WELCOME

As I reflect on the last year, I realize just how many obstacles have been presented to us. We have dealt with areas of the country in severe drought, hurricanes, range fires and family tragedy. I think about those things and I realize just how lucky we are that we are involved in the agriculture community. The support from our fellow cattlemen is second to none. How many people with a "real job" drop what they are doing and spend time harvesting your crop or working your cattle when tragedy strikes? We are fortunate that the ranching community is still a close-knit group that even though we are competing against each other in certain aspects of our business, we also realize that our way of life wouldn't be the same without our neighbors and friends that we have made. We have been blessed to call many of you friends and look forward to meeting those of you whom we don't know. One thing in life is certain and that is that there is always change. The droughts don't last forever, neither do the wet conditions. The cattle industry is constantly changing and every year we are faced with more decisions to be made.

This year we made the choice to HD 50K test about 50 head of the sale offering. For more information on that, please read the next few pages in the catalog. We are always trying to find ways to make our sale offering more appealing to you our customers. The heifers that are offered in this sale are very hard to part with. As in the past, we are offering all of the 2012-born registered females in this sale. You should take advantage of this offering as it will be the last. It has been a hard decision to part with all the heifers every year and an even harder decision to decide not to offer all of them next year. Don't get too excited. We will find a way for you to get a pick out of our herd, but we feel that we need to reserve some of our genetics to make sure they are doing the jobs that we say they will, and

Steph tends to get a little sentimental about some of them, too! The bull calves are changing every day. The last couple weeks you really notice the change in them as you walk thru the lot. They don't look like just calves anymore!

The sale will be held at the Ramada Inn via video. We will display the cattle at the ranch the days prior to the sale. You are more than welcome to stop anytime between now and then to look over the offering. If you are flying into Aberdeen and need transportation to the ranch, please give one of us a call. We encourage you to come out and look over the cattle prior to the sale. If you are interested in bidding on cattle we suggest that you should have your top pick and then an alternate or two as the cattle will be located 20 miles from the hotel site.

We invite you to spend the day and evening with us even if you aren't interested in purchasing cattle. We have had many comments on whether you should bring your wife or children to the sale. This is a FAMILY event and we have it at the hotel to help encourage you to bring your entire family. There will be a few display booths for the women to browse over, the hotel has a pool for the kids to swim in and who doesn't enjoy a dance?

All of us have been faced with challenges over the past year and sometimes it isn't as easy to pick the pieces up and keep moving, but we invite you to come to our sale, spend time with the people that have the same interests and celebrate the fact

that we are involved in one of the best industries available. We know you are busy, just as we are, but you just never know what tomorrow will bring, so don't miss this opportunity to spend it with your friends and families. The sale will be broadcast via DV Auction.

Merry Christmas and we will see you in Aberdeen, S.D., on New Year's Eve!

The Lazy J Bar Ranch
Crew,

Watch & bid online for FREE at **DVAuction**
Broadcasting Real-Time Auctions

**View the Auction Live!
Bid Online... you're ringside
right at your desk!**

Buying online is as easy as 1,2,3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

DEVELOPMENT, VACCINATION RECORD AND DELIVERY ARRANGEMENTS

The bulls and heifers were pasture weaned on an AccuRation/corn mix and grass. They stayed at the ranch until Oct. 10 when they were brought home and put on a TMR ration consisting of ground hay, corn silage, earlage and a liquid protein and Rumensin supplement. All the calves have been vaccinated, starting at birth, again at grass turnout, weaning and post weaning. Vaccinations include 7-way, clostridial type A, IBR, BVD, PI3, BRSV, mycoplasma, haemophilus somnus, pastuerella and Dectomax injection this spring, and Dectomax Pour-on this fall. If you would like specific dates and details on the products, please give one of us a call.

The bull calves were weighed on Oct. 26 and again on Dec. 8. The average weight on Dec. 8 was 877 lbs. with an average gain of 3.47 lbs. per day. The bull calves will be sold as guaranteed breeders according to the RAAA sale terms and conditions. We will keep all bull calves free of charge until March 1, 2013, at which time they will be semen tested and delivered or picked up. You can arrange to continue having the bulls fed at a rate of \$3.50 per day with all bulls needing to be delivered by April 1, 2013.

