WELCOME

FLAT WATER GANG Red Angus

From all of us in the Flat Water Gang, we would like to extend our sincere thanks and gratitude for your interest in our program and we would like to welcome you to join us in Valentine for our 5th annual sale. We are truly excited about this set of bulls as we feel like the consistency, depth and uniformity is greater than we've ever had. The genetics we are offering are part of a designed breeding philosophy and we have done the best we can to provide as much information as possible to help you make your breeding decisions. Please feel free to contact any of us to answer any additional questions that you may have. We want you to be confident and assured in your buying decisions.

The Red Angus breed is finally getting the full-scale recognition that it deserves in the cattle industry. Red replacement females and bred cows are in high demand all across the country due to their maternal characteristics, moderate size, easy fleshing ability and quiet dispositions. Feedlots are filling their pens with Red Angus influenced cattle due to the consistency in carcass, temperament, efficiency and heat tolerance. Whether you are new to the breed or you have been using Red Angus genetics for years, you recognize that Red Angus should be the cornerstone in rebuilding the Nation's beef herd. Our genetics adhere to the traits that make the breed unique from others and our bull offering represents that commitment.

We focus on producing great females, first and foremost. Udder quality, disposition, moderate size, calving ease and efficiency are all paramount in what we do. In addition to that, there is a specific type that we are intent on replicating. Our cows have expansive rib shape and depth of body in order to forage and maintain themselves in a variety of environments. This type of moderate framed, easy fleshing, high capacity female that stands with some width of base is the kind that works best in our low input environment. When one looks at the ribeye area of the bulls that are offered, a person can see the correlation between the wide-bodied females that we strive to produce and the large ribeye of their offspring. Our cattle have natural muscle and thickness through diligent sire selection.

Once again we are using DV Auction as an additional sales medium to help those that are unable to attend on sale day. Video of the bulls and heifers can be viewed through a link on our website or directly at dvauction.com. As another way to accommodate our buyers, we are also excited to be utilizing Bill Pelton's conference call service. We realize that there are buyers that prefer to be on the phone with someone when making their buying decisions and we felt this would help. Please refer to the instructions on the insert and please call with any questions you may have. As always, we are dedicated to helping in any way we can as you look to make important genetic decisions. Your satisfaction is a top priority.

Thank you again for your interest and we can't wait to see you on sale day.

Best regards,

The Flat Water Red Angus Gang

Livestock Insurance:

Insurance available through Grassroots Insurance Associates, Mark & Deidre Smith..... (515) 965-1458 or (515) 229-5227

All purchases are the buyers' responsibility as soon as they are sold.

Accommodations in Valentine:

- Valentine's Niobrara Lodge..... (877) 376-3003 or (402) 376-3000
- Comfort Inn (402) 376-3300
- Dunes Lodge & Suites..... (402) 376-3131
- Trade Winds Motel (402) 376-1600

Catalog and Promotion:

Tracey Koester, Cow Camp Promotions..... (701) 475-2736
www.cowcampromotions.com

Guarantee:

All bulls are guaranteed breeders and are guaranteed healthy on sale day. They will have passed a semen test and breeding soundness exam. Scrotal measurements will be available sale day. Bulls are guaranteed to be breeders during the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. Individual breeders will work with customers on a case-by-case basis concerning guarantees.

Delivery and Load-out:

We are offering free delivery to all points in the state of Nebraska. Delivery to other states will be at the lowest cost possible from the seller's base operation. Bulls not delivered by April 15 will incur a \$4 per day feeding cost thereafter. A \$100 credit will be offered for bulls taken home on sale day by the new owner.

Sight-Unseen Purchases:

We encourage you to utilize DV Auction, Inc. or Bill Pelton's conference call line as a means to facilitate your absentee purchases. However, if you are unable to use these services or are uncomfortable with them, please feel free to contact any one of the respective breeders or sale day contacts to accommodate your requests. Let us know your needs and budget range and we will work with honesty and integrity to help purchase the best possible bull on your behalf. If you are unsatisfied with the purchase, then you don't own the animals.

