Gustin's Gelbvieh

Thank you for your interest in our program and welcome to our annual production sale. We have been breeding Gelbvieh cattle for 29 years now and continue to be thankful for the great people that we have been associated with in this business.

We are very pleased with the consistency of our offering this year. Our goal continues to be to provide you with the best Gelbvieh and Balancer genetics available, with calves sired by top AI sires and National Champion bulls. We also are firm believers in balanced-trait selection, putting emphasis on many different areas, including disposition, calving ease, performance, maternal traits, structural soundness, eye appeal, EPDs and carcass traits. We believe the Gelbvieh breed offers the best combination of disposition, maternal excellence and growth of any breed. This year we are again offering both purebred Gelbvieh and Balancer bulls, along with 10 Balancer bred heifers.

The late spring and ample moisture made for a challenging spring and summer, but most of us cattlemen saw one of the best years ever for grass and hay production. That, coupled with record-high prices, made for a rewarding and profitable year in the cattle business.

In spite of the harsh winter, late, wet spring and extremely lush grass, the calves did well again this year. With the spring and summer the way they were, and since we do not creep feed the bulls, weaning weights were down a little, but the calves have been doing great since weaning and they are very similar genetically to last year's offering. We believe that by not creep feeding it allows us to better select our replacement females, and feel we are on the right track as our first-calf heifers continue to put a larger number of high-quality calves in the sale each year. We continue to feed a total mixed ration of homegrown feeds and distillers grain for a moderate rate of 3.25 to 3.5-lb. average daily gain after weaning that will keep the bulls sound and maintain longevity.

Watch for Dams of Merit and Distinction in the footnotes. These are high-producing cows identified by the AGA. Less than 5% of Gelbvieh cows achieve Dam of Merit status and less than 1% achieve Dam of Distinction status.

The sale schedule will run the same as last year. At 10:30 a.m. the bulls will be penned for viewing and the complimentary lunch will be served at noon. The sale will be at 1 p.m. in the heated sale barn, with telephone bidding available for those unable to attend.

Our policy regarding keep of the bulls will be to take \$50 dollars off of each bull hauled away sale day; or pay half on sale day and we will feed the bulls free until April 1. After April 1, there will be a \$2/day feed charge.

Complete Igenity DNA profiles, homozygous black information, yearling weights and scrotal measurements will be available online and on sale day. Videos of each sale lot will also be posted on our website as they were last year. Please call or come early to select your bulls. We enjoy visiting with you about your program and will do our best to assist you in making your selections. As always, we guarantee satisfaction on all sight-unseen purchases. Please call if we can assist you with these services.

Again, thank you for your continued interest and confidence in our breeding program. Give us a call, visit our website at www.gustinsdiamondd.com or e-mail us at gustindd@wildblue.net for information or a catalog. We look forward to seeing you on sale day.
