WELCOME

FLAT WATER GANG *Red Angus*

Welcome to the Cooksley, Birnie and Sandbur Ridge 6th Annual production sale. This is our 6th sale together and the 3rd as the Flat Water Red Angus Gang. We would like to extend our sincere thanks and gratitude to our customers and those that have expressed interest in our sale and programs. Over the years, we have developed many friendships and have enjoyed watching our genetics go out and work for our customers. The relationships we've built and the success that our clientele has experienced using our genetics are two of the most rewarding aspects of what we do. It is very satisfying watching our friends top their respective markets each year when they sell their steers and replacement quality females. Your success is important to us and we take our responsibility as a part of that very seriously.

The genetics being offered in the sale and the bulls that are carrying them are very deep in quality. Visitors throughout the summer and fall have been very complimentary in respect to the depth in the bull pen. Excellent bulls can be found all the way through the sale order. The bulls and their genetic capabilities are a representation of our philosophy, which is centered upon productive longevity.

That focus is on an all encompassing breeding program aimed at producing sound females that express long-term production in order to generate sustainable profits. This encompasses everything from structure, body type, udder conformation, disposition, calving ease, fleshing ability, fertility and carcass quality. Great cows make great bulls that in turn produce great cows. It is a never ending cycle.

As part of that philosophy, we adhere to responsible bull development programs. Our bulls are never offered creep feed and they are never pushed to achieve extraordinary gains. Slow and steady wins the race. Our development program is simple. The focus is on creating long lasting durable breeders. We grow them sturdy enough to get the job done and lean enough to want to.

Once again, the bulls will be sold live in the ring at the Valentine Livestock Auction and simultaneously on DV Auction. The bulls will be sold in catalog order. Videos of the bulls are available on our website and at dvauction.com. We are committed to offering as many means possible to accommodate your needs. Please call or visit in person as we are always interested in talking cattle. As always, we are dedicated to providing any information you may need in order to make these important genetic decisions. Your satisfaction and success are a top priority.

Thanks again for your interest and we hope to see you on sale day.

Best regards,

The Flat Water Red Angus Gang

Catalog and Promotion:

Tracey Koester, Cow Camp Promotions..... (701) 475-2736
www.cowcampromotions.com

Guarantee:

All bulls are guaranteed breeders and are guaranteed healthy on sale day. They will have passed a semen test and breeding soundness exam. Scrotal measurements will be available sale day. Bulls are guaranteed to be breeders during the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. Individual breeders will work with customers on a case-by-case basis concerning guarantees.

Delivery and Load-out:

We are offering free delivery to all points in the state of Nebraska. Delivery to other states will be at the lowest cost possible from the seller's base operation. Bulls not delivered by April 15 will incur a \$4 per day feeding cost thereafter. A \$100 credit will be offered for bulls taken home on sale day by the new owner.

Sight-Unseen Purchases:

We encourage you to utilize DV Auction, Inc. or Bill Pelton's conference call line as a means to facilitate your absentee purchases. However, if you are unable to use these services or are uncomfortable with them, please feel free to contact any one of the respective breeders or sale day contacts to accommodate your requests. Let us know your needs and budget range and we will work with honesty and integrity to help purchase the best possible bull on your behalf. If you are unsatisfied with the purchase, then you don't own the animals.

Terms and Conditions:

- The auctioneer will settle any bidding disputes and his decision on such matters will be final.
- All sales are cash in U.S. funds unless prior arrangements have been made with the sellers.
- Any announcements made on sale day take precedence over printed material.
- Health certificates will be furnished for shipment anywhere in the United States.
- Any death or injury after the animal is sold is at the buyers' risk.
- Anyone attending this sale attends at his/her own risk.
- A retained interest by the seller will be designated as such in the sale. The buyer receives full possession and full salvage value on all bulls with a retained ownership interest.
- All registered cattle sell under the suggested Sale Terms and Conditions set forth by the Red Angus Association of America.

WELCOME

FLAT WATER GANG
Red Angus

SANDBUR RIDGE RED ANGUS

Welcome to the Annual Flat Water Red Angus Gang Production Sale. Thank you to our past customers for your continued support and interest in our program and our offering. I would also like to extend a welcome to any cattlemen looking to us for the first time. If you have any questions regarding this offering please call me anytime at 402-843-8726.