Terms and Conditions:

- The auctioneer will settle any bidding disputes and his decision on such matters will be final.
- All sales are cash in U.S. funds unless prior arrangements have been made with the sellers.
- Any announcements made on sale day take precedence over printed material.
- Health certificates will be furnished for shipment anywhere in the United States.
- Any death or injury after the animal is sold is at the buyers' risk.
- Anyone attending this sale attends at his/her own risk.
- A retained interest by the seller will be designated as such in the sale. The buyer receives full possession and full salvage value on all bulls with a retained ownership interest.
- All registered cattle sell under the suggested Sale Terms and Conditions set forth by the Red Angus Association of America.

SANDBUR RIDGE RED ANGUS

Welcome to the Annual Flat Water Gang Production Sale. Thank you to our past customers for your continued support and interest in our program and our offering. If you have any questions regarding this offering please call me anytime at 402-843-8726. This is a great set of bulls and they are easy to talk about.

The drought of 2013 brought about some changes to my operation. This year I went to feeding a TMR with an International 886 and a Farm Aid feed wagon. The reasoning was to be able to feed lesser quality, lower cost feed inputs and present them to the bulls in an appealing format. The ration consists of a balancer pellet, corn, synergy, and ground CRP hay, prairie hay, corn stalks and alfalfa hay. I don't know much about the art of feeding bulls, all I did was drive along and feed the bulls, but I know this group of bulls have really responded to this 48 Mega Cal diet and they look great. They are wide topped, free moving and very heavy muscled.

We have an excellent offering of heifer bulls, the kind you can turn in and feel confident you will have very few problems with the heifers come calving time. There is a great selection of those moderate birth weight and higher growth bulls that can be used on heifers and then rolled up into the cows as the bulls get older. I also have a handful of those heavier birth weight bulls that will add pounds to your calf crop and leave you with those bigger replacement heifers that the market is paying top dollar for.

The focus of our program continues to be on building high quality, high fertility, extremely functional and problem free females. While not all of the herd bull selections we have made have worked as well as we hoped the majority have done exactly what we wanted. Our cow herd has excellent udders, good feet, and good fertility and can fend for themselves. We have also focused on putting meat and capacity into our cattle. The meat part is very real when you look at the rib eye area on these bulls. The capacity is real when you look at the yearling weight in this group of bulls. If you have been selecting for high weaning weight and yearling weight EPD bulls you will be left with cows that are harder doing and calves that cannot consume enough to maintain themselves and actually gain weight, especially when the weather gets tough.

When you look at the videos of the bulls you will notice white boards with black numbers on them in various locations around the video pen. The purpose of those boards was an attempt to give you some idea as to the size and potential frame score of our bulls. We have included a frame score chart in the catalog for you to reference as you watch the videos. I understand that this is not a perfect method but I hope it lends value to you as you look over our offering. Please let me know your thoughts on this so I can determine how to move forward.

Knott Family

Thanks again for your consideration. If I can be of any help please call me and if you are unable to attend the sale we can assist you with several purchase options that do not require you to be in Valentine.

COOKSLEY RED ANGUS

Cooksley Family

It's that time of the year again. I always look forward to bull sale season. It's always nice to see the products of the past years labor and talk to customers. I enjoy hearing how the bulls performed and how calves are looking.

This year's bulls are a quality set top to bottom. Fall bulls were weaned last march fed for 30 days then turned out on grass until December. From December until March they have been running on a meadow with plenty of room to rough house and are hard and ready to go. They are getting a wet DDG and hay ration. The yearlings are getting a wet DDG/corn/hay ration. They are ready to go and should be ready for heavy use.

Thank you for your interest and trust you put in our program. We're looking forward to seeing everybody on sale day. If you have any questions please call.

BIRNIE RED ANGUS

Greetings and welcome to another ride with The Flat Water Red Angus Gang. Thank you to all of our past buyers for your continued support and trust in our program. Our family is honored to be a part of this group as they are close friends and family with a common goal of producing problem free genetics that are devoted to the fundamental elements that the Red Angus breed is built upon. Those fundamentals focus on maternal and convenient elements such as calving ease, disposition, fertility and longevity.

