**98 YEARLING BULLS  
40 COMMERCIAL HEIFERS**

- Free Breeding Injury Guarantee
- Carcass Ultrasounded
- Herd Has Been Tested Free of BVD
- Bulls Have Passed Complete Breeding Soundness Exam

Dear Cattlepeople,

Welcome to the 2012 Regency Acres annual production sale.

Wow, what a difference a year makes. A year ago we were coming off one of the harshest winters ever and this year was one of the mildest.

That thought caused me to reflect back 55 years to when dad purchased our first registered seed stock. There is as much change as there is in the weather. At that time the popular cattle size was belt high. Scales for weighing cattle on the ranch were unheard of. It was in the late fifties that performance testing seed stock was introduced by a joint effort between Fort Keogh at Miles City and the Montana Extension Service. The Montana Beef Performance Association was started and since that time we have been weighing calves at birth, weaning and yearling ages.

Taking weights seemed to put the thought out that cattle had to be bigger and that brought on the importation of the European breeds that were goliath in comparison to the English breeds. An acquaintance brought a goliath bull (not Angus) into the states from Canada and wanted to show him off. He had him in a barn and when he opened the door there was nothing there. Gary said look up, look up. The bull probably could have rubbed the underside of his belly on the top of a fence post.

Now we had all the puds getting bred to the goliaths and that brought on a lot of diversity in size. There was no predictability in what you were going to get for a calf. The Angus Association came up with EPDs to make breeding decisions less of a risk. Now we have EPDs for everything short of losing ear tags.

At the onset, the EPDs were kind of a shot in the dark. A bull would be used because of certain EPDs but by the time his calves would hit the ground, his EPDs would change so much that you wished you had never used him. The Angus database of records is so huge now that they are much more reliable. The Angus breed advanced rapidly because of their foresight and now most of the European breeds are trying to make their cattle look like Angus. They have even made them black.

While EPDs are a useful tool, one still has to know what they want their cattle to be like. You can breed them for the market but at the same time, the cow factory has to be remembered and the environment plays a big part in what is needed there. EPDs do not take the weather and range conditions in hand. Structural and maternal soundness are very important and we at Regency Acres are very serious about maintaining that in our herd along with a certain amount of desirable carcass traits.

We have a really nice, uniform set of bulls and heifers to offer this year. Come take a look and join us for lunch.

We look forward to seeing you on April 13th.

*The Thiessens*

## Annual Production Sale 138 Angus Sell

### 98 Yearling Bulls • 40 Commercial Heifers

**Jim Thiessen**

**Bill Pelton**

Bill Pelton Livestock ..... (406) 671-5100

**Sale Location**

Yellowstone Livestock Market ..... (406) 482-3513  
East side of Sidney across from railroad tracks

**Accommodations:**

Richland Motor Inn ..... (406) 433-6400  
Lone Tree Motor Inn ..... (406) 433-4520  
Park Plaza Motel ..... (406) 433-1520

**Terms & Conditions:**

All cattle are to be settled for sale day unless prior arrangements have been made. Please leave specific instructions in writing for transfer and shipping. Each animal will be sold to the highest bidder with the auctioneer settling any disputes as to bids. Announcements made from the auction block take precedence over any printed material. The cattle sell under the suggested terms and conditions as adopted by the American Angus Association.

**Herd Health:**

All cattle will be accompanied with proper health papers for immediate shipment within the continental United States. All sale animals are calfhood vaccinated, including 7-Way, IBR, BVD, P13 and Pasteurilla. The heifers had a BVD booster and a Letpo-Vibrio shot this spring.

**Note:**

Buyers unable to attend the sale may send or phone their bids to the auctioneer, the representatives, Jim or Russ. See sight-unseen bull purchase guarantee on page 2 of the catalog.

Joe Goggins

**Special Representatives:**

**Joe Goggins, President**  
Montana Angus Association

**Leo McDonnel, Jr. and Jim Sitz, Directors**  
American Angus Association

Terry Robinson

John Goggins

Bill Pelton

**The sale will be broadcast live on:**

**Set up an account**

Setting up an account is a simple two minute process.

1. Look for the log-in area on the upper left portion of the screen.
2. Find the blue button labeled "Register to View"
3. Fill in the form with your name, email, state, username, and password.
4. Press the proceed button at the bottom of the page.

Any time you come back to CattleUSA just enter your username and password to log-in and watch auctions.

**Get approved to buy**

Each auction approves its own buyers, no buyers are approved by CattleUSA. This is done for your privacy and security. Your buyers information is kept private and is only released to the auctions you choose. In order to obtain approval to buy at an auction you will need to submit your contact information to each auction you wish to buy from.