The heifer calves have been brucellosis vaccinated and will be sold as guaranteed breeders according to the sale terms and conditions of the RAAA. Open heifers need to be picked up or delivered by Jan. 10, 2013.

Deliveries will be coordinated to the least possible cost to the buyer. If you are not hauling your own cattle, we will collect trucking fees at time of purchase settlement. Delivery will begin Jan. 2, 2013, on females, and March 1, 2013, on bulls. If you are bringing a trailer and want to haul for others, we will gladly line you up with trucking in your direction at the fee structure below. We will offer the first 1,000 miles trucking on every animal at the following rates.

1-4 head @ \$0.25/mile/head
5-9 head @ \$0.20/mile/head
10 head or more @ \$0.15/mile/head

All animals will be handled at the buyer's risk. We highly recommend insuring your purchases.

Lazy J Bar Ranch will reserve the right to retain 25% semen interest on all of the bulls offered in this sale.

WELCOME

Welcome to the New Year's Eve Extravaganza!

It is incredible how fast time flies but it is again time for the close of the Kyle Gilchrist Auction Tour 2012 and the start of 2013 – the New Year's Eve Extravaganza! This is one of the most power-packed auctions of the entire season with top-quality cattle in both bull and female classifications. John and Steph have one of the best Red Angus herds in the country and are always progressively investing in one or two of the top Red Angus bulls every season. From the \$51,000 UBAR High Capacity 224, an interest in the \$77,500 Mojito bull from Denver, to their newest acquisition last spring in the powerful \$21,000 OHRR 58R Global Trust 39X, their intense level of breeding top Red Angus genetics exemplify one of the most progressive Red Angus operations on the scene today.

To further enhance the Lazy J Bar Ranch "cutting edge" progressiveness in breeding Red Angus cattle, about 50 head of the 2012 calves in the offering have been evaluated by Pfizer and the RAAA using the HD 50K test and the first herd on the Kyle Gilchrist Auction Tour to utilize this latest technology in identifying superior animals. If you haven't been to a New Year's Eve Extravaganza yet, get December 31st on your calendar for one of the most fun Red Angus events to happen all year. Whether you are

shopping for top Red Angus females to build and/or enhance your program or a top-notch herd bull, this auction will deliver the quality to move your Red Angus breeding program forward.

I will be through the cattle on December 29th and 30th, and would be glad to share my evaluation with you. Feel free to give me a call. I look forward to seeing all of you in Aberdeen, S.D., and ring in the New Year with the "Red Angus family!"

Happy Holidays!

Kyle Gilchrist

NORTH AMERICAN JR. RED ANGUS EVENT
NAJRAE
JUNE 19-22, 2013 Kansas State Fairgrounds, Hutchinson, KS.
WWW.JRREDANGUSSHOW.COM

SHOWS:
Owned Heifers, Bred & Owned Heifers, Steers, Bred & Owned Bulls, Commercial Heifers, Futurity Show & Showmanship

EVENTS:
Public Speaking, Quiz Bowl, Herdsman Quiz/Equipment ID, Photography, Livestock Judging, Sales Talk, Fitting Contest & State Herdsmanship

ENTRIES:
You can find entry forms and more information on our website www.jrredangusshow.com or join us on facebook.

All Red Angus heifer calves purchased on this sale with the LZYJ prefix qualify for the 2013 NAJRAE Futurity Heifer Show. Last year's Champion Heifer received \$1500 and the Reserve Heifer received \$1000. The remainder of the Futurity funds were split among all participants, which was \$90 per entry in the Futurity Show.

PRIVATE TREATY
SHOW GOAT PROSPECT SALE

Watch our website, lazyjbar.com, for our April show wether and doe prospect sale.

Kale showed the Champion Breeding Doe at the 2012 S.D. Summer Spotlight (Purchased from Nebraska Boer Goats).

Amanda Galbreath of Steele, N.D., showed the Champion 4-H Market Goat at the 2012 N.D. State Fair (Raised by Lazy J Bar Ranch).

