Annual Production Sale

Friday
April 6, 2012

1:00 p.m. CDT
Lake Region Livestock
Devils Lake, ND

Selling 62 Lots

42 Angus Yearling Bulls
6 Polled Hereford Yearling Bulls
14 Angus Yearling Heifers

Dear Cattlemen,

We would like to welcome you to our annual production sale. As always it has been an exciting year. Jay and Malynda were blessed with a beautiful little baby girl in October. Kenzy Irene has had grandpa and grandma wrapped around her finger since she met them.

Every year brings new challenges it seems, and this past year certainly had its share. From record snowfall and cold temperatures last year to spring flooding and washed out roads. With those challenges have come record-high cattle prices. The people involved in the cattle industry are finally being rewarded for their time, effort, and hard work. The world's population is ever increasing and cattle numbers are way down. Couple those facts with the demand for our product, and these prices should stick around in the foreseeable future.

It is as good of a time to invest in high-quality performance genetics as we've ever seen. Herd bull selection has more genetic influence on your herd than any other decision you will make. Each calf crop will add to his value, and every daughter retained will impact your herd for several years to come. There is a lot to gain in herd bull selection. Study the phenotype and use the numbers. We feel we have an excellent set of bulls to add value to your calf crop.

Our philosophy is and ALWAYS will be to produce cattle with size and growth. Our livelihood depends on you the commercial cattle producer supporting us and keeping us in business. With that in mind we will do our absolute best to produce bulls that will add pounds to your calves. While promoting performance we have to keep in mind calving ease. We have an excellent offering of calving-ease bulls. When you are looking through the catalog you will notice some higher birth weights on some of the performance bulls. I assure you all of the bulls in the sale were born unassisted except one which came backwards. Birth weight isn't the only variable in terms of calving ease. When you look at how these bulls are made they're larger framed and long bodied. With that comes extra weight it doesn't mean they are going to be harder calving. The bulls will be sound, functional and performance oriented.

The bulls in the sale were developed on a FeedRite pellet, grass hay and Vitaferm for a mineral supplement. The pellet they were fed is designed for a 3.25 to 3.5 ADG. The bulls averaged 3.97 over 122 days which is a testament to the performance and conversion ability we have strived for. Also all adjusted weights in the catalog are through Angus Herd Improvement Records (AHIR). We don't feed the bulls hard for a short period and adjust them out to a year.

The open heifers were taken right out of the middle of the replacement pen. This is the best selection of open heifers we have ever offered. The heifer calves did not have creep feed over the summer and have been developed slowly with 5 lbs. of pellets and grass hay along with Vitaferm mineral supplement.

The cow herd is run much like most commercial operations. With the extended fall and mild winter they were out grazing until Christmas. They winter on chopped hay and Vitaferm alone. Our cattle are not pampered. They have to go out and work in the pasture and winter well without supplementation. By doing things the way we do, we feel we have a very functional, performance-oriented, easy-fleshing herd.

We are very proud of this sale offering and invite you to the farm at any time to look things over. We would be more than happy to show you the sale offering, cow herd or herd bulls.

As always, the bulls will be fertility tested prior to the sale and fully guaranteed through the first breeding season. We stand behind our cattle as well as anyone. If you have any trouble with anything let us know as soon as possible so we can do the best of our ability to make things right. Also scrotal measurements and ultrasound data will be available prior to the sale. If you have any questions or concerns we would be more than happy to talk to you.

Sincerely,

The Carters

Scale buster by Riverbend Cornerstone. He came off his 2-year-old dam at 976 lbs. and his actual yearling weight was the heaviest at 1,405 lbs. Keystone is a moderate-framed bull with the body type everybody can appreciate. He's a really long-bodied calf with as much volume and muscle as you will find in this year's spring sale season. His dam was purchased through the Basin Angus dispersal sale. She is a big-bodied, beautiful-uddered young female. When you look at the performance data along with his EPD tabulation you've really got to appreciate this young herd sire prospect.

Calving-ease bull by Special Focus. Special Reserve is a moderate-framed, easy-fleshing, calving-ease bull with a lot of rib shape and muscle expression. His dam was also purchased through Basin's dispersal. Really have to appreciate the volume and udder quality of his dam. Excellent calving-ease prospect here in Special Reserve.

