Jack – (701) 485-3206

Fellow Cattlemen & Women, welcome to our 45th Annual Sale!

There are three important factors that keep most of us in the cattle business. They are "PRIDE & "PROFIT" and for some it is "A WAY OF LIFE."

"PRIDE" goes from self respect to developing a very attractive herd of cattle. Self respect involves a person's whole life and is largely determined by God, birthplace, family and luck. An attractive cowherd is determined by one's knowledge of feeding or genetics or both. A successful cattleman will have both, "PRIDE" and self respect.

"PROFIT" is necessary to have both pride and self respect, and can be difficult to attain. For some, it is the only reason to be in the business.

"A WAY OF LIFE" or a love of being a cowboy – cowgirl or cowman – is the main element of staying in the business through both the good times and bad times.

At the Dahl Ranch, we feel that we have been fairly successful in the cattle business. It is a way of life that has been profitable enough for four families to have pride in what we do.

We were a commercial operation the first 20 years of being a family partnership and after using five breeds (Hereford, Salers, Black Angus, Red Angus and both Red and Black South Devon) and using them long enough to learn both the good and bad aspects of each, we have found that the most reliable and profitable cross is the Angus x South Devon.

That cross is called Poundmaker by the South Devon Association and

produces the following:

- Reliability
- Excellent beef consumer demand
- Increased weight
- More beef
- Profit with more heterosis
- Proven feed efficiency
- Mothering ability
- Great disposition
- Less grief

Sale cattle bunk management:

Our ingredients for the bulls' and heifers' rations were: ground hay (alfalfa, grass and oat/pea), modified wet distillers, corn and a mineral supplement.

Our goal of the ration for the bulls this year was for a 3.0-pound-per-day gain. They were started on a 46 MCal ration and gradually increased to a 54 MCal ration for the last 45 days.

Heifers were fed a 40 MCal ration that was increased to 48 MCal the last 45 days for an ADG of 2.5 pounds per day.

We did a 45-day feed test and we had six bulls that gained 5 or more pounds per day, with 23 bulls gaining 4 pounds or better per day.

It is our hope that you find the cattle offered at our sale to be to your liking. We stand behind our cattle and want you to feel assured that if you have any problems you can call and we will do all we can to help.

We sincerely invite you to join us on May 3rd.

Sincerely, The Dahls

Bull Credit

If you purchased females from us in 2015, you can receive a \$100 credit towards the purchase of a Dahl Land & Cattle LLP bull.

Yearling Bull Data

- 83 lbs. – Avg. Actual BW
- 694 lbs. – Avg. Adj. 205 Wt.
- 1138 lbs. – Avg. Adj. 365 Wt.

46% of the yearling sale bulls are considered calving-ease bulls.

Calving-Ease Code

- * Use only on cows
- ** Use on cows & heifers with a known birth weight and calving ease history
- *** Use on heifers and all cows

Our recommendations are based on our cow female histories for birth weights and calving ease. Also, with aid from EPDs based on our reference sires and the individual animal.

Bidding:

All animals sell to the highest bidder. Any disputes will be settled by the auctioneer and his decision will be final.

Mail and Phone Bids:

Mail or phone bids will be handled in strict confidence by us and we ask that they be in our hands in ample time prior to sale date.

Online Bidding:

The sale will be broadcast live on dvauction.com. For information on how to register to bid online, see page 8.

This sale will be broadcast live on the internet.

Terms:

Terms of the sale are cash or check, payable immediately upon the conclusion of the sale and before animals are moved.

Purchases and Risk:

We recommend purchasing insurance. A representative will be present sale day.

Announcements:

Any errors or changes of information printed in this catalog will be announced from the auction block and such announcements shall take precedence.

Breeding Guarantee:

All bulls in this sale are guaranteed to have passed a fertility examination by our veterinarian. The buyer of each bull will receive a certificate of such exam upon paying for the bull. We assume no liability, legal or otherwise, to make any further guarantee to the buyer. No other warranty is expressed or implied.

All heifers will be ready to breed. We will preg check and evaluate the heifers so they will be guaranteed open.

Liability:

All persons who attend this sale do so at their own risk. Dahl Land & Cattle LLP and Napoleon Livestock Market assume no liability for any accidents that may occur. Neither do they assume any liability for loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God.

Herd Veterinarian:

Ashley Vet Clinic

Health:

All cattle in this sale are in excellent condition and health. All females have been officially calfhooed Bangs and Preg-Guard Gold 10 vaccinated. All shots and treatments comply with the ND Beef Quality Assurance Program and Pfizer's Beef Friendly program. Where needed, health certificates will be furnished for shipment anywhere in the U.S. Sight Unseen Purchases are fully guaranteed for soundness and quality.

Contract:

The above terms and guarantee constitute a contract between buyer and seller of each animal sold.