Last year was the first year of developing our bull offering on a TMR diet, and we worked the bulls up to a 48 MCal ration. This marks the second year of using a TMR diet. However, we held the bulls to a 47 MCal ration. These bulls are not carrying the flesh of last year's offering, yet they display all the width of top and muscle expression you have come to expect from Sandbur Ridge bulls. The REA per 100 pounds, on the 66 bulls I developed, came in at 1.24 inches per 100. These bulls have the spring of rib, depth of body and chest floor width necessary to perform on less. These features will put money into your pockets for years to come through cheaper costs of gain on the feeder cattle and the ability of the replacement heifers to thrive on less desirable roughage.

We have an excellent offering of heifer bulls, the kind you can turn in and feel confident you will have very few problems when calving out next spring. There is a great selection of those moderate birth weight and higher growth bulls that can be used on heifers and then rolled up into the cows as the bulls get older. I also have a handful of those heavier birth weight bulls that will add pounds to your calf crop and leave you with those bigger replacement heifers that the market is paying top dollar for.

The focus of our program continues to be on building high quality, highly fertile, extremely functional and problem free females. Our cow herd has excellent udders, good feet, top fertility, can fend for themselves, calve on their own and they last a long time. I work full time, so those characteristics are paramount to my own success.

The dams of our embryo calves have stood the test of time and produced very well to earn a spot in our donor herd. The 3940 cow would be 20 this year, F7 would be 19, L489 would be 14 and 552 would be 10. These cows produced every year. Some breeders like to highlight their cow's age, yet they fail to mention that their 15 year old cow has a calving interval of 1,222 days. Ours donors have been proven. Since we only flush to cows that are proven producers, the EPDs of these cattle are not cutting

edge. However, the predictability of this offering is very high and the actual performance of the bulls will run with or pass several of the EPD multipliers. I cannot call those that multiply EPDs breeders.

When you look at the videos of the bulls you will notice white boards with black numbers on them in various locations around the video pen. The purpose of those boards was an attempt to give you some idea as to the size and potential frame score of our bulls. We have included a frame score chart in the catalog for you to reference as you watch the videos. I understand that this is not a perfect method but I hope it lends value to you as you look over our offering. Please let me know your thoughts on this so I can determine how to move forward.

Thanks again for your consideration. If I can be of any help please call me and if you are unable to attend the sale, we can assist you with several purchase options that do not require you to be in Valentine.

COOKSLEY RED ANGUS

First, I'd like to welcome you to the sale. It is an exciting time in the Red Angus business. High demand speaks to the quality of the breed and, most importantly, to the quality of Red Angus cows. This is our 25th year as a Red Angus breeder. We started out with 35 heifers from Jerry Teahon and a Coppertop Chief 301 son from Ole Redland. The base of our cows still trace back to those heifers and we are still using a Coppertop Chief 301 son from Buffalo Creek. Time has changed, but cattle that raise

calves and breed back while still producing a quality end product are always going to be in high demand.

We are in a transition from a fall-based herd to an April-calving herd. This change was made due to feed costs, labor and all of our kids in school activities. Calving January and February purebreds, and April and May commercials, while coaching basketball was not earning me any brownie points. As we continue to breed the heifers for April, our January-February bulls will be replaced by April 2-year-olds.

As for the bulls, they did great. They came through a cold winter and are hard and ready to go. Quality is good top to bottom. This is the first set out of a couple new herd sires and the fourth for a couple others. This is the first big bunch of Currency W118 sons we have let go. He has done a lot for us producing that moderate fertile cow with a perfect udder. This is the last set from Ram 802. He was one of those rare bulls with a perfect disposition that sired excellent bulls and females. Both bulls will leave a lasting impact on our commercial cows.

Thanks for your interest in Flat Water bulls. If you have any questions, feel free to call or stop by and see the cows in person. I always enjoy giving the ten-cent tour and talking about Red Angus cattle.

Cooksley Family

BIRNIE RED ANGUS

Greetings and welcome to another great ride with the Flat Water Gang. Thank you to all of our past customers for your continued support and trust in our program, and to all of you that have expressed interest in what we have to offer. Our family is honored to be a part of this group as they are close friends and family with a common goal of producing problem-free genetics that are devoted to the fundamental elements that the Red Angus breed is built upon. Those fundamentals focus on maternal and essential elements such as calving ease, disposition, fertility, longevity and fleshing ability. Cattle with these traits are reproductively sound and proven to be the most profitable.

Our breeding decisions are consistently based on the end goal of creating great females and productive cow families. It is that maternal principle that guides us. That focus combined with adherence to structural correctness from the feet to the udder and beyond has helped us build a cowherd that is adaptable and efficient. Our cows are not perfect and still have flaws, but we are constantly trying to improve upon our foundation.