50K DNA TECHNOLOGY

We were contacted by Pfizer Animal Genetics in late October notifying us that the Red Angus Association of America (RAAA) and Pfizer had come to a mutual agreement to 50K test Red Angus cattle. After much contemplation, questions, scratching our heads, consulting with Larry Keenan and others at RAAA, we decided to test some of our animals offered in this sale. We were especially interested in testing the full ET sibs as they are just given an average of the parental EPDs until they have offspring registered to them. We wanted to give you the most accurate data we could. The 50K testing incorporates DNA technology into the EPDs and improves the accuracy of that EPD compared to a calf with no progeny registered to him.

We knew at testing time that it was going to be a tight schedule to get the results by catalog print time. The RAAA worked diligently to get the 50K data incorporated into the calves'

EPDs. The calves you see with the 50K blue circle by the pedigree have been tested and the 50K test is reflected in the EPDs you see in the catalog.

HD 50K

The 50K test also evaluates traits such as tenderness, Dry Matter Intake (DMI) and Residual Feed Intake (RFI) that are not noted in the catalog. This info will be available on sale day.

We know you will have questions about the 50K tests and someone will be available sale day to answer your questions. In the meantime, please call one of us or Larry Keenan at RAAA, (940) 387-3502, for answers. We can't thank the RAAA enough for all of the long hours and hard work that went into incorporating the 50K DNA technology into the pedigrees in time for our catalog to make it to the printer.

Lazy J Bar Ranch Crew

 Pfizer Animal Health

Nothing is more dependable for early prediction of genetic potential.

The reliability of Red Angus Association of America (RAAA) EPDs has now reached new heights. Through a mutually beneficial agreement between RAAA and Pfizer Animal Health, Red Angus stakeholders now have the option of incorporating High-Density 50K (HD 50K) DNA information into EPD calculations.

Through combining genomics, pedigree and RAAA performance records backed by nearly two decades of Total Herd Reporting data, Red Angus stakeholders are provided with the most reliable genetic predictions in the beef industry. EPDs with increased accuracy through addition of the genomic data provides for greater dependability in predicting the genetic merit of young, unproven cattle, and enhances the scope of selection for difficult, time-consuming and hard-to-measure traits.

The HD 50K information will be simply incorporated into RAAA EPD cal-

culations and will be identical to information gained from an animal's own performance or progeny's performance, providing more accurate EPDs sooner in an animal's life.

By enhancing EPD accuracy values in young cattle, Red Angus stakeholders can make their selection decisions with more confidence in the reliability of an animal's EPDs. HD 50K information, when integrated into RAAA EPDs, provides the most accurate and complete picture of an animal's genetic potential enhancing selection, mating and marketing decisions to accelerate genetic progress and expressed productivity.

HD 50K technology is the dependable industry standard for boosting accuracy values in young animals. The technology uses more than 54,000 DNA markers and is benchmarked against 7,900 Red and Black Angus animals to measure 13 economically important traits and to verify parentage.

To learn more, visit learncattlegenetics.com, pfizeranimalgenetics.com or contact your Pfizer Animal Health representative.

HD 50K

Profit \$implified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed’s genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals’ EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It’s important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

This awesome Mulberry heifer was calf champion at the S.D. State Fair Red Angus Show. She is easy on the eyes and has a pedigree to back her up. You have the choice between taking her or Lot 2 home as we are selling choice on these animals. These two heifers may not pair up in the pen quite as well as the other choice lots, but they are definitely two head that should NOT be leaving our herd. We will be retaining future flush rights in this heifer at our expense and your convenience. 2201 has been 50K tested.

John says that this knock kneed, pot bellied piece of crap shouldn't go home with anybody... so do you believe him yet? In all reality, she is his favorite heifer and he is starting to regret his decision to offer all of the heifer calves born each year. I was wondering how long it would take him to come to that conclusion. Her dam has been one of John's favorite cows and a top producer for him originating from the Sodak herd at Reva, S.D., and out of the High Capacity 224 sire we thought so much of. Take your pick between Lot 2 or Lot 1 - only one is going home with you. We will retain a future flush in this heifer at our expense and your convenience. 2103 has been 50K tested.

