Friends,

Welcome to our 28th Annual Production Sale.

This year marks our 45th year of breeding Red Angus Cattle and the 100th anniversary of the ranch which was homesteaded by Mel's father, Tony Leland, in 1911.

We're again happy to include a strong offering of 18-month-old bulls from Koester Red Angus which provides an age-advantage option. In addition, we are offering a few Red Angus/Simmental F1 Hybrid bulls.

2010 was a near-perfect growing season for us as we were blessed with a warm, dry April and a wet summer with abundant grass and hay production.

Our sale offering is influenced by 11 years of carcass ultrasound evaluation as well as several progeny carcass evaluations by customers who have retained ownership through harvest. This reflects a market benefit for our buyers when the industry recognizes Leland Red Angus genetics as a positive influence. In addition, we again congratulate those producers who have capitalized on this value with many receiving attractive premiums.

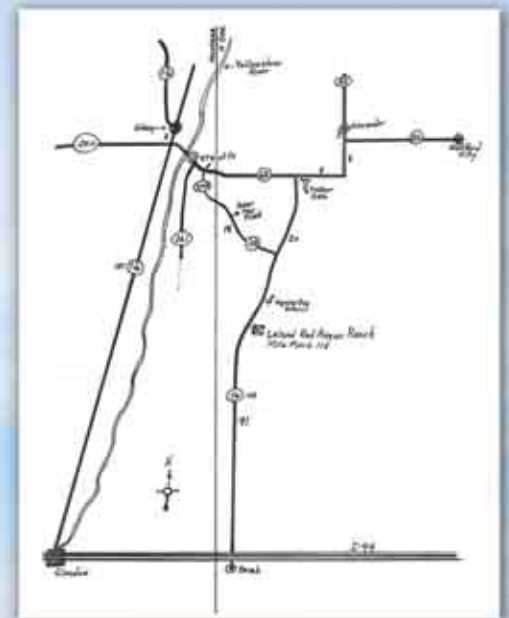

Our program continues to emphasize quiet, manageable dispositions, a convenience trait that we guarantee.

We're always happy to assist our customers with selections or special needs and guarantee confidentiality and lowest bid on any sight-unseen purchase.

*Best wishes from all of us at
Leland Red Angus & Koester Red Angus*

**IMPORTANT CHANGES RELATED TO UNDERSTANDING
NEW MULTI-BREED EPD EVALUATIONS**

This is the first year that Red Angus and Simmental EPDs were calculated using the same model. This attempt to identify breed traits in comparison with another breed is a first for our industry. Because there are some significant changes in the EPDs and to adjust to this new concept, producers need to evaluate the EPD as it correlates with the corresponding breed rank until we can mentally adjust to these newly appraised values.

DVAuction Broadcasting Real-time Auctions

We are pleased to offer the Leland Red Angus Sale broadcast "live" over the Internet through DVAuction Services.

First Time Users:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab.
- Complete "Registration" and "Applying to Bid" at Leland Red Angus.
- Please view the tutorial available on our home page for bidding instructions.
- Proxy bidding is available before sale day and during the auction.
- You will be assigned a buyer number once you purchase.

We will be contacting your bank to verify information.

DVAuction will contact you to let you know that you have been approved to bid and buy at the sale "live" from your computer at home.

After the sale:

- Contact Leland Red Angus for delivery or pickup and payment arrangements.

Note: You must have high-speed internet access (DSL, T-1 or Broadband) to be able to bid during the sale. Any questions: Contact Tami with DVAuction at (308)-870-3661, tmcintosh@dvauction.com.

We recommend that you register by March 10, 2011, for on-line bidding. Every attempt will be made to complete your application even if it is on sale day.

GENERAL INFORMATION

FRIDAY, MARCH 11, 2011

Sale will begin at 1:00 PM MST.

LUNCH

A free noon lunch will be served on sale day.

TRANSPORTATION

Sidney is served by Great Lakes Airline. We will meet planes on request.