1. Log in to CattleUSA.
2. Push the Submit button next the auction you wish to be approved at. The first time you do this, a form will pop-up for you to fill out your contact information. Fill out your information then push the button at the bottom of the form to continue.
3. You have now sent your information to that auction. The auction will now be able to find you in their data base and approve you to buy. If you would like to be approved at other auctions push the submit button next to each auction you wish to be approved at. Your information will be forwarded to those auctions only.

Auctions do not have access to your information until you send it to them.

## When you buy from Regency you get ...

### **The Bull Injury Guarantee**

Regency Acres is providing a first-breeding-season injury guarantee on all bulls selling for \$2,500 or more. The first breeding season is defined as the 90-day period following the first turn-out of the bulls. If a replacement is available, he will be provided. If the buyer prefers, credit will be given in the following year's sale, less salvage value of the injured bull. Regency reserves the right to have the injured bull inspected by a veterinary of our choice. **Regency Acres must be notified within 30 days of the injury and no later than Oct. 1.**

### **Tested BVD-Free**

The entire Regency Acres herd has been tested FREE of Persistent BVD Infection. Anxiety about this disease that causes abortion and other problems convinced us to do the test. An animal can appear healthy and still be a persistently infected carrier of BVD and spread disease. In fact, it has been said that some feedlots will not be accepting cattle that have not been tested free of BVD.

### **Genetic Defects**

All cattle selling are free of the genetic defects Arthrogyrosis Multiplex (AM), Neuropathic Hydrocephalus (NH) and Contractural Arachnodactyly (CA). For more information on these genetic defects, visit the American Angus Association's website at [www.angus.org](http://www.angus.org).

### **Fertility and Physical Exam**

Complete breeding soundness exams and semen evaluations have been conducted by Dr. J.J. Hovde of High Plains Veterinary Clinic. Exam reports are available for inspection.

### **Free Delivery**

Free delivery up to 500 miles on bulls selling for \$2,500 per lot or more, or, a total purchase of \$3,000 or more. All other purchases will be delivered at cost. **Please be able to take delivery at any time following the sale.** A \$100 credit per bull will be given if you take your purchases home with you sale day. If you prefer, we will take your bull home and feed him for free until May 1. After May 1, we will feed the bulls at \$2.50/head/day until you come and get him. Please make it clear what you want done with your new purchase when you settle up at the front desk. Commercial heifers are the responsibility of the buyer as soon as sold.

### **Sight-Unseen Purchase Guarantee**

Buyers unable to attend the sale may call or send their bids in to Russ, Jim or any of the representatives listed. If the bull(s) purchased are not as presented, the purchased bull(s) can be returned to Regency Acres at no cost to the buyer.

### **Ultrasound:**

The bulls have been ultrasounded for ribeye, marbling and back fat measurements by Matt Lane. This information is in the catalog.

### **EPDs:**

The EPDs are current as of March 16, 2012.

### **Calving Ease Scores:**

- 1 Star – Use on mature cows
- 2 Star – Use on cows three-years-old and older
- 3 Star – Could be used on heifers but be ready to assist
- 4 Star – Very little, if any, assistance should be necessary
- 5 Star – Very easy calving; no assistance should be necessary

## Helpful Hints for Care of Herdbulls ...

Having herd bulls adapt to the environment they will be in is very important to the success of a breeding program. Whenever possible, the bulls should be fed the same type of forage they will eat in the breeding pasture for a minimum of two weeks before turn out. Their rumen operates with little bugs to break down the diet and different forages each have their own little bugs. About two weeks is the time required for the rumen to adjust to a different diet. When a bull is turned out, he isn't thinking much about eat-

ing, so any advantage that you can give him will be beneficial to younger bulls.

Another trick for having a virgin bull ready is what we call "Jump-starting." If you have a cow or a heifer around that is cycling, put the bull with her. If he seems disinterested, put another bull in with the cow for him to observe. This should trigger his brain. When the bull appears interested, let him in and remove the other bull. Make sure a bigger bull doesn't start whipping on him, or that could defeat what you are trying to accomplish. It is rare that this procedure is necessary, but it is good insurance and, once the bull gets a taste of what his job is, he will be ready for those heifers.

When breeding season is finished, a reconditioning program for yearling bulls is good as they change their teeth at 18 to 24 months of age.

## Predicting the Future with EPDs

An Expected Progeny Difference (EPD) is a prediction of how future progeny of a sire are expected to perform in various production and carcass traits which are measured. EPDs are expressed in actual pounds, square inches or centimeters (depending on the trait), plus or minus, that you can expect in the weights or carcass measurements of progeny sired by a particular bull as compared with another bull. The EPDs of the bulls listed in this sale book can be compared to each other, as well as other Angus bulls. The average EPDs for non-parent bulls of the Angus breed are:

PERFORMANCE EPDS						CARCASS EPDS		
CED	BW	WW	YW	SC	MILK	MARB	RE	FAT
+5	+1.8	+47	+85	+51	+22	+41	+30	+009

The EPD information was derived from the 2010 Spring National Angus Evaluation conducted by the American Angus Association. Please ask if you need assistance in understanding EPDs.

