# K R

Welcome,

Greetings and welcome to our Annual Production Sale.

What an exciting time to be in the cattle industry! With record-high prices, every pound of gain is putting more dollars in your pocket. That's why using Simmental and SimAngus bulls and females in your herd will help meet that demand. We feel we have a select group of bulls to improve your bottom line.

The bulls were weaned on the 8th of October and started on a complete mixed ration consisting of corn, protein pellet, silage and chopped hay, working up to a 52 MegaCal Ration and at no point were pushed harder.

The majority of this year's bulls are out of first-calf heifers. We feel that this is a great testament to our dedication for improving our genetics to bring you a better bull to add in your program.

As always we encourage and welcome any feedback on the bulls. We look forward to visiting with you and hope to see you on April 27th.

*Ben, Cassie and Brinley Kleppe*

### Kuhn's Red Angus

James, Stephanie, Elodie and Reagen  
0902 28th Ave SE • Napoleon, ND 58561  
Home: 701-332-6378 • Cell: 701-426-6921

# K

Welcome to our 2012 sale offering. Thanks to all of you for your business and for believing in our program. We cannot continue to operate without your patronage.

We believe everyone in the cattle industry must concentrate on balanced traits for their cattle. Here at Kuhn's Red Angus that has always been our strategy which you can see in the sires that we purchase, our AI program, and also the embryo program we have.

This year we sent five bulls from the middle of our program to Midland Test Station to see how our bulls perform against other Red Angus Bulls. The Red Angus bulls averaged 2.7 lbs.-per-day gain and 100 ratio on feed efficiency. Our Red Angus bulls were able to gain 3 lbs. a day with a 111 ratio on feed efficiency. Which means our bulls ate less and gained more.

We feel the strength of our program depends on our ability to provide you with exceptional cattle. Your success is our success. We look forward to seeing you at the sale and THANK YOU again for your continued support.

*James & Stephanie Kuhn  
Elodie, Reagen and Hudson*

# Kuhn's Red Angus & Crosshair Simmental

## Friday, April 27, 2012 at 5:00 p.m. CDT

Napoleon Livestock, Napoleon ND • 1-800-932-8821 • 701-754-2216

### SALE DAY PHONE:

Ben Kleppe.....	701-426-9210
Cassie Kleppe .....	701-471-2699
James Kuhn.....	701-426-6921
Stephanie Kuhn.....	701-269-9959

### INDEPENDENT REPRESENTATIVE:

Ray Erbele..... 701-226-7288 Cell, 701-754-2216 Work

### SELLING:

20 Commercial Simmental-Red Angus Heifers  
 14 Commercial Red Angus Heifers  
 22 Simmental Bulls  
 3 Half Blood Simmental / Red Angus Bulls  
 25 Purebred Red Angus Bulls

### SALE ORDER:

Commercial heifers will sell first. After the heifers, the bulls will be sold by a sale order that we will put together that day.

### CATTLE VIEWING:

Prior to April 26, Kuhn's Red Angus bulls can be viewed at the farmstead 7 miles south of Napoleon on Hwy 3 and 3 miles west then 1/2 mile north.

Crosshair Simmental can be viewed at the farmstead 15 miles north of Napoleon on Hwy 3 and 1 mile west.

We invite you to join us for snacks, coffee and pop prior to the sale. Come earlier to view the cattle that afternoon, on April 27, 2012. The sale begins at 5:00 p.m. Central Time.

### AUCTIONEER:

Seth Weishaar..... 605-210-1336

### RINGMEN:

Terry Robinson, Farm & Ranch Guide ..... 701-471-5153 Cell  
701-255-3037 Home

Scott Ressler, ND Stockmen's Assn. .... 701-223-2522 Office  
701-782-4360 Home

### BREEDING SOUNDNESS GUARANTEE:

The bulls will be semen tested prior to the sale but we recommend testing the bull before turning out for breeding. If a bull is tested as a non-breeder, the seller has 180 days before making an adjustment. If the bull is declared a sound breeder by a competent veterinarian he will be returned to the buyer at the buyers expense. If case an adjustment is required, we will refund the purchase price or provide credit towards the purchase of another bull. At no time will the seller be responsible for more then the purchase price of the bull.

### TERMS AND CONDITIONS:

As soon as any animal is sold, it becomes the responsibility of the purchaser. We will discount \$50.00 per bull taken home by the customer on sale day. After May 8th a \$2.50 per-day feed cost will be charged.

All Sales are in the U.S dollar. Each animal is to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids.

All cattle are to be paid for by the purchaser during or immediately after the sale and will not be removed until after settlement has been made unless prior arrangements have been made with Kuhn's Red Angus or Crosshair Simmental.

Napoleon Livestock would like the animals removed from their facility as soon as possible.

### LIABILITY

All persons attending the sale do so at their own risk. Kuhn's Red Angus and Crosshair Simmental assume no liability, legal or otherwise, of any accidents which may occur.

### NAPOLEON AUCTION MARKET ALTERNATIVE BIDDING:

We will be offering the Kuhn's Red Angus and Crosshair Simmental Sale on the internet. To bid from your computer, you will need to follow these steps:

- 1) Log on to [www.napoleonlivestock.com](http://www.napoleonlivestock.com) and click on the green oval that says: "Live Auction."
- 2) Click on "Viewer Registration" and register your information. Click the "Proceed" button at the bottom.