ACCOMMODATIONS

Sidney: Sunrise Inn, (406)482-3826
Lone Tree Motor Inn, (406)433-4520
Park Plaza Motel, (406)433-1520
Richland Motor Inn, (406)433-6400

Beach: Buckboard Inn, (701)872-4794
Outpost, (701)872-4717
Westgate, (701)872-4521

Watford City: McKenzie Inn, (701)444-3980 • 1-800-842-3989
Roosevelt Inn, (701)842-3686 • 1-800-887-9170

MAIL & TELEPHONE BIDS

Bids will be handled in strict confidence by any of the publication representatives or the Ranch. Capabilities to bid by phone on sale day are limited. To do so, please make prior arrangements to participate on a conference line. Bidders may also log on to DVAuction.com to bid online. Please see additional information on Page 1.

HEALTH

All the bulls will have a general health and fertility examination by sale day and will be cleared for interstate transportation. Scrotal measurements will be available on sale day. All heifers are bangs vaccinated.

FERTILITY

Yearling and 18 month old bulls will have a breeding soundness evaluation and semen test. Yearling heifers are guaranteed open and breedable.

DELIVERY

Free delivery to central points up to 500 miles. Balance at cost. Heifers in load lots or by arrangement. We will cooperate in any way to assist in deliveries of greater distance or by private arrangements and volume purchases.

DETACH AT THE PERFORATION

Celebrating 100 Years – 1911 to 2011

The Leland Ranch was homesteaded by Melvin's father Tony Leland in 1911. He ran Hereford-based cattle, summered Mexican steers and, at one time, had sheep along with some farming.

He married Mary Link, a local school teacher, and they had three children – Howard, Melvin and Helen.

Tony died in 1948 leaving Mary with three young kids, a ranch and tough times during WWII. She sustained the ranch with hired help until 1952 when she married Ted Folkvord.

Ted operated the ranch until Melvin and Luella took over in 1966 with the introduction of Red Angus at which time it became Leland Red Angus Ranch.

Mary & Tony Leland married in 1941

(acc)	58	78	73		72		55		55	11	50	47

Red Direction sires long, thick-patterned progeny with moderate frames, calving ease and excellent carcass values that rank him in the top 4% for marbling and 15% for REA in the breed. We've used him successfully on first calf heifers and his first daughters in production are easy fleshing with correct foot and udder structure. As Red Direction matures, he continues to exhibit exceptional muscling and a very mild, manageable disposition. Notice his high breed rank in calving, maternal and carcass traits. His bulls had an 84BW, 717WW(100) average and heifers had 75BW, 664WW(100) this year.
 Co-owned with 5L Red Angus. Semen available.

Co-owned with ABS and a breeder syndicate, Norseman King has proven himself as an outstanding female producer who ranks very high in carcass traits. His progeny are easy fleshing and his influence is often found in the pedigrees of popular sires. His bulls posted an 86BW 748WW(105) average and heifers 79BW 619WW(95) this year in our herd.

TOP %	98%	99%	1%		1%		90%	4%	64%	32%	25%	7%

We purchased this grandson of Norseman King out of a strong 104.4 MPPA cow because of his promising growth, maternal and carcass qualities. His is a solid footed bull that consistently sires high performance progeny including many of our top selling bulls last year. Although, he has no daughters in production to prove it, his milk EPD changed from +20 to +8 because of a genetic correlation effect built into the prediction model. Because T22's WW and YW are extremely high, the model dictates a reduction in milk EPD. We expect his milk EPD to improve once his daughters are in production. His sons have an av. of 89BW 769WW(106) and heifers were 83BW 692WW(104) this year. Note his high breed rank in several traits. *Co-owned with 5L Red Angus.*

Right Direction was our high selling bull in 2009 for \$33,000 to Broken Heart RA and Barenthsen/Bullinger RA. Newly developed DNA testing later revealed he was an OS carrier, so we repurchased the bull and are testing his progeny to identify OS free animals. OS free animals will not pass OS on to their offspring. Although we have a limited offering this year, we are delighted with his calves and will have a larger offering next year. He continues to be phenotypically impressive and posts an average of 87BW 720WW(100) on bulls and 84BW 685WW(103) on heifers this year. Notice his top breed rank on several traits.

This year's offering of MTN RAM progeny includes a sizeable number of impressive 18 month old bulls from Koester Red Angus. MTN RAM has historically had good calving ease and respectable growth. Moderate mature size and easy fleshing ability are characteristic of MTN RAM progeny. Progeny averages on this year's spring born bulls is 82BW 631WW(92) and 74BW 604WW (92) on heifers.

