## The Mature Cowherd Dispersal of Doll House Genetics

Rick Engweiler and Harry Stephens have enjoyed great success in the show ring! This mature cowherd dispersal offers winning individuals and cow families. What an opportunity to put together some terrific "front pasture" cattle.

Rick and Harry have several of the sale cattle entered in the NAILE in Louisville and would be willing to make arrangements to show these cattle for their new owners. These sale cattle are entered in Louisville:

- Lot 18 Talk
- Lot 9 Gunslinger
- Lot 7 Heloise
- Lot 3 Erica and Rising Moon
- Lot 4 Moonbeam

If you are interested in having Doll House's help in showing one of them, call Rick or Harry.

HS Atiya, three-time National Champion. She sells as Lot 16.

Tanner at the American Royal

Harry and Rick with one of their Denver South Devon Premier Breeder Awards.

### DD Bricks Lass 80T 106Y

Color: **Black**

Tattoo: **DAD106Y**

This high percentage (15/16) Lowline beef steer is moderate framed, easy fleshing and should produce a tremendous carcass loaded with tenderness.

EZ Houdini, grandsire of Lots 36, 37 and 39

# What are they good for?

**1. Calving ease on first calf heifers.** Halfblood calves average weights of 60-70 pounds at birth will vary depending on the genetics of the heifers. They will be in the frame score 4 to 5.5 range again depending on the frame score of the heifers. These vigorous healthy calves will weigh right at or just slightly below the average of your regular calves especially if you start calving your heifers a few weeks earlier than your main cow herd as is common practice. The extra calves you wean (no death loss at birth) will more than make up for any loss in individual weaning weight. These first cross calves will sell right with your regular calves at no discount.

**2. Halfblood and first cross Lowline steers will finish at 1,150 to 1,275 pounds if backgrounded on a high roughage diet.**

They will work extremely well to run as yearlings on grass and then these yearlings will gain very well and very efficiently in the feedlot. They will finish in a much shorter feeding period saving high corn costs and yardage. Because of their heavy muscled Angus heritage they will yield excellent carcasses with high rib eye area per hundredweight and a high quality grade. The Lowline cross beef is noticeably fine textured and very tender.

**3. Use Lowline cross cows to moderate your cow size.** Run more cows per acre and wean more pounds per acre. Sell that total pounds of weaning weight for a higher price per pound. This is especially true from the 2nd year of production and beyond when you can breed the Lowline cross females to a larger framed but easy calving bull of another breed to make a smaller cow be all she can be. Thus she weans a higher percent of her body weight and optimizes her lower annual maintenance costs.

**4. Sell Lowline seed stock.** There are an increasing number of Lowline sales across the country to allow you a place to market your registered Lowlines. There is also a great demand for Lowline cross replacement heifers. They make excellent recipients for some embryo transplant programs.

**5. Lowline cross steers are ideal for the emerging "Grass Fed Beef" market.**

We find that 1/2 to 3/4 blood steers are very well suited for this purpose.

**6. High percentage Lowlines are optimum for selling locker beef.** Their smaller carcass size is much more well suited to the modern American family. Their smaller yet fine textured cuts of flavorful beef will gain you rave reviews from your customers and some great "word of mouth" advertising. We are even breeding some of our higher percentage Lowline cows to lower percentage bulls which gives us terrific weaning weights as a percent of the cows body weight.