Lazy J Bar was Premier Red Angus Breeder at S.D. State Fair

OPEN HEIFERS - U PICK 'EMS

GROUP 2: LOTS 3-4

Lot 3

Here are two more heifers sired by High Capacity 224 that should be staying here at the Lazy J Bar Ranch. They are deep-bodied, sound, broody heifers that will go on to be top producers in the years to come. They come out of two of Steph's favorite cows. The dams to these cows have been good to us over the past 10 years. One of them originated in the Campbell herd and one was a bred heifer I purchased from Ed Artz. I would take a whole herd of these heifers if I had the chance. They have great dispositions and it is really hard to tell you which is my favorite because I like them both the same. We will retain future flush rights in both heifers at our expense and your convenience. Both heifers have been 50K tested.

OPEN HEIFERS - U PICK 'EMS

GROUP 3: LOTS 5-6

Lot 5

These twin heifer calves are just outstanding especially when you stop to think about the fact that they were out of a first-calf heifer, both raised by the heifer and she is bred back to calve this spring. They offer a balanced set of EPDs across the board. Take one of these girls home on sale day but good luck picking which you like better. They are similar in body type but one may be a little darker red. 210 and 211 have been 50K tested.

2215 is a stylish, long and deep-bodied heifer that has plenty of bone. Her dam is owned with Jeremy Skoglund and when she brought home this sweet-looking heifer we decided that she should be offered in our sale. Her dam originated here then was purchased by Berg Red Angus as our top-selling heifer in the 2006 sale and was shown. John thought so much of her that he bought her back at the Great Northern sale a couple years later. Ed Olson was here the other day and he had to look this heifer over a couple of times. She definitely catches your eye when you scan over the pen of heifers. You only get to pick one either Lot 7 or Lot 8 - Good Luck!

Faye is another stylish High Voltage heifer calf out of a New Trend dam that has adequate volume and plenty of femininity. The day this calf was born John's comment was that she would be a future donor dam candidate. She was shown this fall and did well in her class. We will retain future flush rights in this heifer at our expense and your convenience. 284 was 50K tested.

Sage is a sound, broody female with adequate bone and plenty of width about her. She is a complete package – eye appeal, pedigree and carcass numbers. Don't let this girl slip by – she could be in your donor pen. She is in the top 25% in seven traits and out of a dam with a 104.0 MPPA. What more could you want? 202 has been 50K tested.

Bridget is a heifer that goes back to some of the most progressive Red Angus programs in the country. Where could you go wrong in a heifer out of a dam with a 104.8 MPPA and foundation greats in the pedigree like Norseman King, Brown Vacation and King Rob? This heifer has plenty of growth potential with a weaning ratio of 112. 204 has been 50K tested.

Tynlee is one of those heifers that you will want to take home with you. She is sired by High Capacity 224 – what more could you want? She is a dark-cherry-red heifer owned by Kale and, rumor has it he needs a little cash to make another heifer purchase. If you are looking for the complete package – moderate birth to high growth with plenty of maternal power – here she is. She is a Category 2. 237 has been 50k tested

This has been one of my favorite heifers since birth but then when you realize who her sire is, it doesn't surprise me. The High Capacity calves are always stand outs in our herd and due to flooding in the spring of 2011 when we were Aling cattle, we were forced to move cattle to pasture in a hurry and abandoned our AI mission so don't wait for more of these – I think this is the last one in this year's offering.

Miss Kitty is a stylish heifer out of Copperqueen and High Noon. What more can we say? She is a long-bodied, big-boned heifer with plenty of eye appeal. She was part of our show string at the S.D. State Fair. If you take a closer look at her, you will see she has a scar right in front of her udder as she was caught in a hay feeder as a calf. She will be guaranteed, so don't worry about a little blemish or, I would prefer if you didn't take her home sale day. She has an awesome disposition and is tame as a kitten for any junior to show. She offers an awesome set of EPDs across the board. Co-owned with Jacobson Red Angus. 2209 has been 50K tested.

It is no surprise to me as I looked up this heifer's pedigree that even though her granddam was purchased from Campbell's, she goes back to an Ed Artz cow. I can't say enough about what Ed Artz has done for our program. Talk about a former Red Angus breeder that didn't get near enough recognition throughout the years. His best kept secret was his good 'ole mama cows and we were just lucky enough to have purchased several of them throughout the years. You can talk numbers all day long, but a cow that has the EEA prefix in her background is going to be functional in any herd. 2132 has been 50K tested.