We select for wide based, moderate framed cows with rib shape and depth of body. This is the type of animal that excels in our environment as they have the capacity and volume to convert forage. In our experience, females that lack volume and dimension are animals that are unable to forage effectively, balance their energy needs and ultimately fail to produce on a long term basis.

Our selection pressure both on type and kind in the cowherd and our bull battery continues to express itself in our ultrasound data. It is no surprise the cows and herd bulls with muscle and expressive rib shape produce animals with above average ribeye area. This crop of bulls average 1.257 inches of REA per cwt. In addition the group had an average IMF score of 4.45 and an average back fat measurement of .295 inches. Last year's bulls averaged 1.208 inches of REA per cwt, 4.458 IMF and .3384 inches of back fat. This group is leaner, but displays equivalent carcass quality.

Once again, they were developed with Sandbur Ridge's bulls. Ross and I visit about the bull development program every year and consult with our nutritionist to balance diets and help us achieve our target of 3 lbs. gain/ per head/per day. We accomplished this on a 47 Mcal NEg diet that consists of quality forage, distiller's grains and a minimal amount of corn. Due to the use of distiller's by-products, this diet is very low in starch grain, which allows the rumen to function as it would on native pastures, thus reducing or eliminating a "transition period." They are ready to go to work.

Our goal is to develop bulls that are structurally sound and durable so that they can work for a long time. Steady and responsible growth is good for the sound structural development and long term function of the bulls. We see no value in feeding a high-energy ration for a "test period" to measure performance. The only reason any breeder does that is to manipulate yearling weights, EPDs, and to boast of extraordinary performance. Is that true performance or simply a response to the feedlot diet that they

Birnie Family

are being fed? I believe it is the latter and not the former. Based on the demand for our customer's cattle at all stages of production, I can assure you that our cattle perform. Our bulls don't need to gain 5 lbs. per day to prove it. That kind of performance pressure on an animal, whose primary purpose is reproduction, is both irresponsible and disingenuous and ultimately leads to poor soundness.

We encourage you to look at the videos, research the pedigrees, and see the bulls in person if you can. Please contact us with questions about the bulls and the cows behind them. It is our responsibility to provide all the information needed to help you make the most informed decision to match an animal with your goals and philosophies. Thanks again for another opportunity to serve your genetic needs.

Retaining 1/2 revenue-semen-sharing interest in all of our bulls.

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- 1) Visit the DVAuction web site at www.dvauction.com
- 2) Click on the "Register" tab
- 3) Enter a user name, password and your contact information.
- 4) Click on "Apply for Bidding."
 - Select the sale from the list of other auctions and click "Apply".
 - Complete the process by filling out the Banking & Lending information requested.
 - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call (402) 316-5460.
 - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Sale Day Conference Call

Our goal is to have you in the seats but if you can't make it on sale day ,we're fixin' to get you "on the line!"

Easy as 1-2-3

1. **In Advance-** you call the breeder to pre-register your buyer number
2. **Prior To-** the sale you will receive an email or call from the breeder with the toll free conference call number, pin number, and instructions
3. **Sale Day-** at or during the sale time, you call the toll free number and enter your pin to be placed on the call.

The Ways You Can Buy

We are sincerely appreciative for those that are able to take the time to join us in Valentine on Sale Day as we enjoy visiting and building friendships, both new and old. There is no better way to assess the quality of the bulls and measure how they fit your criteria than viewing them in person. However, this is a demanding time of year for all of us in the beef business and sometimes circumstances and responsibilities dictate ability to travel. In order to accommodate, we have are providing an array of venues for you to utilize as you consider your purchases.

- Bill Pelton Livestock Conference Call Line. Bill has an outstanding reputation for his sale day conference call service. Utilize his expertise and call in live during the sale to make your purchases. Bill will communicate with you and have the attention of Scott Weishaar, our auctioneer, just as though you were sitting at the auction and bidding yourself. Follow the instructions provided on the previous page in order to pre-register and “get on the line.”
- DV Auction – Bid online from the comfort of your home or office. This is a renowned, safe, secure and professional service. Bulls will go through the ring during the sale with the pre-taped video of the bulls showing on DV Auction. Simply follow the instructions that are provided by DV Auction and pre-register at dvauction.com. Please try and pre-register prior to sale day.
- Sight Unseen Consultation and Purchases – Contact: Ross Knott (402) 843-8726, Paul Birnie (308) 870-3133 or Ben Cooksley (308) 872-1007 prior to the sale. We will consult with you about your program, the type of bulls you are looking for, the budget you are working with and do our best to match our bulls with your goals and criteria. It is important to us for you to be successful in your operation and we would like to earn your business and have a successful working relationship for a long time to come. If we bid on and purchase a bull on your behalf and you are not satisfied at delivery, you will not own him. Contact us prior to the sale and we can pre-register you with a buyer number.