Mimi 7044 is a strong performance, calving ease bull from a 105MPPA cow. This cow family consistently rises to the top. Used exclusively on heifers he has proven his calving ease with his bulls having an average of 74BW 728WW(101) and heifers with 64BW 634WW(98), duplicating the same pattern of last year's progeny. Expect length of body, good foot and udder structure as well as calving ease from this sire. Notice his high breed rank in most of his traits.

This small offering of Beef Maker R13 Simmental progeny is a direct result of requests from several of our volume, longtime commercial customers who have developed a high percentage Red Angus cow herd. Beef Maker was our choice of Simmental bulls to develop these F1 SM X RA bulls because of his homozygous polled, non-diluter qualities that complimented the calving ease, growth, maternal and carcass performance traits of our Red Angus Program. These hybrid bulls were ratio'd with our Red Angus which gave them a WR advantage. Cowmen will appreciate the strong performance potential these bulls have to offer. The bulls had an 84BW 797WW(110) average and the heifers had 79BW, 727WW(108) in our herd. *ABS Sire.*

Red Native is a Scottish born bull from Genex that we sampled to see where our cattle and genetics fit in the global picture. Red Native's EPDs are obviously not correlated well with US EPDs and only partially exhibit a meaningful comparison. The Red Native progeny in this offering indicate lower BW and more moderate growth but may prove to have merit in the calving ease, maternal effect and carcass end for the future.

Red Angus Feeder Calf Certification Program Tag Voucher

Age and Source verify your feeder calves free or at minimal cost to increase potential for premiums in the Red Angus Feeder Calf Certification Program.

Leland and Koester Red Angus Ranches will help you with this easy process.

1. Call Red Angus Association at 1-940-387-3502 and ask Mikalena to enroll your calves.
2. Calves sired by Leland and Koester bulls qualify for the FCCP and Red Angus will invoice the cost of the tags to us at the rate of one bag of 25 tags per bull purchased in 2011.
3. If additional tags are needed, they can be purchased by the bag for 99¢/tag but must be used only in calves that qualify for certification.
4. The FCCP tags are serial numbered at the bottom leaving space on both the front and back for additional ID numbers desired. This is the lowest-cost system in the industry to USDA Age and Source Verify your cattle.

BUD SPERRY

July 3, 1941 – March 18, 2010

“There is no possession more valuable than a good and faithful friend.”

Our family dedicates our sale this year to the memory of Bud Sperry. Bud suddenly passed away six days after our sale last year, leaving a large hole in our hearts and lives.

Bud was a loyal friend, a good neighbor, a mentor to many young cowboys and cowgirls, a long-time brand inspector and, above all, a true cowboy with a quiet, real faith in God. He raised a lot of the good Quarter Horses that we’ve ridden over the years and he was often an important part of our round-up crew. His favorite jobs were those done horseback, and he asked nothing more than to live the life-style he loved, for a good horse to ride and time spent with Marcia, his family and friends.

Here’s to you, Bud! Ride easy, Dear Friend!

WHAT ABOUT BIRTH WEIGHT and CALVING EASE?

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions:

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on the birth weight of her calf.
3. The bull has 30-40% influence on the birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf has 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over 1 pound per day in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the heifer influences calving ease.

At Leland Red Angus we would also include the following observations:

Most commercial producers do not take birth weights. Guessing is as inaccurate as driving with a broken speedometer - what’s thought to be 55 mph may in fact be 65 or 70 mph, and what’s

Birth weights are taken with two people on all of the calves born at Leland Red Angus to maximize accuracy. We believe in accurate measurements and accurate reporting. At no time are weights ever estimated.

thought to be 70-80 lbs. may actually be 80-90 lbs.

Remember, everything is relevant. Increased growth, frame and performance will increase BW. A longer bodied calf will likely weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after.

As a rule of thumb, it takes a calf weighing 85 lbs. at birth to finish at 1200-1250 lbs. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus, a 1200 lb. cow should give birth to a 96 lb. calf with ease.

Calves weighing 80-90 lbs. have a better storm survival rate than 60-70 lb. calves because of body mass.

Continued selection for light birth weights will ultimately reduce the mature size and performance of your cattle.

As we research effects of BW at Leland Red Angus, we found that after the cold, prolonged winter of 1996, birth weights increased 6 lbs. over 1995 with no ration difference. In addition, 10% of our bulls were from identical matings, yet the birth weights averaged 15 lbs. heavier than their full brothers in 1995.