Our breeding decisions are based upon what type of female we believe that mating will produce. It is that maternal principle that guides us. That focus combined with adherence to structural correctness from the feet to the udder and beyond has helped us build a cow herd that is adaptable and efficient.

We select for wide based, moderate framed cows with rib shape and depth of body. This is the type of animal that excels in our environment as they have the capacity and volume to convert forage. We have found out the hard way that selecting for extremes in WW and YW produces large framed, narrow based cattle with little capacity. In our experience, the lack of volume and depth leaves behind an animal that is unable to forage effectively, balance their energy needs and sustain themselves. We prefer a more balanced approach to growth.

Like most everyone in the Midwest, this past year has been a bit of a roller coaster ride. The drought conditions challenged each of us to evaluate alternative feed resources, scrutinize our genetic base and ultimately reveal the cattle that are able to adapt and thrive. It was rewarding to see that the type of cattle we are producing were able to sustain their body condition and excel in a variety of areas.

With feeds costs soaring in the winter of 2012 and spring of 2013, we elected to feed baled corn stalks and alfalfa at a 1:1 ratio. We don't own a feed wagon, so every bale was rolled out with our trusty 4020 in our calving pasture. Our cows graze corn stalk residue for about 100 days out of the year, so they were reluctantly accustomed to the feed type. The conception rates were as good as they ever have been and we were extremely pleased when all of the wet 2's bred back, without exception.

Our summer grass is abundant, but not necessarily energy dense. We can run a pair to about 7 acres during a summer grazing season. The weaning weights were the best they have been as the sale bulls averaged 631 lbs. at the adjusted 205 day weight and 1127 lbs. for their adjusted 365 day weight. Their collective WDA average is 3.02 and they gained 3.10 lbs/per head per day from weaning to yearling weight. The carcass data came back in impressive fashion as the bulls averaged 1.208 inches of REA per cwt, with an average IMF score of 4.458 and .3884 inches of back fat.

Once again, they were developed with Sandbur Ridge's bulls. Ross and I visit about the bull development program every year and consult with our nutritionist to balance diets and help us achieve our target of 3 lbs/ per head/per day gain. We accomplish this on a 48 Mcal NEg diet. Our goal is to develop bulls for breeding, durability and longevity. Steady and responsible growth is good for the structural development, sustainability and function of the bulls.

Birnie Family

This group of bulls is big topped, well muscled and correct. We have worked hard to select sires that have strong cow families with a history of longevity and productivity. Our walking herd sires, 1154, 0014 and 9127 all exemplify those attributes.

We will be retaining a 50% revenue sharing semen interest in all our bulls.

Please feel free to contact us with any questions you may have and we will be happy to assist you. Thank you for the opportunity to serve your genetics needs.

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- 1) Visit the DVAuction web site at www.dvauction.com
- 2) Click on the "Register" tab
- 3) Enter a user name, password and your contact information.
- 4) Click on "Apply for Bidding."
 - Select the sale from the list of other auctions and click "Apply".
 - Complete the process by filling out the Banking & Lending information requested.
 - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call (402) 316-5460.
 - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Sale Day Conference Call

Our goal is to have you in the seats but if you can't make it on sale day, we're fixin' to get you "on the line!"

Easy as 1-2-3

1. **In Advance-** you call the breeder to pre-register your buyer number
2. **Prior To-** the sale you will receive an email or call from the breeder with the toll free conference call number, pin number, and instructions
3. **Sale Day-** at or during the sale time, you call the toll free number and enter your pin to be placed on the call.

One of the most impressive calving ease bulls in the breed today. 9127 sires wide-based, easy fleshing cattle that are structurally sound and stylish. He sires solid bull calves with depth, muscle and spring of rib on moderate frames. His daughters exhibit a lot of dimension and capacity with solid udder structure and soft dispositions. 9127 has the best disposition of any bull we've ever been around. Owned by Birnie Red Angus, Milk Creek Red Angus and Sandbur Ridge Red Angus. Semen available.