Not too little to help

Now did you look at the MPPA of her dam? It is a 112.7, and it doesn't surprise me at all as this heifer goes back to my all-time favorite Artz cow, not to mention she is out of one of John's favorite cows on the sire side. Did you see the weaning ratio of 127? Like I said, her dam just puts it all to her calf and always has since she was a first-calf heifer. We will retain a future flush at our expense and buyer's convenience.

2154 is a heifer calf that gets overlooked a little bit because of her age but we think she would be a heck of a cow and could compete if you threw a halter on her. She comes from a dam with a 109.5 MPPA and is one of John's favorites. Her dam has raised numerous sale toppers in the past. This young heifer has a 112 WW ratio. I really think we should have hid her in the pasture until the sale was over.

Jacob, Ranch Manager

American Simmental Assn. EPDs

This is the April SimAngus heifer for your show pen that will go out and produce for you when she is done on the halter. She is out of the Upgrade Simmental bull that needs no introduction, and the CopperQueen cow we think so much of. We didn't put all these embryos in but why we didn't implant the others we have left, I will never know. I would just as soon keep this heifer for ourselves, but since she is co-owned with Jacobson Red Angus, she is offered for sale. Make sure to check out her full ET brothers coming up later. Registered with the American Simmental Assn.

Here is the lead-off bull that I can honestly say that I don't care if he sells or not. He has length, depth and structural correctness. He is everything you could want in a herd bull. 2207 is a calf that has some carcass numbers to his EPDs and is moderate framed. His dam had a beautiful udder and was one of John's favorite cows originating from Harley and Barb Moser's herd. 2207 has been 50K tested.

A High Noon x Copperqueen bull calf that has plenty of potential. 2205 has the absolute best disposition – I don't think he'd get excited if you lit a fire cracker off his back. He was tied up to go to the state fair with our show string but Mama Steph had too much to do and he got turned out. He is big boned and deep bodied. If you are looking for a bull to move your herd forward, here he is. He is halter broke and you may appreciate that when you have to move him, he leads a little better than you can chase him. Co-owned with Jacobson Red Angus. 2205 has been 50K tested.

This cow always does work. She is by far my favorite dam. Here you go – the big guns are out and drawn. This boy is stout, rugged and durable in his overall look and design. He has the growth and performance as well. If you want a bull that will put width and dimension on your calves which equal pounds and money. Equal pounds and money, this is the one to look at. Furthermore, with being a high Capacity 224 son his females should be great replacements as well.

Here is an average-birth-weight bull that has some growth to him. His dam originated in the Ed Artz herd and is one of my favorites. The only complaint I have about her is that the front quarters of her udder are a little light, but then she will be coming 10 years old and is still in the herd. Guess she must not have a problem bringing home the good ones. I would not recommend using this bull on heifers even though he has light birthweight. I don't know if I believe all the numbers though as the ME EPD isn't favorable on paper but this cow doesn't require much for feed and comes home looking good every fall. I still say visual appearance and knowing your cattle is worth more than paper!

This bull calf is one that did this all on his own. We lost the N460 donor dam shortly after she calved. She was the \$21,000 cow that sold in the Oates Land and Cattle dispersal that caused so much stir. Here is a calf that offers plenty of potential with above-average carcass numbers and he is out of a dam with a 104.9 MPPA. His maternal brother was our high-selling bull last year to Brenner Angus.

Well, where do I start on this boy? First off, I think we should just go buy a bunch more cows and keep him. He and next lot have the best dispositions. They are sired by Upgrade and out of Copperqueen – you don't need to think twice if they will be good or not. They are deep with plenty of width, bone and muscle expression. If you aren't in the market for a SimAngus bull, you may be after you see them. 2203 is co-owned with Jacobson Red Angus. Registered with the American Simmental Assn.

261 is a calf that should add plenty of maternal and milk abilities to your herd, not to mention being easy to maintain with a little carcass as well. The Equals Thunder bull sires deep-bodied calves, and 261's dam goes back to Mojito, Dahlke Logan and Sodak bloodlines - all of which are cow-making families. Don't get caught not paying attention when this one is selling. 261 was 50K tested.