CARCASS ULTRASOUND

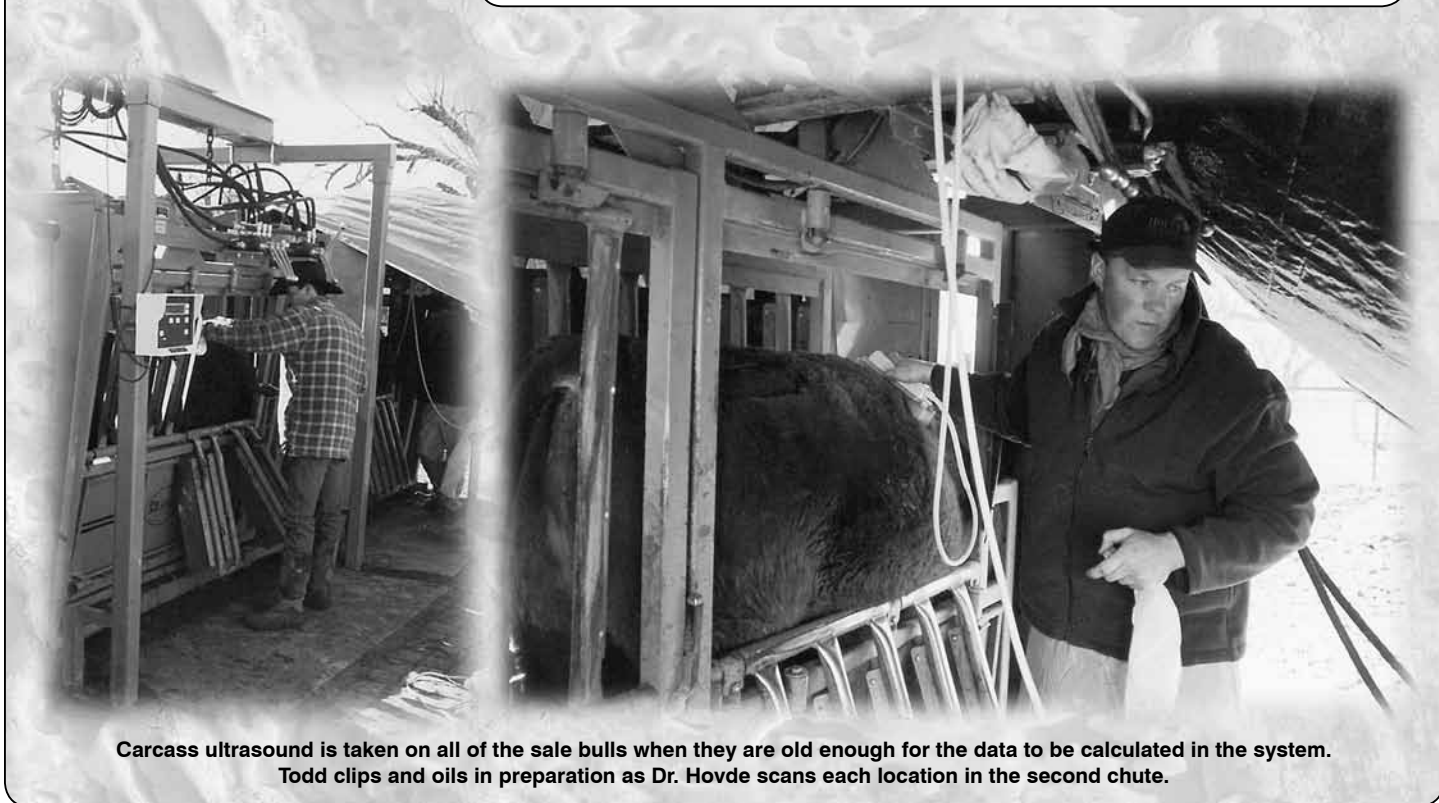

This is the 11th year we have used ultrasound technology to evaluate carcass characteristics. Weather permitting, we will have carcass ultrasound information available on all bulls just prior to the sale that can be accessed on our web site. This information will be available for our customers upon request and more importantly it will be used for more meaningful genetic evaluations in the future as it contributes to carcass EPDs.