Structurally sound, Troubadour exhibits tremendous depth, volume and muscle pattern on a moderate frame. His spread from birth to yearling displays an ideal growth pattern as exhibited by his 94 BW ratio, 109 WW ratio, and 103 YW ratio. Maternally, Troubadour stands alone with unparalleled depth in production and longevity as his mother, grandmother and great grandmother, never missed a calving opportunity and display MPPAs of 105.8 on 8, 104.4 on 12, and 104.6 on 12, respectively. Owned by Sandbur Ridge Angus and Birnie Red Angus. Semen available.

85X is the result of mating between Signature 5615 and his full sister, 5L Ruby 01-453. Signature is known far and wide for his ability to sire high performing bull calves along with beautiful females with scope, dimension and superior udder quality. The Ruby cow has a phenomenal udder and is also the sire of Grand Express 5655. 85X will pass consistency of type and soundness on to his progeny. Owned by 5L Ranch.

He is Tradition's best son to date. Tradesman descends from highly maternal lineage with Rambo 502, Grand Canyon, Emblazon and Norseman King as the pillars of his pedigree. He sires moderate framed, heavy muscled bulls with capacity and scrotal circumference and makes structurally sound females that flow from front to back with softness and volume. Owned by 5L Ranch.

Now deceased, 1154 was a dark cherry red, 6 framed bull with great structure and excellent carcass quality. His sons possess great length of side, depth of rib and a tremendous quarter. He is a bull with unbelievable production on the maternal side of his pedigree. His dam is still in production at 15 and carries a 105.6 MPPA, his grandmother had 11 calves for a 101.8 MPPA and his great grandmother had 12 calves with a 100.1 MPPA. Owned by Birnie Red Angus and Sandbur Ridge Red Angus.

Mighty Mouse was Cooksley's pick of the 09 5L sale. His good disposition and easy going nature are well known. His calf crops have displayed low birth weights with lots of performance in very moderate packages. He has been the lead herd sire at Cooksley Red Angus for the last few years. Owned by Cooksley Red Angus and 5L Ranch.

REPLACEMENT HEIFERS

15 COMMERCIAL RED ANGUS

REPLACEMENT HEIFERS

Cooksley Red Angus, Ben Cooksley (308) 872-1007

Home raised heifers from the Cooksley program. They are long time weaned and grown on a high forage diet for adaptability. Managed and developed with a full health protocol. We believe they will make some very good replacements with the ability to thrive in multiple environments. Selling in groups of 5 and the winning bidder has the option to buy them all.

13 COMMERCIAL RED ANGUS

REPLACEMENT HEIFERS

Sandbur Ridge Red Angus, Ross Knott (402) 843-8726

Ross bought these heifers from bull customers, Randy and Jamie Koops from Wyoming. The heifers were weaned at Ross' facility in Petersburg and have been developed slowly to weigh approximately 800 lbs on sale day. They have subscribed to a full health and vaccination protocol and will make a solid set of replacement females. They will sell in groups of 5, 5 and 3 with the winning bidder having the option to take them all.

When told we were going to be leading off the sale this year, the choice was really pretty easy. 321A is very balanced in his traits and type. He is smooth and attractive with his deep red color and expressive rib shape as shown by his large REA of 15.13 inches. His dam was our pick of the bred heifers at Milk Creek's 2011 female sale and she has not disappointed. She has a 9127 bull calf at side, born Feb 7th that is as good as we have on the ground right now. Her phenotype is ideal as she is moderate framed, big ribbed and deep bodied with sound feet and strong udder quality. 321A's sire, 1154, is backed by a foundation cow family with a history of longevity and production.

358A just has that look. You know the kind.cocky and confident with a desire to be seen because he just knows he's good. This ET calf exemplifies the characteristics that we love about the 9127 cattle. He is easy keeping and moderate framed with as much shape and rear quarter expression as you will find in a calving ease package. His dam had 9 natural calves with a 98 BW ratio, 100 WW ratio and 103 YW ratio before entering Ross' donor program. He is a very complete bull with growth, carcass and exemplary maternal characteristics.

