"Heterosis Headquarters"

42nd Annual Production Sale

- Dan – (701) 424-3726
- Jeff – (701) 485-3762
- John – (701) 485-3766
- Jack – (701) 485-3206

Welcome to Dahl Land & Cattle Co.'s 42nd Annual Sale, 2013 looks like it's shaping up to be another great year in the cow-calf industry. Cow herd numbers are at record lows and cattle prices are at record highs. That is a tough combination to beat! One of the biggest advantages of a planned crossbreeding program is calf vigor at birth and hardiness of a cowherd. We all remember that 2012 was a challenging year environmentally not only in N.D. but nationally as well. It was a year that tested the hardiness of cattle and producers alike with drought and cold temperatures requiring extra feed. As a testament to the hardiness and fertility of our cattle, this fall at pregnancy check time, we had 88 2year old cows that weaned their 1st calf. Of those 88 there was 2 that failed to rebreed.

Our goal is to produce cattle with low birth weights that perform well with no creep to mask what nature can produce. In other words we are looking for genetics that will give us a big spread from birth to weaning and beyond. At the same time our cattle must be structurally functional and be fertile. It is a fairly lofty goal and one we continue to work diligently on.

When we ultra sounded the bulls the technician said, "These bulls are hard." The bulls have been on a 54 mega-calorie ration of 10 pounds of ground oat/pea/alfalfa hay, 6 pounds

of wet distiller's grain and 9 pounds of cracked corn per day. During the feed trial we had several bulls gaining over 4 pounds per day with all but 3 gaining over 3 pounds per day.

We are again starting the sale with a large group of replacement heifers. As always these heifers come right from the heart of the replacement heifers we raised. The heifers have been grown and not pushed. They were on a 35 mega-calorie ration of 14 pounds of ground oat/pea/alfalfa hay, 6 pounds of wet distiller's grain and 2 pounds of cracked corn, the heifers did not get corn until the middle of March. We advertise that we are the "Program that Builds Cowherds". A cowherd is by its very nature maternal, Webster defines "Maternal" as: of, relating to, belonging to, or characteristic of a mother; motherly. We would add to that one culling criteria for maintaining a maternal cowherd; If you have to run a cow in the chute for any reason except normal processing or to help with a mis-presented calf at birth, she's not maternal enough. It's a goal we strive for.

In closing, we want to "Thank you" for your continued support and confidence in our program. We look forward to serving you in the future. We also want to thank Our Lord for bringing us together again, for helping us with our decisions and for providing our nation and ourselves with countless blessings.

Bull Credit

If you purchased females from us in 2012, you can receive a \$100 credit towards the purchase of a Dahl Land & Cattle Co. bull.

Yearling Bull Data

- 82 lbs – Avg. Actual BW
- 740 lbs – Avg. Adj. 205 Wt.
- 1168 lbs – Avg. Adj. 365 Wt.

Calving-Ease Code

- * Use only on cows
- ** Use on cows & heifers with a known birth weight and calving ease history
- *** Use on heifers and all cows

Our recommendations are based on our cow female histories for birth weights and calving ease. Also, with aid from EPDs based on our reference sires and the individual animal.

Dahl Land & Cattle Co. Annual Production Sale

Bidding:

All animals sell to the highest bidder. Any disputes will be settled by the auctioneer and his decision will be final.

Mail and Phone Bids:

Mail or phone bids will be handled in strict confidence by us and we ask that they be in our hands in ample time prior to sale date.

Online Bidding:

The sale will be broadcast live on dvauction.com. For information on how to register to bid online, see page 3.

This sale will be broadcast live on the internet.

DVAuction

Terms:

Terms of the sale are cash or check, payable immediately upon the conclusion of the sale and before animals are moved.

Purchases and Risk:

We recommend purchasing insurance. A representative will be present sale day.

Announcements:

Any errors or changes of information printed in this catalog will be announced from the auction block and such announcements shall take precedence.

Breeding Guarantee:

All bulls in this sale are guaranteed to have passed a fertility examination by our veterinarian. The buyer of each bull will receive a certificate of such exam upon paying for the bull. We assume no liability, legal or otherwise, to make any further guarantee to the buyer. No other warranty is expressed or implied.