Carcass ultrasound is taken on all of the sale bulls when they are old enough for the data to be calculated in the system. Todd clips and oils in preparation as Dr. Hovde scans each location in the second chute.

INTEREST RETAINED

Several bulls will be sold as interest retained and full possession selling. This means purchaser buys the bull for what he bids and gets 100% possession and 100% resale value of the bull when he sells him. It does give Leland Red Angus the option to collect, use and market semen from the bull and does not restrict purchaser from doing the same. This collection, unless agreed otherwise, would be done at the expense of Leland Red Angus and at the purchaser's convenience. Leland Red Angus would assume full liability for the bull's welfare at the purchase value during transportation and collection unless it is a joint venture with the purchaser. In such a case, liability would be proportionately assumed.

SCROTAL CIRCUMFERENCE MEASUREMENTS and FERTILITY

All bulls will have a breeding soundness evaluation and semen test. Scrotal measurements are taken at 10½ to 11 months of age and adjusted to 365 days of age. Scrotal measurements and frame score will be available sale day.

Lot 1, Leland Fire 35X

We'll start the sale with a performance sire that seems to be doing everything right; ranking high in growth, maternal and carcass traits while posting a moderate BW. His maternal sister produced a very useful replacement heifer as a 2 year old with a 74BW 721WW(112). His maternal pedigree includes an ancestry for performance that is hard to ignore.

Selling ½ interest and full possession.

Lot 2, Leland Fire 82X

Performance minded cowmen will want to look at this bull, a growth leader in the breed who is also maternally strong with exceptional carcass potential. His dam has a 107 MPPA and this bull is proof of that ability. Firebrand T22 (Ref Sire D) is our highest performance sire, so this bull's numbers pretty well predict his potential. **Selling ½ semen interest and full possession.**

Lot 3, Leland Sakic 33X

This heavy weaning Sakic son is produced by an elite looking cow with super udder structure. Likewise, Sakic comes from a correct uddered cow. With this bull's high maternal rank, he might be a good choice as a replacement female sire. His only brother sold to Northern Lites Red Angus, MT in 2009.

Selling ½ interest and full possession.

Lot 4, Leland Ben 208X

Produced by a 102 MPPA cow with a breed leading milk EPD, this bull has a combination of good traits to offer. His dam, MGD, MGGD all have first-class phenotypes and udder and foot structure. Two maternal brothers also add to his producing value with their 813WW(108) and 756WW(106).

Selling ½ interest and full possession.

Lot 5, Leland Ben 12X

Cowboys should like this high performance bull. He comes from a great cow family with super udder structure. His dam produced a bull selling to Willis Williams, WY. Maternal sisters have all been kept for replacements. A daughter of one sells as Lot 542 this year. His dam has always calved 1st cycle.

Selling ½ interest and full possession.

Lot 7, Leland Fire 110X

This long-bodied Firebrand T22 son leads the breed ranking for growth. Backed up by proven bulls in his pedigree like, Chateau, King Rob, Monu 2X and Cowpoke, this bull shouldn't be a disappointment. Ray Walter, WI, Willis Williams, WY, John McCrory, ND and Weston Dvorak, ND have all purchased maternal brothers who had an average BW of 81 lbs.

Selling ½ interest and full possession.

Lot 8, Leland Sakie 80X

There's good reason for this power bull to join the front end ranks of the sale order. Expect good daughters and excellent performance from this bull. His elite dam and generational pedigree promise great udder and foot structure. Maternal brothers have sold to longtime customers Raymond Saunders WY, Burdell Johnson ND and John McCoroy ND. **Selling ½ interest and full possession.**

Lot 19, Leland Red Direction 65X

It would be hard to overlook this complete rascal whose dam is rapidly rising to the top with a 104 MPPA. She produced a fancy Cold Sign daughter last year as a 2 yr. old heifer who had 80BW 714WW(108) and sold to Arcadia Land & Cattle, Oklahoma. The thick easy fleshing ability of Red Direction will likely make this bull an attractive choice. He's backed up by Highlight 807 and Tassel Rob 78E who were both thick meaty sires.

Selling ½ semen interest and full possession.

Leland Fire 9256W, Paternal brother to Lot 20

Ranking in the top 1% of the breed for WW and YW with a top 3% TM puts this high performance bull in elite company. Especially considering he ranks high in carcass and maternal calving ease as well. His sire is among our top performance bulls ever and compliments his dam's quiet disposition and foot structure.