Bull Delivery:

- Free delivery to neighboring states on bulls selling for \$10,000 or more, or on volume purchases of four or more bulls.
\$50 discount if you take your bull home sale day
If you cannot take your bull(s) home sale day we will feed him (them) for one week at our feedlot at no charge, buyer's risk.
If you cannot pick your bull(s) up there will be a \$3/day feed charge per head.
We will cooperate with delivery wherever possible.

South Devon

A TRUE GENETIC OUTCROSS

SOUTH DEVON IS A TOTAL OUTCROSS FOR ALL ANGUS AND RED ANGUS GENETICS AND ALL OTHER ENGLISH AND CONTINENTAL BREEDS

MORE BEEF, LESS GRIEF

South Devon cattle are well-known for their quiet, docile nature. Producers throughout the country are finding South Devon is the ideal breed to use in a crossbreeding program, where temperament may be a problem.

PROFIT-MAKERS

Profit-driven, cow-calf operations looking for increased fertility, high weaning weight production and increased calf value can benefit from South Devon genetics.

F1 CROSS AND HYBRID VIGOR

South Devon is the best British breed cross breeding option. The breed has been proven to keep Angus marbling, adds to muscularity and increases carcass weight.

FEED EFFICIENCY

In the feedlot, lower feed intake and carcass merit are a compliment of the South Devon breed. Bulls on test at Midland Bull Test and Leachman Cattle of Colorado have shown less feed intake resulting in more efficiency on gain, thus resulting in more profit.

ADAPTABILITY

South Devon cattle have shown remarkable adaptability, thriving under vastly different climatic conditions.

TENDERNESS

Meat Animal Research Center (MARC) data indicated that steaks from South Devon-crosses have lower Warner-Bratzler shear force values than all other beef or dual-purpose breeds. Also, taste panel tenderness, flavor and juiciness scores tended to be higher for South Devon steaks.

Groups 1 & 2 (Purebred South Devon and Red Angus) will start the sale. They will be selling individually.

Group 1: South Devon Purebreds (5 head)

Group 2: Red Angus Purebreds (5 head)

Commercial Yearling Heifer Offering

Commercial heifers will be sold at a minimum of five head gate cut. On bigger drafts, the buyer of the last heifers in the ring (should there be a cut made), will have the option to take the remaining heifers of that group for the same price.

Group 3: 5 Head South Devon Purebred heifers (Daughters of 1100, 337 and 338)

Group 4: 5 Head Red Angus Purebred Heifers (Daughters of 139, 2180 and 680)

Group 5: 10 Head 75% Red Angus Heifers (Daughters of DLC Ole 1191)

Group 6: 10 Head Black-Hided Red Angus x Salers F1s

Group 7: 20 Head Red Angus x Salers F1s

Group 8: 30 Head South Devon x Red Angus x Salers Heifers

Group 9: 40 Head South Devon x Red Angus F1s

130 Sale Heifers

Avg. BW – 74 lbs.
Avg. 205 Wt – 654 lbs.
Avg. 365 Wt – 896 lbs.

Yearling heifers will start the sale!

All heifers are:
Bangs Vaccinated • PregGuard 10 • Poured with Ivomec
Preg checked guaranteed open and ready to breed.

They are ready to go to pasture and breed!

EPD NOTES

Expected Progeny Differences (EPDs) give cattlemen a useful tool with which to evaluate the genetic potential of breeding animals.

The printed EPDs in this catalog have been furnished to us by the Red Angus Association of America and the North American South Devon Association.

EPD Breed Averages for Non-Parent Animals Under 2 Years of Age (Spring 2016)

This is the behind-the-scenes force that keep the cattle moving through smoothly on sale day. (L to R) Gary Reed, Jay Reed, Ben Bowman, Andrew Dosch and Jeff Bowman.

Red Angus Pro-Cow

Pro-Cow is a tool used by the Red Angus Association of America to identify replacement-quality females. Only females enrolled in the FCCP will be eligible to be labeled as Pro-Cows, therefore ensuring at least 50% Red Angus bloodlines.

How to label females as Pro-Cow:

- Enroll calf crop in the Feeder Calf Certification Program (FCCP).
- Purchase 99-cent Pro-Cow tags or have the Pro-Cow logo imprinted on your FCCP tag.

RedAngus.org • (940) 387-3502

South Devon Guide to EPDs

Courtesy of the North American South Devon Association
For more information on EPDs, visit southdevon.com.

Birth EPD (pounds) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

Weaning EPD (pounds) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 205 days and for age of dam. This EPD is the best single estimate of an animal's genetic merit for growth to early ages.

Yearling EPD (pounds) is calculated from the weight of progeny taken between 301 and 450 days of age, adjusted to 365 days and for age of dam. This EPD is the best single estimate of a sire's genetic merit for yearling weight.

Scrotal Circumference EPD (centimetres) is calculated from measurements of scrotal size in yearling bulls, adjusted to 365 days. Scrotal circumference is a good indicator of puberty, fertility and semen quality/quantity. Increased scrotal size will also result in decreased age of puberty in daughters and greater lifetime production. Positive EPD values indicate larger scrotal circumference.