This Wolfpack calf is about as long as they come. His dam produces functional calves year in and year out. He doesn't present the best set of milk numbers but then try and tell me how these calves of hers wean off with over a 100 ratio on weaning every year. Last year's bull calf was one of our heaviest calves and was a top seller in our sale going to Bruce Hoffman at Rockham. I believe that numbers play a big part in a pedigree but, as I have stated before, I know these cows behind these calves and this cow is a solid producer – in fact I was just thinking that we should try flushing her.

This is the first time in a few years that this dam has produced a bull. She normally throws awesome females on the ground and this bull is no different. He could be used as a calving ease sire. 294 is a well-balanced, deep-cherry-red bull with plenty of length, and muscle dimension.

Not sure where to even start with this guy – what an individual he is! This calf has a ton of rib shape and style. Check out his +12 CED and a negative BW EPD. He is just super balanced. I bought his dam at the River Hills Dispersion as my pick of the fall cows. She was my kind a female with a ton of style, size and balance of the EPDs. She has a +11 CED with a low BW EPD. She also had an IMF of 6.87 to ratio 141, and a 13.1 REA to ratio 113 at an adj. wt. of 968. Her carcass data in unreal. Her production is 5/91BR, 3/104 YR and 3/111 for both IMF and REA. Not realizing until later research how amazing her pedigree is. To get the true appreciation of this cow family you need to Google this whole cow family. If you were to do each individual cow it truly would take you hours. This cow family is HUGE and truly instrumental in making up a lot of the Angus breed. GAR New Design 2609 – a full sister to GAR New Design 5050, a big-time semen selling bull for Select Sires – is the granddam to Priority. GAR New Design 706 – a full sister to the legendary GAR New Design 2536 – is the great granddam to Priority. These two females have more bulls in stud than any other cow families I know of. GAR New Design 2114 and GAR Scoth Cap 867 – now that is cow power. Priority has the potential to be untouched. Not to mention his sire who was a past Midland Bull Test graduate and high-selling bull at \$65,000 to a great group of breeders. Priority is going to take somebody to the next level. He could be the next big-time semen seller. Terms of selling will be announced sale day.

This is a Firestone son that I think the world of. He is super long, very correct and extremely thick with a powerful back leg. He is a bull that I used to clean up my heifers with in my own program. His dam will enter the donor pen just like her dam did. I sold the maternal granddam to Fireball to Bob Neben of Nebraska in my 2011 female sale. He has continued to flush her. We have sold a lot of sons and daughters out of this cow. Another super cow family. Selling full possession – just keeping a 1/4 semen interest in the bull.

A standout calf since birth, he had a 76# BW and a 836# 205-day wt. A calf with a tremendous amount of rib shape and thickness. His first-calf dam comes from a super cow family. His granddam is 5/99 BR, 5/113 WR, 3/104 YR, 2/112 IMF and 2/105 REA. His great granddam is 5/104 WR, 5/107 YR, 6/109 IMF and 6/100 REA. Now that is cow power at its best. A calf that I'd recommend for heifers. I think this calf is BIG TIME. A calf that I'd like to collect some semen on. Selling full possession but I would like to keep a 1/4 semen interest in the bull.

D Firestone T729, sire to Lots 123 and 124

This Lutton son comes from a super cow. She is 8/102 WR, 6/101 YR, 8/99 IMF and 8/102 REA. Good bulls come from good, hard-working cows. She herself had a 127 WR and a 119 YR a IMF of 6.15 to ratio 129 and a 106 REA ratio. She was a sale highlight last year in the Dikoff Ranch fall female sale. Joe Sovell and myself knew we needed to own this super female. You need to see a few of her daughters in production at Dikoff Ranch. If she has something in a sale it is usually at the top and highly sought after. She had the top-selling bred heifer in the Dikoff Ranch '09 Female sale selling to Vin-Mar Angus of Nebraska. In that same sale, she sold a Lutton heifer calf to WK Angus of Nebraska. She has sold two full sibs to Advantage and they average \$4,250. They were definitely sale highlights. This guy has cow power at its best.

