Spitzer Ranch

Professional Cattlemen's Brangus Bull Sale and Customer Commercial Brangus Female Sale

Saturday, February 25, 2012

1:00 pm • Fair Play, SC

Dear Friends and Customers,

Welcome to our 19th annual sale! We are appreciative of your interest in the Spitzer Ranch breeding program and present the 2012 Bull Sale offering for your approval. Our family feels blessed to have been Registered Brangus Seedstock Breeders since 1982. All that time consistently breeding Brangus Bulls to fill the needs of the profit minded commercial and registered Professional Cattleman.

The entire Spitzer Ranch program has always been structured around the disciplined breeding strategy of using only proven, high accuracy sires and providing $\frac{1}{2}$, $\frac{3}{4}$ and even full brother sire lines to increase your cow herd's genetic consistency from the bull side. For over a quarter century we have produced practical cattle, ignoring fads, fancies and the "popular bull" of the day. Instead, we have had a steadfast adherence to the Professional Cattleman's demand for profit driven cattle. We totally embrace a philosophy grounded in the twin thoughts of objective selection of cattle for economically relevant traits that enhance profitability in a registered or commercial cow herd; and a total orientation to the needs of the beef industry. Please feel free to contact us if you need additional information.

Thanks again for your interest and attention; and please come to our sale. You will find a super group of honest, solid bulls with the proven reliable genetics to put pounds on the ground and dollars in your pocket.

Sincerely,

Doc and Patricia

Special Features!

An extra fancy set of crossbred commercial females from the cow herds of our customers.

2012 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen
Professional Cattlemen's Brangus Bull Sale

Saturday, February 25, 2012

ANNOUNCEMENTS MADE ON SALE DAY TAKE PRECEDENCE OVER ALL PREVIOUSLY REPORTED INFORMATION

SALE DAY SCHEDULE

8:00 AM Animals on Display
 Noon Complimentary Meal
 1:00 PM Sale Begins

SALE DAY PHONES

Home Office864/972-9140
 John Spitzer864/710-0257
 Patricia Spitzer864/710-4475
 Will Taylor864/871-1452
 Michael Hunt770/877-2098
 Jamey Hunt678/986-4825
 Wesley Hunt770/548-7950
 Seth Hunt770/548-1667

TELO-AUCTION AVAILABLE

NOTE: For any telephone bidding you must contact us in advance to register a bid number.

If you will not be able to attend the sale, you will still be able to bid by way of a conference call hookup. Beginning at 1:00 PM on sale day, potential bidders should call:

1-888-291-0312

to join the conference call live from the sale.

Enter the passcode: **9410759** followed by the # sign. There is no charge to the caller to be on the conference call hook-up.

CLAIMS FOR ADJUSTMENTS

Claims for adjustment must be made in writing to the seller within 6 (six) months of the sale date. All settlements will be made with credit at a future sale and this will, in any and all cases, be deemed full satisfaction and settlement.

LIABILITY

All persons attending this sale do so at their own risk. Neither Spitzer Ranch nor anyone connected with management of the sale assume liability, legally or otherwise, for safety of buildings or premises, or for behavior of animals.

TRUCKING

While hauling is typically a responsibility of the buyer, Spitzer Ranch continues the following policies. FREE HAULING anywhere on bull purchases of \$10,000 (one or several). FREE HAULING on bulls back to our Partners for Quality Cooperator locations. Additionally, we guarantee a maximum trucking cost of \$200 per bull within the states of GA, NC and SC if arrangements are made with us prior to the sale. For other states we will be glad to assist with transportation and will get your bull delivered as economically as possible. Trucking for females is totally the responsibility of the buyer, but we will try to help wherever we have a trailer headed.

FREE HAULING ON BULLS TO:

Georgia.....Hunt's H+ Brangus, Calhoun, GA
 South Carolina.....Will Taylor, Honea Path, SC

SALE MOTEL

Jameson Inn-Seneca
 226 Hitec Rd. Seneca, SC 29678.....864/888-8300
 Spitzer Ranch Rate of \$66 + Tax

DIRECTIONS TO SPITZER RANCH

Exit North off I-85 at Exit 2, Go North on SC Hwy 59 for 2 miles and look for our ranch sign on your left.

2012 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen

Bulls designated with the "Calving-ease Flag" are felt to be Low-Risk Bulls for calving difficulty and are suitable for use on first-calf females.

