Selling

**80 YEARLING BULLS
45 COMMERCIAL HEIFERS**

Thiessen's REGENCY ACRES

Welcome to the 2016 Regency Acres annual production sale.

It is our pleasure to invite you to be our guest on Friday April 1st for lunch at 11:30 A.M. with the sale to follow at 1 P.M. Coffee and doughnuts will be available throughout the morning while you browse through the bulls and heifers. As always you are welcome to stop by the ranch anytime before March 31st to look through the cattle. We would be happy to show you the bulls and the cows behind them.

First and foremost we would like to thank all past customers for their support of our program. Without you none of this would be possible. Nothing says more about a business, whether it be a ranch or store, than repeat customers. We would also like to welcome new and future customers. It's always a pleasure to meet many fellow ranchers.

Regency Acres has been raising registered Angus for 59 years. That's 59 years and 3 generations of education and experience. The definition of experience is being able to recognize a mistake when you make it again! While I haven't been in the business for 59 years, a wealth of knowledge has been passed down. It seems like the first thing to get passed on is what NOT to do. We learn from our mistakes and also from our forefathers mistakes. With this in mind the program will continue to follow our mission statement: To propagate genetics that will return the most dollars per acre for our customers. To do that we are producing an animal that is thick, deep, long bodied, and heavily muscled while balancing the maternal traits of calving ease, ease of fleshing, high quality udders, structural soundness, and intelligence.

The bulls selling were developed on a 42 Mcal high roughage ration designed for a 2.75 lb gain. This allows the bulls to develop and grow at their own pace without causing structural damage. They have been freeze branded, carcass ultrasounded, fertility tested, and given two rounds of foot rot vaccine and wart vaccine. The heifers are also freeze branded and will have their yearling shots prior to the sale.

Thank you for taking time to review the catalog. We look forward to seeing you on April 1st.

Russ, Jill, Tea and Tyler Thiessen

Guarantee

Regency Acres is providing a first-year breeding season guarantee on all bulls selling for \$2,500 or more. Breeding season is defined as the 90-day period following turnout. All injured bulls must be diagnosed by a licensed veterinarian. Helpful Hints for Care of Herdbulls ...

Having herd bulls adapt to the environment they will be in is very important to the success of a breeding program. Whenever possible, the bulls should be fed the same type of forage they will eat in the breeding pasture for a minimum of two weeks before turnout. Their rumen operates with little bugs to break down the diet and different forages each have their own little bugs. About two weeks is the time required for the rumen to adjust to a different diet. When a bull is turned out, he isn't thinking much about eat-

ing, so any advantage that you can give him will be beneficial to younger bulls.

Another trick for having a virgin bull ready is what we call "Jump-starting." If you have a cow or a heifer around that is cycling, put the bull with her. If he seems disinterested, put another bull in with the cow for him to observe. This should trigger his brain. When the bull appears interested, let him in and remove the other bull. Make sure a bigger bull doesn't start whipping on him, or that could defeat what you are trying to accomplish. It is rare that this procedure is necessary, but it is good insurance and, once the bull gets a taste of what his job is, he will be ready for those heifers.

When breeding season is finished, a reconditioning program for yearling bulls is good as they change their teeth at 18 to 24 months of age.

Uncommon was the high-selling bull in the 2010 Sitz fall sale and was admired by many as the most complete Angus bull to come along in a long time. This is a bull that will put the jump muscle back into the breed. He will sire extra capacity, length and volume. Uncommon daughters are absolutely pleasant to be around. They are quiet, nice uddered, easy calving, moderate framed, and have great maternal instinct.

When evaluating lot 1, you will be hard pressed to find any holes in him. He provides the perfect balance of all traits: length, muscle, thickness, volume, calving ease. What really stands out is the hoof and leg structure of this calf. His Z79 dam is double bred to the Regency donor Erica Lass P55. Herd bulls from this cow family include RA Identity Z79, RA Spectre X1, RA Rubicon Z38, and RA Alliance V130. Take note of his ultrasound data. He flat scanned his eyeballs out.

In what may be the longest bull in the offering, lot 2 definitely packs a punch. Heaviest weaning weight bull, second heaviest yearling weight bull. He has a quiet disposition and an eye popping rump on him that will make the girls go nuts.

Sale Directions:

Thanks for Coming!

The common **CENT**  decision.

ANGUS SOURCE® or **ANGUS SOURCE**® Genetic +  **GMX** GENEMAX Focus = **\$uccess**

1. Use registered Angus bulls
2. Enroll in **AngusSource** or **AngusSource Genetic** to verify your calves are sired by a registered Angus bull.
3. **GeneMax Focus** test one-third of your enrollment group. Use the results to further validate the genetic quality of your calves on the Marketing Document.

 Successful programs are built on a Common Cent  approach. They utilize data and technology from the **American Angus Association** to produce the highest quality feeder calves and replacement females in the marketplace.

ANGUS makes *Cent* .