Liability:

All persons who attend this sale do so at their own risk. Dahl Land & Cattle Co. and Napoleon Livestock Market assume no liability for any accidents that may occur. Neither do they assume any liability for loss or injury to livestock due to theft, mysterious disappearance, sickness, improper handling or Act of God.

Herd Veterinarian:

Dr. Dan Schuler, Wishek Veterinary Clinic

Health:

All cattle in this sale are in excellent condition and health. All females have been officially calfhooed Bangs and Preg-Guard Gold 10 vaccinated. All shots and treatments comply with the ND Beef Quality Assurance Program and Pfizer's Beef Friendly program. Where needed, health certificates will be furnished for shipment anywhere in the U.S. Sight Unseen Purchases are fully guaranteed for soundness and quality.

Contract:

The above terms and guarantee constitute a contract between buyer and seller of each animal sold.

Bull Delivery:

- \$25 discount if you take your bull home sale day
- If buyer can't haul bull on sale day, we will feed your bull at our feedlot, buyer's risk
- One week at no charge and \$2 per day thereafter
- We will waive the feed costs if the buyer picks up the bull within two weeks of sale date
- We will cooperate with delivery wherever possible

Purchased from Koester Red Angus, "Cheyenne Steve" really stamps all of his offspring with the same body type. His progeny are small-headed, clean and smooth-shouldered, and display good length of body. "Cheyenne Steve" sires calves that display tons of calving ease and style, and have as much performance as the big guys.

9152 is a taller, smoother made Rob Roy son that we used to produce many of the Optimizer bulls in this offering. 9152 progeny have style and extra length of body. His dam is a beautiful Logan daughter with tremendous fleshing ability and body length. She has a perfect udder and good feet and legs.

SALE INFORMATION

We Apologize!

Due to the weather this spring and calving we didn't get any sale bull photos. If you would like to see the bulls we encourage you to stop by and analyze them.

EPD NOTES

Expected Progeny Differences (EPDs) give cattlemen a useful tool with which to evaluate the genetic potential of breeding animals.

The printed EPDs in this catalog have been furnished to us by the Red Angus Association of America and the North American South Devon Association.

55T is a very stylish, correctly structured bull who stamps his offspring with those traits. "He is truly a female maker!" His sons and daughters are lighter boned, long bodied and moderately framed. 55T is out of one of our best Bolero cows who was a pleasure to look at and have on the ranch. 55T offspring should be strong maternally and with very good carcass traits. Co-owned with MJB Ranch of MT.

PUREBRED YEARLING HEIFER OFFERING

Purebred heifers will be selling in groups of 10.

Buyers will have the option to purchase choice two times, then the balance will be sold to go.

Group 1: 10 head of purebred Red Angus heifers.

Group 2: 10 head of purebred South Devon heifers.

COMMERCIAL YEARLING HEIFER OFFERING

Commercial heifers will be sold at a minimum of five head gate cut. On bigger drafts, the buyer of the last heifers in the ring (should there be a cut made), will have the option to take the remaining heifers of that group for the same price.

Group 3: 10 head of 75% Red Angus heifers. Pr♀-Cow

Group 4: 30 head of Red Angus x South Devon heifers. Pr♀-Cow

Group 5: 20 head of black Red Angus halfblood heifers. Pr♀-Cow

Group 6: 20 head of Red Angus x Salers halfblood heifers. Pr♀-Cow

Group 7: 20 Red Angus x Salers halfblood heifers. Pr♀-Cow

Group 8: 10 head commercial South Devon heifers.

Red Angus Replacements for Professional Cattlemen

The maternal qualities of Red Angus females make them an obvious cornerstone for commercial cow/calf operations.

- Early Puberty with High Fertility
- Easy Calving
- Moderate Frame with Low Maintenance
- Maternal Efficiency
- Longevity
- Docile Disposition
- Unbiased, Reliable EPDs
- "Angus" Carcass Qualities

Here's the first Fat Tony son in the sale. Moderate birth weight with style, plus he weaned off the cow at 746 lbs. with no creep!

These are the behind the scenes force that keep the cattle moving through smoothly on sale day. (L to R) Gary Reed, Jay Reed, Ben Bowman, Andrew Dosch and Jeff Bowman.

A calving-ease candidate according to his pedigree and individual numbers.