Really good herd bull prospect by the world-renowned performance bull Sitz Upward 307R. Calving-ease bull that is really put together well. 104 is really clean made and easy moving. He's really trim through his shoulder and extended through his head and neck. Also have to appreciate his muscle pattern and his base width. Take a look at his birth-to-yearling spread along with his milk and carcass numbers. Here's a bull that does everything well. His dam is an own daughter of 5175 that has been a really productive and consistent cow. This is however her best son to date. Don't miss this Upward son.

7	2.3	62	114	9	35	1+.38	1+.64	1+.006	28.75	52.23	74.28

Big-time herd bull. Outward is one of the best Upward sons you will find. He is a really thick-made and big-boned beef bull. Outward is long bodied, deep ribbed and super stout. When you study him take note of his big, powerful hip and abundant lower quarter. In addition he's also really athletic and gets out and moves the way a bull should – really striding out well and hitting his tracks. He also puts together an exceptional EPD tabulation – note the \$Beef and performance numbers. I can't say enough about this bull's dam. She is a high-volume female with good udder attachment and exceptional teat placement. With this calf she reached Pathfinder status.

Sure-fire calving-ease prospect by TC Aberdeen. Titan is a super-sound, really attractive heifer bull that should really leave his mark with a set of replacement females. Two generations of calving ease sires directly in his pedigree with Aberdeen x Impression. Titan is also a big-time spread-number bull. There is an awful lot to like about this Aberdeen son. He was raised by a 2-year-old that did a phenomenal job. His granddam was also the mother of the TNT Dynamite 713 bull that we retained for service, and sold as a 3-year-old.

Really wide-based bull with a good hip and an attractive look. His full sister had a very successful show career for Lance Wirth. This is a bull with a whole lot of maternal potential. His dam is powerful. She's a beautiful cow with a tremendous amount of body, an excellent foot and a beautiful udder.

Carter Polled herefords sold this heifer in the North Star Classic to Thomas Friesz.

She had a successful show career in 2011 and won many shows throughout the summer!

Lacey Kreft

TERMS & CONDITIONS

(as suggested by the American Angus Association, March 21, 1994.)

Except for those stated in the below terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction.

The warranties and guarantees set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

BIDDING

1. Each animal will be sold to the highest bidder without reserve. The person in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS

1. Terms of sale are cash unless satisfactory credit arrangements, including any possible reservation of security interest by vendor, have been made with vendor previous to sale.

PURCHASER'S RISK

1. Each animal becomes the risk of the purchaser as soon as sold; but it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of (48) hours after the sale, whichever occurs sooner.

CERTIFICATE OF REGISTRY

1. A transferred certificate of registry will be furnished to the purchaser for each animal within (45) days following date of sale or receipt of full payment.

HEALTH

1. All animals are eligible for interstate shipment; except as otherwise announced. Interstate health papers will be furnished for each animal requiring T.B. and Bangs tests in accordance with Federal Regulations. A certificate of vaccination will be furnished for each animal that has been vaccinated for Bangs disease.

A.I. SERVICE CERTIFICATES

1. A.I. Service Certificates shall be furnished by the seller, on demand of the buyer, at no cost to the buyer, for all females bred artificially to bulls not owned by the seller.