This should all be done at least one day prior to the sale to allow time for approval. If you purchase your animals, you will need to contact Napoleon Livestock at 1-800-932-8821 to make payment arrangements and to make arrangements to pick up or to have livestock delivered.

You must have DSL to be able to bid during the sale.

High Yield is still doing a wonderful job for us. We have used him on heifers as well as cows with an average BW of 80 lbs. His progeny ratioed 105 for marbling and 101 for Ribeye. We truly believe this is one of his many strengths. His first daughters have calved this spring and are showing good milk with a solid utter and great mothering ability. Owned with Koester Red Angus and Ludwigsons Stock Farm, and leased to Accelerated Genetics.

Bond is a rock-solid heifer bull. His average BW on 48 calves is 77 lbs. They have a lot of eye appeal, are long and thick, but smooth made with a nice little head. The Bond Girls are showing me a lot of promise with a good, full, level utter and small teats. This is probably Bond's true strength.

Schuler Envy offers the power of Norsemen King backed by an Enterprise x Ladies Man dam with an outstanding 107 MPPA. Impressive individual performance ratios - 04 BR, 109 WR, 111 YR, 117 IMF-R, and a 114 REA-R. We have calved out some of his first daughters this spring; they are moderate with easy flushing ability and good milk.

Here is a really good High Yield son who is thick across the back, deep through the middle and has a good rear end.

### Kuhn's Red Angus Calving Ease Scores

**Three Stars** – Recommended for heifers. Expect little to no assistance on normal births.

**Two Stars** – Recommended for heifers. Easy calving with minimal assist on birth.

**One Star** – Recommended on growthy heifers. May assist a few normal births.

**Zero Stars** – Not recommended on heifers. Use on mature females.

## Red Angus Guide to EPDs

*Courtesy of the Red Angus Association of America  
For more information on EPDs, visit [redangus.org](http://redangus.org).*

**CED** ..... Calving Ease Direct – predicts the probability of calves being born unassisted out of 2-year-old heifers.

**BW**..... Birth Weight – predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

**WW** ..... Weaning Weight – predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age).

**YW**..... Yearling Weight – predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age).

**Milk** .... Milk – predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

**TM** ..... Total Maternal – predicts the rancher's actual observation of weaning weights of calves raised by an animal's daughters.  $TM\ EPD = Milk\ EPD + 1/2\ (WW\ EPD)$

**ME** ..... Maintenance Energy – predicts a bull's daughters that will require less feed to maintain her body weight and condition; thus increasing profitability.

**HPG**..... Heifer Pregnancy – predicts the probability of heifers conceiving to calve at two years of age.

**CEM** .... Calving Ease Maternal – predicts the probability of a given animal's daughters calving unassisted at two years of age.

**STAY**.... Stayability – predicts the probability that a bull's daughters will remain in the herd until at least 6 years of age.

**MARB** .. Marbling Score – predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

**YG** ..... Yield Grade – predicts differences in USDA Yield Grade score, and is expressed in USDA Yield Grade units.

**CW**..... Carcass Weight – predicts differences in hot carcass weight and is expressed in pounds. Because Red Angus' CW EPD is a multi-trait.

**REA** ..... Rib Eye Area – predicts differences of carcass Rib Eye Area between the 12th and 13th rib.

**FAT** ..... 12th Rib Fat Thickness – predicts differences for carcass fat depth over the 12th rib, as expressed in inches.

## Simmental Guide to EPDs

*Courtesy of the America Simmental Association  
For more information on EPDs, visit [simmental.org](http://simmental.org).*

**CE** ..... Calving Ease – predicts the ease with which a bull's calves are born to first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves sired by this bull.

**BW**..... Birth Weight – predicts the difference in average birth weight of a bull's progeny compared to other bulls.

**WW** ..... Weaning Weight – predicts the difference in average 205-day weight of a bull's progeny.

**YW**..... Yearling Weight – predicts the difference in average 365-day weight of a bull's progeny compared to other bulls.

**MCE** ..... Maternal Calving Ease – The ease with which a sire's daughters calve as first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves born out of this sire's daughters.

**Milk** .... Milk – predicts the milking ability of a bull's daughter. A positive value indicates above average milking ability.

**MWW** ..... Maternal Weaning Weight – predicts the weaning weight of a bull's daughter's calves in pounds. A positive value indicates higher-than-average weaning weights.

**CW**..... Carcass Weight – predicts the difference in average hot carcass weight. A positive number indicates heavier-than-average carcass weights.

**REA** .... Ribeye Area – predicts the average difference in ribeye area between the 12th and 13th rib of an animal's progeny. Express in sq. inches.

**MARB** .. Marbling Score – A subjective evaluation of the amount and distribution of intramuscular fat (IMF) measured between the 12th and 13th rib. A positive value indicates higher-than-average marbling.

**BF or FAT** ..... Backfat – predicts the average differences between an animal's progeny in external fat thickness at the 12th and 13th rib. Express in inches at a given age endpoint.

**YG** ..... Yield Grade – predicts the average differences in cutability and is expressed as a deviation. A negative or lower value is desirable just as a lower Yield Grade is desirable.

**STAY** ..... Stayability – predicts the probability that a sire's daughters entering the herd will stay in production through 6 years of age. A higher value indicates greater stayability.

**API** ..... All-Purpose Index – Evaluates sires for use on the entire cow herd with a portion of their daughters required to maintain herd size and the remaining progeny put on feed.

**TI** ..... Terminal Index – Evaluates sires for use on mature Angus cows with all offspring put on feed. Maternal traits are not considered in this index.