Feeder Calf Certification Program

1. Make the call.
2. Provide special documentation.
3. Purchase tags.
4. Tag calves.
5. Fill out Enrollment Agreement.
6. Receive Certificate of Compliance (COC).

Redstone sons will be very rare going forward as there is little to no semen available. This will be the last year that any Redstone progeny will be sold in volume, so now is the time to take advantage. 403B shows incredible length of spine and thickness and is fortified with a great female producing pedigree. His dam did a great job on her first try. She is deep bodied, easy keeping and correct with an ideal udder. Most importantly, she calved on Feb 21st of this year. Highest IMF score in the sale at 6.54 for a 134 ratio. We would appreciate the opportunity to work with the new owner to collect and use this bull in our own herd. He is a natural fit for our 9127, 425V and Troubadour daughters.

This year's offering has some new blood lines, and Red Crowfoot Moonshine is one of those. This dark red, power house has all the components to make great feeder cattle and fantastic replacement heifers. His mother has a 101.7 MPPA and his grandmother is still in the herd and his great-grandmother produced 12 calves with a 100.1 MPPA. That longevity and the ME of a -10 makes this stud a real Herd Sire candidate. Retaining 50% semen interest.

Lot 3A

Lot 3B

**SELLING CHOICE OF
LOT 3A OR 3B**

If you are looking for cutting edge, just move on. If you are looking for fantastic herd bulls with the benefit of one of the very best cows I have ever owned, then pay lots of attention. These two full brothers have the potential to make anyone a fantastic set of cows and a great set of future herd bulls. The F7 cow produced 14 natural calves with a 93 BWR, a 100 WWR, and a 100.4 MPPA. Her first daughter, 863, produced 14 natural calves with a 94 BWR, a 104 WWR, and a 103.8 MPPA. 863 will calve this spring at 17 years old. 863's first daughter, 004 produced 11 natural calves with a 95 BWR, a 104

WWR, and a 103.8 MPPA. 004 will calve this spring at 15 years old. 004's daughter, 571, has produced 8 calves with a 92 BWR and 105 WWR, a 104.1 MPPA. She will calve this spring at 10 years old. I did not build this mating on a computer, this mating was built on the ground. I am selling one of these bulls and taking the other one home to use in my own herd. Its your choice. I would like to work with the new owner to collect semen on the bull that sells. **Retaining 50% semen interest.**

*Herd bull candidate!! This bull is sired by 5L Zodiac 372Z, another of our new herd bulls. This guy is a block of meat and guts. He has the REA and IMF to make fantastic feeder cattle. 4090 has the cow family and the volume to make the daughters that will be the envy of all your neighbors. His dam calved AI this spring, his granddam is still in the herd and his great-granddam has 11 calves to her credit and a 100.6 MPPA. You might be noticing that I do not spin generations to make cattle that seem great on paper. I keep the cows that do it year after year. These are the kind that keep us all in business. If you want to look at your bulls in the coffee shop on a piece of paper, I don't have anything very sexy. However if you want to look at your bulls in the pasture and see those daughters in production for years to come, well then I have exactly what you are looking for!! **Retaining 50% semen interest.***

Yeah, that's right, his name is Chuck Norris. It's not a misprint. My friend and neighbor, Chris, picked this guy early on and suggested the name. Here you go, Chris. The Redstone sons have proven to be our top sire group this year and 416B may display the most power. High end growth and strong carcass quality out of a beautiful young female with a perfect udder. He offers a lot of flexibility with his ability to push the scales and produce top females.

Heifer Bull with the performance to do it all. The first of the 9127 sons in this offering, 4408 is FANTASTIC!!! This might be starting to sound a little redundant, but 4408's great great-grandmother is still in production at 12 years of age and she will calve this spring, with a 105 MPPA. If you have a large heifer breeding project, why not buy this one and collect him. It will be cheaper than semen from those EPD breeders and i just bet ya the calves will be better!!

I really appreciate this bull for his makeup and balance in both phenotype and performance. He is very complete from his 78 lb BW (93 ratio) to his growth ratios of 109 and 107 and on through his scan data. IMF 4.80 (114 ratio) REA 14.84 in. (110 ratio). Moderate framed, with density and depth of body out a terrific cow family. His foundation Gr. Granddam had 12 calves at a 100.1 MPPA, Granddam is on schedule with 5 calves for a 99.4 MPPA and his dam has produced 3 calves for a 103.1 ratio.