ANNOUNCEMENTS

1. Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

BREEDING GUARANTEE

1. All animals are guaranteed to be breeders, with the exception of: a) Calves under twelve months of age; b) Animals shown by purchaser after sale (in cases of animals shown after purchase the breeding guarantees, if any shall be such as agreed upon between the seller and the buyer); c) Injury or disease occurring after sale; d) Gross negligence or willful misconduct on the part of the purchaser.
2. BULLS are guaranteed breeders if not allowed to run with the herd until at least 14 months of age. Any bull which settles cows by natural service and passes a fertility test made by competent veterinarians, mutually agreed upon by buyer and seller, during any 6 month period of trial (provided for in paragraph 2 of the section of these sales terms and conditions entitled "Option and Privilege of Return and Adjustment") shall be considered a breeder. Any guarantees with respect to the ability to freeze semen shall be by separate agreement between the buyer and seller.
3. Safe in Calf Females have been examined by a competent veterinarian and are so guaranteed.
4. Served Females are not guaranteed to be in calf.
5. Pasture-bred Females have been exposed but are not guaranteed to be in calf.
6. Open Females have not been served and are so guaranteed.
7. DONOR FEMALES 1. (a) A female which has been used in an embryo transfer program is not guaranteed to be a breeder after date of sale unless by separate agreement between the buyer and seller. (b) A female is not guaranteed to be a breeder after date of sale, when that female is to be used, or attempted to be used, in an embryo transfer program, unless by separate agreement between the buyer and seller.

IDENTIFICATION

1. Seller offers each animal with a readable tattoo corresponding to its registration.
2. Buyer agrees to check tattoos for accuracy.
3. In those cases where a nickname is used, it shall be accompanied by the official registered name and number of the animal.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

1. All claims for adjustment or refund must be made in writing either within six months of the sale date or no later than six months after the animal reaches 18 months of age, with the exception of claims involving dwarfs or misrepresentation of service sire.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm of the seller in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder shall be the responsibility of the purchaser, except that the seller shall be respon-

sible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expense incurred for transportation.

3. If a female sold as "safe in calf" proves not to be in calf, the purchaser may receive service from the bull previously used, if available, or if the bull is not available, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller. Any adjustment provided for herein shall absolve the seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe in calf" at time of sale to a certain bull proves to have been bred to a different bull, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller (adjustments shall not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf). Any expense incurred for transportation shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.
4. If a female sold as "open" proves to be with calf, the purchaser may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the purchaser. It shall be the obligation of the seller to bear any expense incurred for the transportation.
5. Cows with calves at side are presumed to be breeders with no further fertility guarantee.
6. White skin or hair shall not be painted or altered. If such painting or alteration has occurred, the buyer may return the animal to the farm of the seller for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the purchaser. Any expense incurred for transporting the animal shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.
7. If an animal is sold, and at a later date, proves not to be eligible for registration under the Association rules, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, or at the buyer's option refund the purchase price upon the return of the animal to the farm of the seller. Any expense incurred for transportation shall be the responsibility of the purchaser, except that the seller shall be responsible for the transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.
8. If an animal is sold and through blood tying is proven to have incorrect parentage, as represented by the certificate of registration, and for which parentage can be determined, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option refund the purchase price upon the return of the animal to the farm of the seller. Any expense incurred for transportation shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.

GENETIC DEFECT GUARANTEE

1. All animals are guaranteed not to produce a calf with the following defects for a period of two years from date of sale: Dwarfism, Osteopetrosis (marble bone disease) and Syndactylism (mule foot). This guarantee is effective only under the following conditions: (a) The buyer shall notify the seller in writing immediately upon the birth of a calf suspected of being defective or immediately after determination is made that such calf is defective. (b) The seller at his expense shall be permitted, and provided with reasonable opportunity, to obtain blood samples of an alleged defective calf and its sire and dam for the purpose of blood type analysis to establish parenthood. (c) The animals will be returned by the buyer to the seller at the buyer's expense; provided the animals meet the health requirements of the seller's state. (d) The return of the purchase price in connection with a defect producing animal shall be deemed full satisfaction and settlement.
2. In the event there is a dispute as to whether or not a calf is defective, the "Determination" referred to in paragraph 1.a) above shall be made by a person or persons acceptable to both the buyer and seller, and in the event that the buyer and seller cannot agree on the selection of such person or persons, then each of them shall appoint a representative to make the determination. In the event that such representatives fail to agree, a third person selected by the representatives of the buyer and seller shall make the determination.
3. Registration certificates issued after January 30, 1979, for animals which, prior to issuance of the certificate, have been reported and verified as carriers of recessive genetic defects or genetic factor or have tested free of certain genetic defects or genetic factor contain the following codes relative to such defect: S-Syndactylism; H-Double Muscling; D-Dwarfism; M-Osteopetrosis; HI-Heterochromia Irides; HG-Horn Gene; R-Red; X-Multiple Defects, Check List for Kind; F-Tested For Defect Printed Without Producing Abnormal Calves; GDF-Produced 35 or more calves from Daughters Without a Genetic Defect or Genetic Factor. The absence of any such notation on a pedigree of an animal, in a sale catalogue, does not establish that the animal in question is not a carrier of any such genetic defect or genetic factor.