South Devon Dominate in Efficiency

NASDA News, Fall 2012

Eleven fall-born South Devon bulls out of MJB Ranch were efficiency tested at Midland Bull Test facility with very impressive results. The bulls were fed with a larger group of fall-born Angus bulls and, as you can see from the chart, every South Devon bull was negative for RFI with fantastic feed conversion (the more negative the number for RFI, the more efficient the bull is).

Why is it important to test a bull for feed efficiency? This is a highly heritable trait and the big factor will be the daughters that these bulls produce. Efficiency is going to be the key to staying alive in the cow business. It seems that our input costs increase every day which means the cows have to work even harder, and those hard-doing, bring-me-a-feed-bucket kind of cows will not pencil out anymore.

South Devon shine when put on an efficiency test, especially when compared to "more popular" outside breeds. Once again, these cattle are proving that they are impressive in a number of traits – not just a couple.

Number	BW	WW	ADG	DMI	FCR	RFI

Heifer bull candidate.

INFORMATION ON EXPECTED PROGENY DIFFERENCES (EPDs)

Red Angus Guide to EPDs

Courtesy of the Red Angus Association of America
For more information on EPDs, visit redangus.org.

CED Calving Ease Direct – predicts the probability of calves being born unassisted out of 2-year-old heifers.

BW..... Birth Weight – predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

WW Weaning Weight – predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age).

YW..... Yearling Weight – predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age).

Milk Milk – predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

TM Total Maternal – predicts the rancher's actual observation of weaning weights of calves raised by an animal's daughters. $TM\ EPD = Milk\ EPD + 1/2\ (WW\ EPD)$

ME Maintenance Energy – predicts a bull's daughters that will require less feed to maintain her body weight and condition; thus increasing profit ability.

HPG..... Heifer Pregnancy – predicts the probability of heifers conceiving to calve at two years of age.

CEM Calving Ease Maternal – predicts the probability of a given animal's daughters calving unassisted at two years of age.

STAY.... Stayability – predicts the probability that a bull's daughters will remain in the herd until at least 6 years of age.

MARB .. Marbling Score – predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

YG Yield Grade – predicts differences in USDA Yield Grade score, and is expressed in USDA Yield Grade units.

CW..... Carcass Weight – predicts differences in hot carcass weight and is expressed in pounds. Because Red Angus' CW EPD is a multi-trait.

REA Rib Eye Area – predicts differences of carcass Rib Eye Area between the 12th and 13th rib.

FAT 12th Rib Fat Thickness – predicts differences for carcass fat depth over the 12th rib, as expressed in inches.

South Devon Guide to EPDs

For more information on EPDs, visit southdevon.com.

Birth EPD (pounds) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

Weaning EPD (pounds) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 205 days and for age of dam. This EPD is the best single estimate of an animal's genetic merit for growth to early ages.

Yearling EPD (pounds) is calculated from the weight of progeny taken between 301 and 450 days of age, adjusted to 365 days and for age of dam. This EPD is the best single estimate of a sire's genetic merit for yearling weight.

Scrotal Circumference EPD (centimetres) is calculated from measurements of scrotal size in yearling bulls, adjusted to 365 days. Scrotal circumference is a good indicator of puberty, fertility and semen quality/quantity. Increased scrotal size will also result in decreased age of puberty in daughters and greater lifetime production. Positive EPD values indicate larger scrotal circumference.

Milk EPD (pounds) is an estimate of an animal's milking ability. For sires, this EPD indicates the effect of the daughter's milking ability, inherited from the sire, on the weaning and yearling weights of her calves. For dams, it indicates her own milking ability.

Maternal Weaning Weight EPD (pounds) is a combination of Milk and Weaning EPDs and estimates the genetic merit of the animal to produce a calf at weaning.

This steer was part of a load sold on 11/12/10 off the cow with a pay weight of 667 lbs., no creep and topped the market that day. Here is what the buyer said about that load.

"There were zero treats and zero death loss, extremely happy with them. These cattle shipped to Knobbe Feedlot, Westpoint, NE. Thanks again Dahls for the many years your ranch has allowed me to represent your Ranch. "Tremendous Pride" is the most fitting word I can describe when I get to call a feedlot to market animals raised on the Dahl Ranch."