1. Birth weight EPD – predicts calf size and calving ease.
2. Weaning weight EPD – predicts preweaning growth potential.
3. Yearling weight EPD – predicts overall growth potential and post-weaning gain.
4. Milk EPD – predicts the maternal contribution a bull passes to his daughters for milk production and mothering ability.
5. Total maternal EPD – predicts the overall weaning weight of calves from daughters of a bull due to growth potential as well as milk production and mothering ability.
6. Scrotal circumference EPD – predicts testicle size.
7. Ribeye area EPD – predicts muscling.
8. Percent intramuscular fat EPD – predicts marbling and quality grade.
9. Fat EPD – predicts external fat thickness and yield grade.
10. To make it easier to evaluate EPDs, the percentile ranking is shown below each individual EPD. This is a great way to understand where the individual ranks in the breed for that particular EPD. For example, where it shows "10%," this means that particular EPD value is in the highest, or TOP 10%, of all non-parent bulls in the entire breed. (A 10% for BW, however, means lowest, or lightest.)
11. Actual birth weight within 24 hours of birth.
12. Weaning weight adjusted to 205 days of age and for age of dam.
13. Ranking of individual 205-day adjusted weaning weight in relation to average adjusted weaning weight of weaning contemporary group of this calf. The contemporary group has an average ratio of 100.
14. Average daily gain (pounds per day) during Spitzer Ranch's 168-day performance growth test.
15. Lifetime weight per day of age (actual weight divided by days of age) at the end of Spitzer Ranch's 168-day performance growth test.
16. Ranking of individual WDA in relation to average WDA of the entire test group, which has an average ratio of 100.
17. Yearling weight adjusted to 365 days of age and for age of dam.
18. Ranking of individual adjusted 365-day yearling weight in relation to the average adjusted yearling weight of yearling contemporary group. The contemporary group has an average ratio of 100.
19. Yearling frame score adjusted to 365-days of age.
20. Yearling scrotal circumference (testicle size measured in centimeters) adjusted to 365-days of age.
21. Curve Bender Index (CBI). Our exclusive INDEX which combines values for low birth weight EPD and high yearling weight EPD into one value. This Index has a highest achievable numeric value of 148 and goes down from there. Bulls with a higher numeric value for CBI would be expected to sire calves with lighter birth weights and yet heavier weaning and yearling weights. Please see www.srbulls.com for a more complete discussion of the CBI or call for a printed version.
22. CBI Quartile Rank. The CBI as described above and is ranked as First, Second, Third or Fourth Quartile. There is probably very little difference among bulls within the same Quartile Rank for CBI. There are greater differences among bulls in different Quartile Rank for CBI.
23. Ultrasound measurement of rib eye area, which is indicative of muscling and positively correlated with retail beef.
24. Ranking of individual adjusted 365-day rib eye area in relation to the average adjusted rib eye area of the yearling contemporary group. The contemporary group has an average ratio of 100.
25. Ultrasound measurement of percent intramuscular fat or marbling in the ribeye muscle which is a predictor of quality grade.

26. Ranking of individual adjusted 365-day percent intramuscular fat in relation to the average adjusted percent intramuscular fat of the yearling contemporary group. The contemporary group has an average ratio of 100.
27. Ultrasound measurement of fat thickness at the 12th rib, which is a good indicator of yield grade.
28. Ranking of individual adjusted fat thickness at the 12th rib in relation to the average adjusted fat thickness at the 12th rib of the yearling contemporary group. The contemporary group has an average ratio of 100.
29. The tattoo or private herd number (PHN) of the dam of this calf.
30. Age of dam at time of birth of this calf.
31. Number of calves born to dam
32. Average actual birth weight of dam's progeny.
33. Average birth weight ratio of dam's progeny compared within contemporary groups.
34. Average weaning weight ratio of dam's progeny compared within contemporary groups.
35. Average yearling weight ratio of dam's progeny compared within contemporary groups.
36. Average ultrasound ribeye area of dam's bull calves.
37. Average ultrasound % intermuscular fat of dam's bull calves.
38. Average ultrasound fat thickness of dam's bull calves.

NOTE: All ultrasound scans (23-28 and 36-38) are adjusted to 365 days of age.