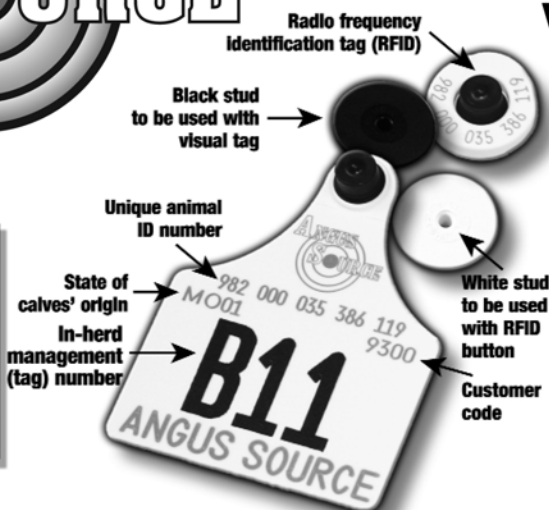

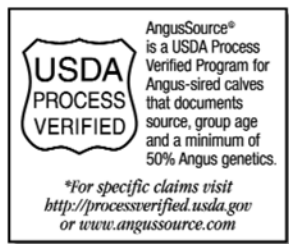

RIGHTS AND OBLIGATIONS

1. The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.
2. Neither the sponsoring association, the sale manager, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.

**For voluntary consideration and use by sellers in their independent business judgement.*

Don't let 'em leave home without one!

If you have calves to market, don't let them leave home without an AngusSource® tag. AngusSource adds value to your Angus-sired feeder cattle and replacement heifers by:

- Guaranteeing Angus genetics
- Verifying source and age
- Opportunity to qualify for *Certified Angus Beef®* regardless of hide color.

Enrolling in AngusSource

1. Become a Producer Participant

To be eligible to supply calves to the AngusSource program, producers must have Angus-sired calves that originate on their operation, use registered Angus bulls, have management practices that allow for the identification of calves that are Angus-sired, and keep calving records that document the birth date of the oldest calf.

- Complete the AngusSource Producer Participant Enrollment Form and Agreement. Download forms at www.angussource.com or request by calling AngusSource.
- **These forms must be completed and returned via fax or mail to AngusSource before enrolling calves.**

2. Complete Training/Enroll Calves

Calves must be enrolled by the ranch of origin, sired by a registered Angus bull and have known group age. There is a \$50 fee for each enrollment. Visual tags are \$1/tag, matched-pair sets (radio frequency identification (RFID) button plus matching visual tag) \$3.25/set. Allflex tag applicator is \$17.50 (must use the red Allflex applicator to apply these tags).

- Complete training and enroll calves by calling AngusSource.
- Provide enrollment information to AngusSource and submit any required records.
- Choose a tag option. For \$1/head, receive a full-size laser-ink printed visual ear tag with customized in-herd management number. A RFID-matched pair (visual tag and an electronic tag) is available for \$3.25/head.
- Tags will be delivered 7-10 business days after enrollment is processed. Tag only those calves enrolled in AngusSource.

3. Print/Customize AngusSource Verification Certificate

- AngusSource Verification Certificates are generated for each lot of enrolled calves. Certificate includes the genetics, source and group-age.
- Access and customize/print certificates online, at www.angussource.com or by calling AngusSource.
- Customize the AngusSource Verification Certificate for feeder calves or replacement females. If marketing information is included, a listing will be activated on the AngusSource Web site for up to 90 days prior to sale date and is e-mailed to nearly 600 potential buyers.
- Print certificate to provide information to potential buyers.
- Buyers may request certificate by contacting AngusSource if one is not provided at the time of purchase.

For more information, contact AngusSource at 816-383-5100 or angussource@angus.org or visit www.angussource.com