Leland Right Direction 8242, sire of Lot 22

A complete bull offering growth, milk, maternal calving ease, stayability and super carcass potential. Females, with good trait scores dominate his pedigree.

Lot 23, Leland Red Direction 253X

A moderate BW, calving ease bull who has a top breed rank of 1% IMF, 3% Milk, 4% CEM and 7% TM and above breed average on the rest. A maternal sister raised Lot 145 with 80BW 733YW(112) and an outstanding breed rank across the board including exceptional CEM and IMF in the top 1%. His dam has a 102 MPPA. **Selling 1/2 interest and full possession.**

Lot 24, Leland Fire 130X

This solid performance bull with powerful genetics from Major League, King Rob and Monu 2X is mixed with Firebrand T22 to achieve consistent predictions across the board and ranks especially strong for growth traits. He also comes from a cow family stacked with good foot and udder structure.

Genetics for Generations

At Koester Red Angus, we focus on optimums, not maximums, to produce cattle that are balanced in all traits. We strive to develop efficient, maternal cattle that combine performance, structural soundness and phenotype from the moment their progeny hit the ground until they hang on the rail.

The bulls were fertility tested early February. The scrotal measurements are the actual measurements taken that day.

The harshness of the winter affected this calf crop's weaning performance. Since weaning, the bulls seemed to have caught up and we do not believe the actual weaning data on this set of bulls is a true depiction of what their offspring's performance will be.

The Koesters:
Steve, Tracey, Kacey and Shaye

Lot 36, Leland Beef Maker 53X

This first hybrid bull in the sale comes by his performance naturally. His dam produced a 78 BW 715WW(115) heifer as a 2 year old followed by a Firebrand T22 son with 85BW 748WW(102) 1355YW(110) who sold to Raymond Saunders, WY last year. Look at his top 1% breed rank for growth, maternal and REA! It's no wonder his dam has a 109MPPA. A maternal sister produced Lot 18 this year as a 2 yr old heifer with an amazing 848WW(117). He looks like a herd bull. **Selling ½ interest and full possession.**

Lot 37, Leland Beef Maker 197X

A maternal sister to this bull has a 105MPPA and produced the high performance Lot 74 this year. Last year as a 2 yr old heifer she raised a bull with 70lb BW 783WW((108) 1304YW(102) who sold for \$5750. A maternal brother to this hybrid bull by Destination sold last year for \$6000 to Raymond Saunders, WY having 88BW 750WW(109) 1262YW(104). This bull's dam has a 102 MPPA. Look at his breed rank for REA, milk and growth.

Leland Red Direction 8348, maternal brother to Lot 38

Cowmen looking for a high performance, hybrid RA X SM bull will want to take a good look at this bull. His dam has a record of 703WW(104) on 8 calves including a 767WW(104) 1324YW(107) bull last year as well as a 78BW 694WW(104) 1248(110) Red Direction son selling for \$7500 in 2009 to Sandhills Red Angus, MT. In addition, his dam has always calved 1st cycle. Notice the high breed rank.

Produced by an old cow who just doesn't make mistakes and continues to calve early at 12 years of age even with a top breed rank for milk. Good foot and udder structure should be inherent with this bull by Red Direction whose daughters are very good. Bob Schettler, ND, Willis Williams, WY, John McCoroy, ND and Richard and Debbie Burr, ND have bought maternal brothers. All of her daughters have stayed in our herd, including the dam of Lot 42.

Leland Red Robin 9040, Dam of Lot 52

This high weaning bull is from the maternal sister to Herdsire I, Leland Destiny 7060. He should produce flawless daughters with great udders. A maternal sister produced Lot 80 this year who ranks in the top 4-20% of the breed for nearly every trait and went from a 64BW to 781WW, a growth spread hard to duplicate.

Lot 71, Leland Norseman 138X

Look at the performance from the first bull to sell from this young Major League daughter! He has outstanding WW and super carcass values all supported by a cow family with perfect foot and udder structure. His MGD will come with her 11th calf this year and has produced several good sons. Two maternal sisters to this bull's dam have been outstanding producers, each having bulls selling from \$2500 to \$5500.

Selling ½ semen interest and full possession.

