

DAMAR FARMS

Sixth Annual

Bull Sale

Saturday, March 21, 2015

At the Farm • Mondovi, Wisconsin • 1 p.m. Sharp

Welcome!

Welcome to the 6th annual Damar Farms Bull Sale. The sale will take place at our Mondovi, WI farm on Saturday, March 21st and will also be broadcasted on DVAuction. Be sure to register with DVAuction before sale day so you don't miss out. All cattle will be on display at the Mondovi farm and videos will be available online before the sale.

Denise and Mitch Larson

At Damar Farms, we hold the highest standards of bull performance. To achieve our standards, we use the best genetics possible, and, year after year, have continued to improve our herd. We breed for the best calving ease, growth and carcass traits. We are extremely pleased with the bulls we have to offer you this year. As you look through our offering, you will see we have met our high standards yet again.

We kept all of our bulls in Wisconsin this year. Starting with 400 bulls, we knew at weaning it would be difficult to decide which bulls to keep. Ultrasound testing confirmed our choices. All of the bulls have been semen checked and are guaranteed sound. You can buy with confidence from this offering.

A big thank you goes to "Doc" Hehli for allowing us to keep working with the cattle here at Damar Farms. We also want to thank our crew whose hard work makes this sale possible.

Thank you for allowing us the opportunity to present and sell you our genetics.

We look forward to seeing you on sale day.

Mitch and Denise Larson

Want to keep receiving information about Damar Farms' upcoming sales?

Sign up for our mailing list at www.damarfarms.com or send an email to info@damarfarms.com. We're going paperless, so don't miss out! We promise to only email you the important happenings at Damar Farms. Be sure to join today!

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

“What impact will each potential sire have on my operation’s profitability?”

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.

HerdBuilder and GridMaster are expressed as differences in profitability per exposure.

HerdBuilder Example:

30 cows x 5 years breeding = 150 exposures

Bull A has a HerdBuilder Index of 175: $175 \times 150 = \$26,250$

Bull B has a HerdBuilder Index of 100: $100 \times 150 = \$15,000$

\$11,250 Difference in Profitability

View the Auction Live!
 Bid Online... you're ringside
 right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

The next 21 lots are our 18-month-old bulls born fall of 2013. We think this lead off bull of the 18-month-olds is "one of the best" bulls of the sale. His EPD data is top 7% for BW, top 20% for YW, and top 6% for marbling. His dam's MPPA is 111.1. He is deep bodied. He will be a great herd bull prospect.