An excellent herd bull prospect. He is dark red, easy moving and very attractive. His ratios are right and his disposition is outstanding. His mother was purchased from George Trishman at Hamilton Ranches in Montana. George allowed me to have a few picks of his replacement heifers to bring in some new blood lines. This one turned out to be a great choice! Thanks again George. Retaining 50% revenue share semen interest.

At one of the final chapter sales for the historic Buffalo Creek Red Angus herd I purchased the Pinemarie 3940 cow. She is a great old cow with tremendous performance and longevity in her pedigree. These next 3 embryo transfer bulls are moderate birth, high performance, larger framed bulls. Keep all the daughters out of these and you wont need as many replacment heifers in future years. Retaining 50% revenue share semen interest in all 3 of these full brothers.

353A is a cast iron heifer bull with sustainable maternal qualities. His dam, the 970 cow, has unbelievable fertility and productivity in her family and is the dam of Enhanced 1154. 970 has a 105.6 MPPA/12 calves with ratios, BW 95, WW 106 and YW 103. 970's dam had 11 calves with a 101.8 ratio and her granddam had 12 calves with a 100.1 MPPA. Good luck finding another rock-solid heifer bull with this kind of pedigree depth. Keep every heifer out of this bull and build the herd of a lifetime.

Cherry red and moderate framed with great dimension and depth of body. 322A expressed excellent early growth with a 678 lb WW for a 107 ratio. He then leveled off to a 100 ratio at YW. We believe it is that type of growth pattern that makes great cows as they get you profits in the sale ring and keep the mature cow size in check.

Another 9127 by 425V cross. Just the type of combination that makes Red Angus females the overwhelming choice for restocking the American Beef herd. Easy fleshing, good uddered cattle with soft dispositions never go out of style.

This is a bull that I really admire for his phenotype and trait balance. Perhaps I admire him most because of the cow behind him. She is a picture perfect Blazin Red daughter. 308A's dam is a soft, wide bodied, capacious, deep red cow with a perfect udder. If there were a category on Jeopardy titled, "She is the ideal cow." I might say, "What is 873U" as the answer. Phenotype, balance and a terrific IMF score.

When people come and visit our operation they fall in love with the cows that we have. Then they visit the bull pen and wonder which bulls make those cows. It's pretty easy, bulls like this make wide based, deep bodied, easy fleshing cows that breed back. Those are our type of cows and this is our type of bull.

Hello bull with a 773 lb weaning weight. Hello 121 WW ratio. Nice to see you. Hope your new owner has a great time selling bell ringers out of you. I also hope your new owner appreciates cow families that never miss calving opportunities, starting with a 109.1 MPPA on 3 calves, 100.6 MPPA on 5 calves and 100.4 MPPA on 14 calves. It's nice to retain heifers out of cow families that have great udders with proven production and fertility. Retaining 50% revenue share semen interest.

Legendary calving ease genetics by the old cow maker himself, Coppertop 301. Combined with the fertility and maternal goodness of the F20 cow line, this bull is a herd builder.

We really wanted to picture this bull as he is a heavy load, but Ross was talking on his cell phone and Mark and I couldn't get 320A to set up. He is a high powered gut pile that came in-dam from a perfect uddered, high volume cow that we purchased from the C-T program in Montana. He's broad topped, free moving and correct with a lot of power.

The Express 9127 by Legend 425V is a mating worth replicating. As you will see in 303A, the cross combines the unique quality of calving ease with depth of rib, thickness and strength in the rear quarter. We really like the females out of this combination as they exhibit softness and body on a moderate frame.

Another solid cross by 9127 and 425V out of a first calf heifer with a great udder. Bolstered by his strong IMF score, 312A should sire wide bodied cattle with easy fleshing ability. They are the type of cattle that make Red Angus the cattlemen's choice for rebuilding our cow herd.