My friend, Bruce, suggests a person has to sell his best bulls and let them go out and produce for people. My other friends, Larry and Ross, maintain a person can't build a great cow herd by selling his best stuff. Milissa says, "Sell him." See honey, I do listen! This is one my favorite bulls in our offering and has been since he was a month old. He has a great top, a thick quarter and flows smoothly from front to back. His performance, carcass data and EPD profile all compliment his type and make him a very complete bull. Look at his marbling number! 5.95 IMF, 122 ratio and Top 1% in the breed. He is another Redstone son that we would like to sample in our herd.

Look at the performance and carcass in this Herd Bull. A 205 day weight over 700, and YW over 1250. You might be wondering if the cow bred back. Well, she did and she has another dark red bull calf at her side with a world of potential. Here we go again, the grandmother, great-grandmother and great-great-grandmother are all still in production and have calved or are going to this spring. Hard to build great EPDs, but sure takes the guess work out of building great cattle.

Cow bull buyers take notice. This bull is amazing. He has the growth to sire those calves that will really push the scale down in the fall and the carcass to capture premiums. His 10-year-old mother has a 102.3 MPPA, his grandmother produced 12 calves with a 102.6 MPPA and his great-grandmother produced 8 calves with a 102.1 MPPA. You might want to keep all his daughters. They will be awesome.

Retaining 50% semen interest.

This is a lot of heifer bull. Long and stout with a 78 lb BW and then blowing up to a 719 WW - 117 Ratio and 1254 YW for a 110 ratio. He was three days shy of 320 days of age when we had our ultrasound taken, but his actual measurements were: 4.29 IMF, 13.90 REA and .33 Bfat. Want to have him scanned again and make it official? I'll pay for it. His sound dam has a 105.1 MPPA on 4 calves with an avg BW of 76 lbs. for a 97 ratio. He's legit.

419B has more shape than one is accustomed to in a heifer bull. He is wide bodied and deep ribbed with a thick quarter. Excellent growth and carcass quality out of great uddered young Troubadour daughter. Every Troubadour daughter we had bred back this last year. They're going to be a sire group to keep an eye on as they exhibit true calving ease, fleshing ability, soundness and fertility.

Troubadour X Tess = longevity, production and profits. This bull is loaded top to bottom with cow families that produce year after year. His sire has unreal cow depth behind him with 4 generations having 8, 13, 12 and 9 calves. The Tess cow family is renowned for being soft made and capacious with great udders. Put the pedigree depth to work for you.

Another standout Redstone son. 402B developed a case of pinkeye the month prior to weaning and it seemed to have set him back a little despite a couple doses of medicine. It's hard not to appreciate his EPD profile, in-herd ratios and carcass data. However, what I appreciate most is his easy keeping, tanky dam that calved again on 2-24-15. His daughters will have built in carcass qualities and essential maternal traits to pass on for generations.

The crowd favorite all spring, summer, fall, winter and now spring again. 9127 consistently passes on his type to his progeny, but this load is a robust replica. One really has to appreciate the muscle, dimension and rib shape that this bull has to offer. Off the cow or on the rail, his calves are going to be impressive and profitable. Biggest REA in our group at 15.63 in. for a 116 ratio.

We are really excited to offer our first set of sons out of Zodiac. Like this bull, they are powerful and sound with a lot of dimension and muscle. His granddam 515 was a donor cow in our program that produced 16 natural calves and 13 ET calves for us. She was moderate, deep and had a quiet disposition.

The more you study this bull, the more you appreciate his bold top, strong hip and wide base. Maternally prolific out of the same cow family as Troubadour. The reason these cows keep showing up in our pedigrees is because they last. If you bought lot 18 you should take this bull home too. Turn em loose and keep every heifer.

True heifer bull out of our outcross sire, Headliner and the Sheila cow family. We just talked about her. Productive longevity has more impact than any other economically relevant trait. 4116, like many other bulls in this sale, offers you the opportunity to breed it into your herd.

Is this cow family incredibly productive with longevity? Yes, yes it is. I do it by keeping females out of the cows that are problem free and calve every year and then mate them to bulls from cow families that do the same. We focus on the cow and cull anything that has a problem. Plain and simple.

This 1391 son has it all: calving ease, performance, and a great disposition.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Ranch Tested. Rancher Trusted.