Each EPD has an accuracy value (acc) which measures the reliability of the EPD. The higher the accuracy, the greater the reliability of the EPD and the less it would be expected to change.

## Performance Definitions and Examples

### Adjusted 205-Day Weaning Weight

Weaning weight adjusted to 205 days of age and for age of dam.

### Adjusted 365-Day Yearling Weight

Off-test weight and height adjustment to 365 days of age.

### Adjusted Yearling Scrotal

Off-test scrotal circumference (cm) adjusted to 365 days of age.

### Calving Ease Direct (CED)

Is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

### Birth Weight EPD

Gives an indication of calving ease. Birth Weight EPD predicts the birth weight difference one can expect from any two sires. When bred to genetically similar groups of cows, a bull with a Birth Weight EPD of +8.0 should sire calves with an average birth weight 5 lbs. heavier than a bull with a Birth Weight EPD of +3.0. Experience has shown that an Angus bull with a Birth Weight EPD of +2.5 or less can be used on first-calf heifers with a minimum of calving problems.

### Weaning Weight EPD

A prediction of a bull's ability to transmit weaning growth to his progeny. For example, Bull A has a Weaning EPD of +30 lbs. Bull B has a Weaning EPD of +10 lbs. At weaning, Bull A's calves will average 20 lbs. heavier.

### Milk EPD

Expressed in pounds of weaning weight that result from the amount of milk produced by daughters of a particular bull as compared to the daughters of other bulls. If Bull A is +15 for Milk and Bull B is +5, Bull A's daughter's calves will weigh 10 lbs. heavier at weaning due to her superior milking ability.

### Yearling EPD

Yearling Weight EPD takes into account both pre-weaning and post-weaning growth. Yearling weight is the most heritable of all growth traits. You can expect bulls with high yearling EPDs to produce fast-gaining calves. If Bull A has a Yearling EPD of +60 and Bull B has a Yearling EPD of +30, Bull A's calves will average 30 lbs. heavier than Bull B's at one year of age.

### Marbling EPD

Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

### Ribeye Area EPD

Predicts the difference in ribeye area of a bull's progeny compared to progeny of all other bulls evaluated at a given endpoint. Reported in square inches.

### Fat Thickness EPD

Expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Leachman Erica 0025  
TC Stockman 365  
GB Elbrea 2109

Rock was our selection in the 2009 Spickler Sale. Rock is moderate framed with a mild disposition and excellent muscle expression. His progeny are deep, quiet and eye appealing.

## Genetic Defects

All cattle selling are free of the genetic defects

- Arthrogyroposis Multiplex (AM)
- Neuropathic Hydrocephalus (NH)
- Contractural Arachnodactyly (CA)

For more information on these genetic defects, contact us at Regency Acres or Andy Rest, American Angus Association, or visit the American Angus Association's website at [www.angus.org](http://www.angus.org).

With a pedigree stacked with some of the breeds most recognized female producers, 7164 sires very attractive, gentle and productive females and powerful range bulls. He combines calving ease and very mild disposition with depth of body that is second to no other bull we've seen. His sons have been one of the highest selling sire groups at both Lunds B Bar and Regency Acres since they debuted in 2007.

Owned with Lunds B Bar Angus and Sitz Angus.

RA Spectre X1 was the second high selling bull in 2010 to Arntzen Angus Ranch. X1's dam, RA Erica Lass V80, is an excellent uddered deep bodied cow. The great grand dam is one of the best cows on the place.

X1 will be used to carry on the Spectre lineage. Owned with Arntzen Angus.

W5 was the second high-selling bull in our 2009 sale and is one of the thickest sons of Reich Lead On we have ever produced. His progeny come easy and early, and are very stylish. His dam is one of our best with progeny ratios of 4BR92, 4WR105 and 3YR106. Owned with Bar JV Angus and Dale Vitt.

Wilson was retained out of our 2009 calf crop and is a maternal brother to RA 680 Traveler W79, sire of lots 64 - 70. His dam, RA Blackbird K5, is a model angus cow, moderate framed, excellent uddered with mild disposition. Expect Wilson progeny to add length, thickness and improve udders.

## Commercial Heifers

### 40 Purebred Angus Yearling Heifers

- The heifers are bred similar to the bulls selling.
- All have had Lepto/Vibrio and BVD vaccinations.
- They are freeze branded and ready to breed.

They will sell in groups of five with the option to go as deep as the buyer wants. Buyers have the option to buy registration papers at \$100 per head.