This bull was raised in a contemporary group that summered on dry land range but had a month of fall grazing access to crop regrowth on rented pasture. Consequently, his heavy WW but below average WR reflects better conditions than the home contemporary groups had.

Leland Red Direction 8316U, Maternal brother to Lot 80's dam

Heifer bull buyers, take a good look! This bull ranks high in the breed for BW and calving ease but doesn't give up anything on performance, carcass or longevity. A maternal sister to his dam produced Lot 55 and has a 103 MPPA. Her high performance sons have sold to Steve Macdonald, MT and Bill Bertram, ND. The birth to WW and YW spread on this bull is hard to duplicate, especially with all other traits so well balanced.

Leland Cool 9047W, Paternal brother of Lot 81

This is a powerful Cold Sign bull that displays a nice breed rank for growth, maternal and carcass traits. His young dam raised a 709WW(107) heifer last year as a 2 year old which justifies her strong 105 MPPA. She continues the great udder structure tradition established by the Leland Highlight 3050 daughters.

Heifer bull plus! Here's great calving ease potential in a bull that comes from a cow whose heaviest BW was 80lbs and that calf was sired by a heavy BW bull. This bull is definitely an outlier who ranks high for calving ease and BW but still has high growth, maternal and stayability. His dam has very noticeable trait scores with sons selling to Chris Wasem, ND and Ray Walters, WI. She has a 101 MPPA.

This moderate-framed, stout, dark-red bull will sire some great feeder cattle and leave some very functional females. His dam posts a 103.2 MPPA.
Frame: 5.3, SC: 37.0 cm.

KOESTER RED ANGUS

Lot 107 - Koester Roy 937

This bull is backed up by a great female. The Highlight-Chateau combination has rarely failed us and the 3084 female posts a 102.4 MPPA. 937 is a stout bull that will sire some profitable feeder cattle. **Frame: 5.9, SC: 39.5 cm.**

HRR Integrity 457, Maternal Grand Sire of Lot 117

If you like 79lb BW, take a look! His dam has had 79BW on all 3 of her calves and all are out of different sires. He's a super heifer bull prospect with extraordinary trait scores on all of the females in his pedigree. His MGD is the mother to herdsire Leland Highlight 3050 that is now in Jack and Ted Smith's herd in IA. Notice the breed rank of this bull in many traits.

Leland Big League 6026, MGS of Lot 118 as a calf

Produced by a 2 year old heifer and line-bred to the outstanding Major League 502, this bull should make a reliable heifer bull. His MGS, Big League 6026, with a 110WR 116YR sold to Carroll and Davi Nelson, MT. Expect calving ease, growth and maternal value from this bull.

This bull is the result of testing a total outcross sire, Red Native F207, who comes from Scotland. Mated to this cow with outstanding growth performance of 106WR and 112YR, it is very evident that low BW and calving ease are the major attributes Red Native can offer. We must recognize that there is marginal opportunity for Red Native to have a positive impact on EPDs since he is foreign to the current Red Angus data base. He should be a good heifer bull.

This heifer bull is definitely an outlier for growth and is produced by a 2 yr old heifer. He combines the calving ease benefits of Rim View and Red Direction with his MGD, Leland Squaw 8257, who consistently shows up in performance pedigrees having raised 5 sons who have nearly a \$5000 sale average. A maternal sister to this bull's dam produced a calving ease Cold Sign son that we are using in our program. We have significant respect for this kind of cow family that perpetuates itself in every trait. **Selling ½ semen interest and full possession.**

This is our only bull selling this year out of a Trend Setter daughter. These Lorenzen Advantage sons, all out of first calf heifers, are hard to ignore because there were 11 head, and they all made the sale order posting a 102NR and low 74lb. average BW. This is a significant milestone for a young unproven bull when compared with proven sires.

Leland Fire 9002W, Maternal brother to dam of Lot 136

There's a long line of great cows behind this bull to support his well balanced data. A maternal sister to his dam produced one of our top bulls last year selling to Wedel Red Angus,KS. His MGD was phenotypically elite. MGGD likewise is one of our best. She's produced bulls, selling between \$4250 and \$5000 to customers like Arne Skedsvold, ND and Bob Schettler, ND. Look at this bull's top 1% breed rank for IMF with high scores across the board. His dam has a 102MPPA. **Selling ½ semen interest and full possession.**

Another low birth weight, calving ease bull whose maternal pedigree is structured that way for several generations. His sire's 74BW av. on bulls and 64BW av. on heifers helps confirm his reliability for calving ease.