CDS Acre Doc
Little Sissy Acre

Docs Hickory
Grulla San
Bob Acre Doc
Ol Lucy Brown

Doc Olena
CD Chica San Badger
Bob Acre Doc
Oaks Charm

RY Hickory Acres, or as we call her by her barn name, Tibbs, is a fancy 2010 mare with an impeccable pedigree, a sweetheart disposition and a strong start to her training foundation. Tibbs originates from the Broadaxe Ranch horse breeding program and is owned and trained by Rodney Yost. She was one of two young horses that were used in a Rodney Yost Horsemanship Colt Starting Demonstration that was featured at the Casey Tibbs Rodeo Event Center in Ft. Pierre, S.D., as part of the Casey Tibbs Match Bronc Ride weekend in June 2012. Tibbs adopted her barn name from the event and has taken to training extremely well.

As previously mentioned, Tibbs has a family line and pedigree that rivals most young horses in this part of the country. Tibbs is a maternal half-sister to Rodney Yost's current bareback/bridleless demonstration mare, Pepsi, that has been featured in Horsemanship

Clinics and Horsemanship Demonstrations throughout the Midwest, Michigan and Canada to name a few. Tibbs and Pepsi are maternal half-sisters through their mother, CDs Acre Doc, who is currently a high-quality Broadaxe Ranch broodmare and an own daughter of the immortal CD Olena and by an own daughter of the two-time World Champion Cutting and Hall of Fame Horse, Bob Acre Doc. CD Olena was the 1994 NCHA Futurity Champion Cutting Horse and the 1995 NCHA Horse of the Year. CD Olena has produced offspring earnings of approximately \$14 million. Tibbs mother, CDs Acre Doc was destined to follow her father's footsteps enroute to a birth at the NCHA Cutting Horse Futurity before she got sick right before the Futurity.

Tibbs sire, the red dun Broadaxe Ranch sire, High Whitch, is quickly making a name for himself through his consistency as a sire by producing colts with naturally deep/hard stops, responsiveness, cow-sense, disposition, intelligence, conformation and muscle. "High Whitch is one of only 30 stallions nominated to the Dakota Classic Cutting Horse Futurity each year, and has offspring on track to go into cutting horse training in the near future. High Whitch is an own son of the great High Brow Hickory, who has become famous as a sire for producing the incomparable,

RY Hickory Acres "Tibbs"

High Brow Cat, who has broken and continues to break records of all kinds by being the most productive money-earning offspring sire in the history of the NCHA with produce earnings of approximately \$50 million. This makes High Whitch and High Brow Cat paternal half-brothers. The dam to High Whitch is Acre Advantage, who is also a NCHA money-earning and money-producing daughter of Bob Acre Doc.

Tibbs is a neat little prospect for those of you looking for an awesome calf horse, breakaway horse, heel horse, reined cowhorse, team penning/sorting horse or fun ranch horse that will have the ability to hold any cow on the place or be able to easily put you in the position to throw an easy loop on them. This is a mare that Rodney was initially planning to keep on the place for himself and the younger Broadaxe Ranch kids in the future due to the relationship he's had with her bloodlines and her sister, Pepsi, but in the end thought she would be a great representation of the breeding program of the Broadaxe Ranch. She will have approximately 60 days ranch riding by Rodney Yost by the time of the New Year's Eve sale.

Go to www.broadaxeranch.com to check out the Broadaxe Ranch, its breeding program, Tibbs' sire and dam pedigree/photos, as well as other Broadaxe Ranch horses "For Sale." Search for "RY Hickory Acres on www.allbreedpedigree.com to view Tibbs' extended pedigree. You may also find "Rodney Yost" and "Broadaxe Ranch" on Facebook. Also, feel free to contact Rodney Yost at (605)-680-0004 for further information regarding Tibbs, the Broadaxe Ranch, the Broadaxe Ranch breeding programs or other horses for sale.