**For your convenience,
non-parent breed average EPDs are on each page.**

	BW	WW	YW	MILK	TM	SC	REA	%IMF	FT
EPDS	0.7	23.3	42.3	11.0	22.6	0.52	0.29	0.01	-0.002

We work very hard to provide the most accurate performance testing program possible and you can feel confident in each piece of data reported. Accurate contemporary grouping is essential in this effort as it is the differences in animal performance within a contemporary group that is reflected in EPDs. Animals from us and our cooperator herds were obviously not raised together and cannot possibly be in the same contemporary group. Therefore, when you look at the individual performance data, a ratio of 100 (average) will not correlate to the same weight among the groups. Be sure you know which animals are in the same contemporary group to know how to compare. Better yet, ignore absolute weights and look at weight ratios and look very, very much harder at EPDs.

RESERVE SALE POLICY

Pretty well everyone has a floor price under their bulls at auction. You know the game; a lot of bulls get bid off to the same number or the same name and no bull sells below a certain price. We believe that's pretty devious. We don't like playing games and we want to tell you our minimum price up front in an honest and straightforward manner. We have a reserve "Base Price" on each bull selling in this sale.

Each bull will be started at the listed "Base Price". If you are willing to bid the base price do so before we are past that bull in the sale order. Once we move on to the next bull in the sale order, the passed over bull is still available for sale, but the price will then be \$100 over the base price as listed in this catalog. In fact, any bull not sold on sale day will be available through March 25, 2012 from our private treaty pens. But, no bull sold after sale day will ever be lower than the reserve base price plus \$100.

RETAINED-INTEREST BULLS

Spitzer Ranch (and/or our cooperators) reserves the right to retain a 50% revenue sharing semen interest on any bull sold. Bulls are in your possession and under your control for natural service and you get 100% of the salvage value. We will continue to own half interest in bulls for the purpose of collecting and marketing semen, as well as using semen in our herds. While it is unlikely large amounts of semen will be collected or sold for many bulls, we need that as an option of bulls sold. As a buyer and at your option, you can also have a 50% revenue sharing semen interest and participate in revenue from semen sales. We have developed a Bull Partnership Agreement spelling out further details. Buying a retained-interest bull obligates you to that agreement only for semen collection and sales. To avoid any misunderstandings, if you have any questions at all, please ask. If you chose not to be involved with semen sales, we still reserve the right to collect and market semen on any retained interest bull.

Bulls are cataloged by sale order and sell in sale order based on the highest Curve Bender Index (CBI).

**HARNESS THE POWER OF
HETEROISIS
BUILD A BETTER COW HERD
KEEP YOUR ANGUS PREMIUMS**

"A Brangus-Angus cross probably gives you as much heterosis relative to Angus genes as you can extract, because you can get the benefits of Cow Efficiency by making a Taurus-Indicus cross."

~Dr. Dan Moser, Kansas State Univ.

International Brangus Breeders Association

BRANGUS

Predictable/Adaptable/Profitable

(210) 696-8231

www.GOBANGUS.com

On the Ranch:

- ❖ Higher conception rates
- ❖ Environmental adaptability
- ❖ More pounds of calf per cow
- ❖ Fescue Fungus Tolerant
- ❖ Increased Longevity

In the Feedyard:

- ❖ Increased efficiency
- ❖ Added heat tolerance
- ❖ Fewer days on feed

On the Rail:

- ❖ Consistently earn premiums in Angus product lines including CAB
- ❖ Lower yield grades
- ❖ Research proven tenderness

2012 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen

HERD HEALTH PROGRAM

We are Tuberculosis Accredited (Spitzer Ranch # 58348, Will Taylor #200615T and Hunts #Pending) and Brucellosis Certified (Spitzer Ranch #2226, Will Taylor #200615B and Hunts #Pending). Spitzer Ranch and Will Taylor have both achieved John's Disease Surveillance Program Level 6 (Highest Level) with 14 years of negative tests. The Hunt Family has had all cows tested negative by fecal culture and is working towards John's Disease certification. Additionally every bull in the sale as well as their sisters back home have been "ear notched" and are guaranteed to be negative for PI-BVD. Cattle are on an intensive and comprehensive health, vaccination and internal and external parasite control program that we would be happy to provided on request.

Health papers will be provided at no charge to buyers in order to allow shipment to Anywhere, USA.