Milk EPD (pounds) is an estimate of an animal's milking ability. For sires, this EPD indicates the effect of the daughter's milking ability, inherited from the sire, on the weaning and yearling weights of her calves. For dams, it indicates her own milking ability.

Maternal Weaning Weight EPD (pounds) is a combination of Milk and Weaning EPDs and estimates the genetic merit of the animal to produce a calf at weaning.

F1 steer calves born in April and weighing 626 lbs. off the cow with no creep feed, have sold at the market top the past five years.

Red Angus Guide to EPDs

Courtesy of the Red Angus Association of America
For more information on EPDs, visit redangus.org.

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Ranch Tested. Rancher Trusted.

Watch & bid online for **FREE** at

DVAuction
Broadcasting Real-Time Auctions

View the Auction Live!
Bid Online... you're ringside
right at your desk!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

5119 is a thick, stout-made, double-black, polled son of Romeo, out of a gentle, thick-made granddaughter of the multi-trait leader, Royal Lad 21. Lot 38 gained over 5 lbs. a day on test. He ranks in the top 10% of the breed in Milk, MWW and YW. He is also in the top 15% for WW. Efficient, thick, fast-growing and quiet cattle are stacked in this guy's pedigree.

TOP DOLLAR ANGUS®
Now adding value to both Angus and Red Angus feeder calves

Capture premiums by giving your calves the name recognition they deserve!

Should you consider Top Dollar Angus certification for your calves? Absolutely – YES!

If you've consistently invested in high-performing Angus or Red Angus genetics, we can make your calf crop stand out from the pack, and give you access to the Top Dollar Angus premium calf-buyer network, regardless of how you market your cattle (local auction, video, or direct trade). Our goal is to bring more demand to your doorstep.

Moving ahead in 2016, the beef cattle business offers both challenges and opportunities. Lower feeder calf prices underscore the need to capture value-added premiums. Every cow-calf producer with high-end genetics and a solid health program wants to sell their cattle above the average market price, which is exactly why Top Dollar Angus was created.

Top Dollar Angus is a genetic certification and marketing company focused exclusively on the best Angus and Red Angus-influenced feeder calves in the industry. Qualified calves must contain at least two generations of Angus or Red Angus genetics with growth and carcass traits ranking in the top 25% of their respective breed.

Red Angus sires that have a GridMaster Index in the top 25% of the breed or higher meet Top Dollar Angus specifications. Look for the Top Dollar Angus designation on sale lots in this catalog!

This new program is similar to Certified Angus Beef®, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market. It works by certifying calf crops that meet program requirements on the farm or ranch, enabling these cattle to be marketed using the Top Dollar Angus brand name and logo. Top Dollar Angus feeder calves are eligible to receive a \$50 per head premium (sometimes more) over the average market when sold to partner feedyards. One group of Top Dollar Angus steers sold

recently via video auction for \$67 per head above the average market for their weight and location. Another group was forward-sold for a \$52 per head premium. Yet another single load of Montana steer calves beat the market by \$57 per head.

Why are so many profit-minded cattle feeders interested in purchasing Top Dollar Angus calves and yearlings? It's because these cattle perform very well both in the feedyard and on value-based grids. Top Dollar Angus cattle consistently deliver rapid growth and high quality grades. That puts extra dollars in cattle feeders' pockets, which are passed back to cow-calf producers in the form of premium prices.

For more information, please contact Tom Brink at **303-478-4331** or email info@topdollarangus.com.

Purchased from Leachman Cattle of Colorado, Deniro is an efficient, profit-producing sire. His feed efficiency and profit ratings are passed on to his progeny. 024 ranks high in the GridMas-ter and HerdBuilder Indices as well as in calving ease, marbling and REA traits. 024 has turned out to be one of the easiest calving sires we've used. He sires moderately framed, thick, fast-growing cattle with great feed efficiency. All the sons in the sale are out of first-calf heifers - none of which required any assistance.

We purchased 338 from MJB Ranch because of his exceptional birth-to-yearling spread. He is sound and well muscled, and passes those traits on down t his offspring.

Romeo sires cattle with explosive growth, muscle pattern and efficiency. He has a great foot structure and temperament. His first daughters calved this spring and they seem to have plenty of milk and great udders.

Ryder sires calves w1Sith style. We purchased him from KNN South Devons in Bay City, Wis-consin. He showed well in Denver and now sires long-sided, thick-topped, heavy-quartered and great-moving calves. He is a great dispositioned bull to boot. He has excellent EPDs across the board and is an outcross bull four our herd. His females look great and we are excited to get them into production.

2138 is one of 55T's best sons. We've used him both our purebred and Poundmaker programs. He sires a little more frame and cattle that are clean made, stylish and have good feet. His daughters have excellent udders. His dam is a South Devon Hallmark Cow.