The first in a string of 1154 sons, 330A really exemplifies the long spined, cherry red, big hipped type that 1154 produces. He has a steady growth profile and superior carcass quality combined with a very eye appealing phenotype. His growth and carcass ratios shine across the board. He should excel in multiple areas. Whether you are retaining females or marketing on the grid, 330A has it covered.

Another soggy 1154 son. A person really appreciates what this sire group offers when one is able to look over the top of them and see the rib expression and sound conformation. They are really solid made with excellent carcass characteristics. This bull offers something a little different with one leg of WYE genetics in his pedigree.

333A is a well-rounded bull that I really like. I admire his moderate-framed, structurally sound dam. We were fortunate to pick off two Chandler 576 daughters from Ross several years ago. Both of them have displayed maternal strength with their excellent udder quality and the type of dimension and shape in a cow that we appreciate. Ross keeps trying to get us to sell them back, but we kindly decline.

Very good heifer bull from a 12 year old cow. I hope you like his daughters. You will have to look at them for a really long time!!!

Easy fleshing calving ease backed with the maternal strength of Troubadour and the easy keeping dimension and shape of 9127. A wicked good combination.

His numbers won't blow you away, but he is very steady from birth to yearling. Troubadour calves have a longer pattern early on and make for easy calving. The first females out of 0014 have calved and they have shown excellent udder quality, mothering ability, and are staying in good flesh. Research Troubadour 0014's pedigree and you will find another bull in our battery with unmatched production and longevity.

A calving ease bull that is a 3/4 brother to lot 52. We like the consistency that this bull has to offer as he started with a 98 BW ratio and stayed above average on his growth measurements the rest of the way through. Combine his high IMF score of 4.70, 107 ratio, his calving ease and the longevity that Troubadour has to offer and he should put a little change in your pocket for years to come.

I probably should have thought of a catchy name for a bull that will give you the ultimate peace of mind when calving heifers bred by him, but alas I have failed. Instead, I think the CED in the top 5%, BW top 1%, HPG top 6%, CEM top 29%, STAY top 29% and MARB top 30% can speak on his behalf.

This bull has a little more birth weight, but he more than held his own with a 631 lb. WW and 1164 lb YW with 104 and 105 ratios, respectively. Top 6% HPG and top 12% Stay make this bull a key cog in the building phase of our national beef herd. 331A has two pillars of his pedigree built around the great Bieber Tess 5166 cow. The females should be wedge shaped and easy keeping.

Small framed, easygoing, low maintenance are the biggest compliments I give bulls. 3030 has them all.

This bull brings a lot to the table with his EPD profile, carcass data and maternal longevity on both the top and bottom sides. His young dam has 2 calves for a 101.4 MPPA and she is a direct daughter of the great Mlk Crk Lakota 651 cow. 651 had 12 natural calves with a 103 MPPA before becoming a donor. 651's dam had 12 calves. Do I need to mention the maternal depth of the 1154 bull again? Briefly, his dam had 12 calves, grand dam 11 calves, great great grand dam 12 calves. This is the real deal in fertility. Build a sustainable herd with it.

You're probably tired of hearing about the exceptional maternal qualities of the 970 cow by now, but this guy is pretty cool. He is the result of a half sibling mating out of, you guessed it, direct progeny of the 970 cow. Consistency, perfect udders, fertility and longevity should be the hallmarks of this bull.

A long and powerful type of bull that stems from a highly fertile and productive cow family. The cow family is the same as the Enhanced 1154 bull. His EPDs may indicate otherwise, but we consider him marginal on heifers.

Ryan Cooksley at the Custer County Fair

2503, 2504 and 2501 are all full flush siblings out of our timeless 970 cow—our matron with fertility, longevity and maternal attributes. She is still in production and has never missed a calving opportunity, unless we held her open to flush. She has a 105.6 MPPA on 12 natural calves. Her dam has a 101.8 MPPA on 11 calves and her granddam had a 100.1 MPPA on 12 calves. 2503 has absolute calving ease, unmatched longevity and a phenotype that, quite frankly, kicks some major butt. Retaining 50% revenue sharing interest.