This positive carcass bull is high in marbling and is certainly acceptable in growth, calving and maternal values. Cold Sign 6337 is a sire that is moderate for growth and is consistently moderate for BW.

This bull was orphaned at a young age and barn-raised when his mother died of apparent hardware disease. Consequently his pre-weaning performance data is irregular. His MGD produced the high performing Lot 2 this year.

We recommend cows only for this bull because of variable BW in his pedigree. Although 100WR suggests herd average for weaning, a 712WW on a British bred animal without creep or preferential treatment off dry land range hardly indicates average performance!

HEIFERS

These heifers were wintered on a high roughage ration. They are penned in comparable groups but will sell individually. All heifers will sell as registered unless stated otherwise or announced from the block. They are all bangs vaccinated and guaranteed open.

North Dakota Geographic Tour

Educators and teachers throughout North Dakota visited Leland Red Angus Ranch as a tour stop to learn about ranching and lifestyles in Western North Dakota. It was a privilege to host this enthusiastic group and exhibit true ranching culture as well as stewardship of the land and livestock as it compliments natural ecosystems.

Terms and Conditions

- BIDDING DISPUTES:** The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.
- TERMS:** The terms of the sale are cash. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released.
- PURCHASER'S RISK:** Each animal becomes the risk of the purchaser as soon as sold. Insurance will be available sale day.
- CERTIFICATE OF REGISTRY:** A certificate of registry and transfer will be furnished for each animal sold as a registered animal, after settlement has been made.
- ANNOUNCEMENTS:** Changes of information contained in this catalog relating to the animals offered for sale will be announced from the auction box and such announcements shall take precedence. Errors discovered in the catalog will be corrected by announcement at sale time and such corrections will take precedence over the printed matter in the catalog.
- BREEDERS' GUARANTEE:** All bulls are guaranteed to be breeders. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event a bull is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition and complying with the health requirements of the Seller's state. The Seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the Seller shall be obligated to replace the animal with another of equal value or to refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the Seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense.
- SELLER'S SEMEN RIGHTS:** Seller reserves the right to keep a breeding interest in any bull so designated in the catalog or during the auction. In the event Seller elects to collect semen from a designated bull, it will be done at Seller's expense and during such time when purchaser is not using the bull for breeding.
- IDENTIFICATION:** Each animal carries a readable tattoo.
- LIABILITY:** Neither owners, sale manager, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damage of any kind.
- CONTRACT:** The above terms and conditions shall constitute a contract between the buyer and seller of each animal sold.
- IMPLIED WARRANTY:** Except for those stated in the terms and conditions, there are no warranties or implies, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and condition are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

Red Angus Recordation

Registered

Category 1A

- Must be 100% Red Angus out of registered Red or Registered Black Angus.
- Must have recognized weaning weights.
- Must be red in color.
- Must have no white forward of the navel or off the underline.
- Must have no scurs or horns.
- Must have red pigmented skin.
- Exact birth date must be provided.

Category 1B

- Must be at least 87% Red Angus.
- Must have recognized weaning weights.
- Must be red in color.
- Must have no white forward of the navel or off the underline.
- Must have no scurs or horns.
- Must have red pigmented skin.
- Exact birth date must be provided.
- Must have specific identifiable sire and dam.

Recorded

Category II

- Animals 87% to 100% Red Angus that do not conform to one or more 1A or 1B requirements.
- Birth year required.
- Progeny of Category II eligible for 1A and 1B if all requirements are met.
- Category II can include disqualified 1A or 1B cattle such as ineligible white, scurs, horns, black pigmentation and multiple sires.

Category III

- Animals that contain less than 87% Red Angus blood.
- The percentage of blood of all breeds represented in Category III animals will be printed on registration certificate.
- Progeny of Category III are eligible for Category II or 1B providing requirements for these specific categories are met.
- Birth year required.
- Multiple-sired cattle qualify only at the lowest level of Red Angus blood in sires used (DNA exception).
- Foundation animals at exact percent Red Angus blood only when ancestry recordation provided.
- Progeny of foundation dams registered only when foundation dam is registered.

NOTE: Each registration certificate will specify the exact percentage of Red Angus blood.
