that boasts an MPPA of 102.6. Cattlemen can bank on this herd bull because of the long history of proven genetics.

Long, deep, clean fronted and fancy – this is just the start of describing BHR Resistol 1391. He is also the full brother to the second-high-selling bull in our 2011 sale. His mother is a 10-year-old cow that is moderate framed with sound feet and legs with an MPPA of 103. When you combine the top and bottom of his pedigree you not only find something different, but you find something old that has been proven for several years. When we were taking pictures this bull was just a standout. We certainly can't complain about having back-to-back full brothers being selected for Pen One.

Big hipped, wide topped and deep bodied. BHR King 167 is a tank of a bull and it is all wrapped up into a great disposition. This is our first set of King calves and we cannot complain one bit. We selected a King heifer for the Red Select Sale in North Dakota and she sold very well. This bull has weaning and yearling ratios of 103 and 109 not to mention he has a very balanced set of EPDs. He is stacked with greatness on both sides of his pedigree and should sire some dandy feeder calves and some high-quality replacement females.

This is a full brother to last year's high-selling bull. He is a standout no matter where you put him in the lineup and was easily last summer's bull calf of choice along side his mother on grass. He is a stylish calf with plenty of muscle, depth and thickness. His weaning and yearling ratios are 108 and 107. His mother is a moderate-framed, solid-footed, functional cow with an MPPA of 103 that has years of production left in her. We love to see cattle that consistently bring in two herd bull prospects back to back. He has a 3/4 brother - BHR Banker 1234.

Miss BHR Rambo 915, granddam

Lot 5 is a long-sided, deep, soggy Bank Statement bull that goes back to one of our soundest and best uddered cows we have raised, Miss BHR Rambo 915. She has raised 11 calves and given us many great females. If you are just starting in the Red Angus breed or are looking for a well-proven cow line, this bull is worth looking at. This calf is stacked to be a maternal master and female maker. His New Chapter mother is an easy-keeping, sound-footed cow with a super udder and has an MPPA of 103. We think quite highly of this cow line and this herd bull prospect. He has two 1/4 brothers, BHR 1197 and BHR 1243.

Miss BHR Golden Boy 2 0294 is stacked with genetics that we are quite proud of. Her sire BHR Golden Boy 854 is a past sale topper. Her grandsire, BHR Golden Boy 453B, is in the ABS lineup and is one of the soundest made, easiest keeping animals we have raised. Paternal granddam LSF Red Fay 4025 has raised three past sale toppers. On the dam side of the pedigree, maternal grandsire BHR Grand Canyon 400B is also a past sale-topping bull that has given us some dynamite females to add to our herd. 0294 is a deep, soggy female that offers a ton of substance and style in a moderate package.

She was natural bred to Cross Diamond Colossal 955 and ultrasounded for a March 31 due date.