127 MOLLY

BD: 2008 Grade Mare

Molly is a 2008 buckskin colored Broadaxe Ranch riding mare owned and trained by Rodney Yost. Molly is an athletic and intelligent mare with an excess of speed and ability. She has superb conformation, long stride, phenomenal soundness and a soft feel. Molly has been hauled extensively throughout the Midwest and has made the 17-hour, one-way trailer haul to Michigan over the past few years as part of Rodney Yost's Horsemanship Demonstrations and Horsemanship Clinics. She hauls, clips, washes, trailer loads, stands for farrier, has recently had teeth floated and doesn't get bothered by new places or crowds. Molly has been

used to pasture doctor a limited number of calves this summer and has been used for sorting in the feedyards and during weaning. She has a lot of cow-sense, can easily track-up on any cow/calf, and will hold the rope while you take a dally, dismount, go down the rope and doctor the critter.

Molly is an individual who has the ability and training foundation to go on with in many directions. She has the speed, responsiveness, rate and disposition to be a successful barrel horse, ranch horse, rope horse, team penning horse or trail horse to name a few. Rodney Yost is putting Molly up for sale due to an excess of young prospects in need of riding at the Broadaxe Ranch, and the need for a fresh line-up of horses for future Rodney Yost Horsemanship Demonstrations and Horsemanship Clinics. Molly is a daughter of the popular gray Broadaxe Ranch sire, GBH Smooth-

Molly

wood Cash and a past Broadaxe Ranch riding mare. She sells as grade without papers, but her looks, ability, training and reputation from those who have seen her in action at demonstrations and clinics, far outweigh the lack of a printed pedigree. Top that off with the potency and popularity of her sire, GBH Smoothwood Cash, and Molly may be your greatest investment of this upcoming year if

you are in the need for an all-around prospect known by many, who is capable of being a top-notch prospect in many disciplines.

Go to www.broadaxeranch.com to view the pedigree of her sire, GBH Smoothwood Cash and to check out the Broadaxe Ranch and program. You can also find "Rodney Yost" and "Broadaxe Ranch" on Facebook. Feel free to contact Rodney Yost at (605)-680-0004 with any questions or further information regarding Molly or the Broadaxe Ranch.

SALE TERMS & CONDITIONS

TERMS: Terms of the sale are cash, check, sight draft or other terms agreed to in writing between seller, buyer, and sale manager payable immediately upon conclusion of the sale and before animals will be moved. Sale manager reserves the right to require a certified check as settlement before releasing any cattle.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold by the auctioneer.

BIDDING: Any disputes or challenges regarding bids or tie bids will be settled by the auctioneer and his decision will be final.

ANNOUNCEMENTS: Any errors or changes in information contained in the catalog will be announced from the auction block and such announcements shall take precedence over information contained herein.

HEALTH: All animals are eligible for interstate shipment. Interstate health papers prepared by an accredited veterinarian will be furnished on each animal sold. Arrangements for International Shipments should be made with the sale manager prior to the auction. All efforts for the exportation of cattle can be arranged through sale management.

BREEDING GUARANTEE: All animals are guaranteed by the seller as outlined in the Red Angus Association of America Code of Ethical Sale Practices. Guarantees will be handled on an individual basis, with credit towards another animal.

LIABILITIES: All persons who attend the sale do so at their own risk. The seller and sale manager assume no liability for any accidents that may occur. Neither does the seller or sale manager

assume any liability for loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God. It is to be clearly understood that the sale manager and its representatives act only as a medium between the buyer and seller.

They are not responsible in any way for the failure on the part of the buyer and seller to live up to his obligations or for the truth of any warranties or representation, express or implied. Neither does the sale manager assume any financial obligations to collect or enforce collection of monies between parties. Any legal action, that may in exceptional cases be taken, must be between the buyer and seller. This catalog has been prepared by the Sale Manager from pedigrees and information supplied to them by sources deemed reliable; however, the sale manager will in no way guarantee the pedigree, percentage of the animals selling, or data included in this catalog. Any exceptions taken are between buyer and seller.

CONTRACT: The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

MAIL BIDS: Mail or wire bids may be furnished. Bids must be in the hands of the sale manager in ample time prior to sale date and will be handled in strict confidence.

PHONE BIDS: Telephone bids will be taken by the sale manager and will be treated in strict confidence.

SALE DAY PHONE NUMBERS: Kyle Gilchrist's cell phone, (641) 919-1077.
