Welcome to our First Annual Sale together as the Flat Water Red Angus Gang. While this is the first sale that we've held together under this title, this is actually our 4th Annual sale together as a group of breeders. We are excited to be moving forward together in this new venture and are confident that the quality and depth that you have come to expect from each of us will meet your expectations. The goal of our operations and the goals of this sale have not changed. We are still dedicated to producing and marketing highly maternal, problem free, Red Angus cattle.

As producers in today's agricultural environment, we are all riddled with potential and real risks that threaten to inhibit our ability to be sustainable and profitable. While the most prevalent topic on our minds may be the blistering drought that we are all praying will end soon, there are hosts of other challenges and outside perils that are equally as threatening.

Available data from the most recent Ag Census, as reported by the USDA, shows an alarming, yet not surprising trend. The data shows that the number of beginning farmer and ranchers as a percentage of total U.S. farm and ranches is decreasing on a consistent basis. In addition, that same set of data reveals that most of the beginning farmers and ranchers rely on more off farm income than on farm income as a percentage of total income.

This tells us two things. First of all, there are a small number of people that want to return to the farm and ranch and as such the average age of the U.S. farmer or rancher is increasing. Secondly, this tells us that in order to be profitable as a sole farm and ranch operation, with no outside income, it takes an ever increasing number of cows in order to achieve profitability on slimmer margins as a result of increases in annual input costs in the way of fuel, feed, equipment and family living.

In essence, time matters. There is a reduced labor pool available to today's rancher at a time when it takes a greater number of mother cows to make a living. This equates to a larger burden on an aging ranch force. It equates to a young producer that is splitting time between a day job and the ranch operation. It equates to the need to have maternal based genetics that are efficient, functional, sound, fertile and sustainable.

There is a huge opportunity amidst all of this volatility and stress. Today is a genetic opportunity to create a herd that is built upon the foundation that the Flat Water Gang is dedicated to. We are raising maternal, problem free Red Angus genetics and are doing so in a manner that is beneficial to our customer. We don't over feed our bulls for our gain. We develop them slowly and responsibly for yours.

With utmost sincerity we thank you for taking an interest in our program and hope that you will take the time to contact us with questions so that we can better meet your needs and help you with your genetic selections.

Make a decision to ride with the Flat Water Gang and raise cattle that are the boss and envy of the prairie.

FLAT WATER GANG *Red Angus*

Monday, March 25th, 2013

1:30 p.m. CDT • Valentine Livestock Market, Valentine, Nebraska

Cookies, rolls and coffee will be provided in the morning • Complimentary lunch will be served starting at 12 noon

Cattle Viewing:

The Birnie and Sandbur Ridge bulls can be viewed at Sandbur Ridge's facility near Petersburg, NE, until March 22nd. Cooksley's bulls can be viewed at their ranch 4 miles north of Anselmo, NE, until March 22nd. After this time the bulls will be at the Valentine Livestock Market.

Sale Video:

Video of the sale cattle is available at flatwaterredangusgang.com or dvauction.com.

Cattle will sell in catalog order.

Selling:

- 81 Registered Red Angus Yearling Bulls
- 26 18-Month-Old Registered Red Angus Bulls
- 40 Commercial Red Angus Replacement Heifers
- 30 Commercial Red Baldy Replacement Heifers
- 1 Broke Ranch Horse

Sale Day Contacts:

- Auctioneer: Scott Weishaar (701) 872-5299
- Myron Edelman – Red Angus Association..... (307) 351-6032
- Chris Beutler – Midwest Messenger..... (402) 380-8244
- Rowdy Benson – Tri State Livestock News..... (605) 430-2942
- Beau Bendigo – Cattle Business Weekly..... (605) 515-3223
- Greg Arendt – Valentine Livestock Auction..... (402) 376-4701

- Ben Cooksley:..... (308) 872-1007
- Ross Knott: (402) 843-8726
- Miles Cooksley: (308) 880-0566

- Valentine Livestock Auction:..... (800) 682-4874

Livestock Insurance:

Insurance available through Grassroots Insurance Associates, Mark & Deidre Smith..... (515) 965-1458 or (515) 229-5227

All purchases are the buyers' responsibility as soon as they are sold.

Accommodations in Valentine:

- Valentine's Niobrara Lodge (877) 376-3003 or (402) 376-3000
- Comfort Inn..... (402) 376-3300
- Dunes Lodge & Suites..... (402) 376-3131
- Trade Winds Motel (402) 376-1600

Guarantee:

All bulls are guaranteed breeders and are guaranteed healthy on sale day. They will have passed a semen test and breeding soundness exam. Scrotal measurements will be available sale day. Bulls are guaranteed to be breeders during the first breeding season. Breeding season is defined as the 90 day period following the first turnout of the bulls. Individual breeders will work with customers on a case-by-case basis concerning guarantees.

Delivery and Load-out:

We are offering free delivery to all points in the State of Nebraska. Delivery to other states will be at the lowest cost possible from the seller's base operation. Bulls not delivered by April 15 will incur a \$4 per day feeding cost thereafter. A \$100 credit will be offered for bulls taken home on sale day by the new owner.

Sight-Unseen Purchases:

We encourage you to utilize DV Auction, Inc. as a means to facilitate your absentee purchases. However, if you are unable to use this service, please feel free to contact any one of the respective breeders or sales day contacts to accommodate your requests. Let us know your needs and budget range and we will work with honesty and integrity to help purchase the best possible bull on your behalf. If you are unsatisfied with the purchase, then you don't own the animals.

Terms and Conditions:

- The Auctioneer will settle any disputes as to bids, and his decision on such matters will be final.
- All sales are cash in U.S. funds unless prior arrangements have been made with the sellers.
- Any announcements made on sale day take precedence over printed material.
- Health certificates will be furnished for shipment anywhere in the United States.
- Any death or injury after the animal is sold is at the buyers' risk.
- Anyone attending this sale attends at his/her own risk.
- A retained interest by the seller will be designated as such in the sale. The buyer receives full possession and full salvage value on all bulls with a retained ownership interest.
- All registered cattle sell under the suggested Sale Terms and Conditions set forth by the Red Angus Association of America.

Catalog and Promotion:

SANDBUR RIDGE RED ANGUS

Welcome to our Fourth Annual Production Sale, and our first as the Flat Water Gang. While the members in this year's sale group have changed a little, the quality of the bulls in the offering is outstanding and the customer service will continue to be priority number one.

2012 was a year of outstanding challenges and one wonderful change for me and my operation. On May 28th, in Ord, Nebraska, I married Dani, and that has been a wonderful change in my life. As for the challenges, well, we all know the drought has forced us to make decisions and analyze our operations in order to try and move forward. I am thankful for the breeding decisions we made about 5 years ago as they have turned out to be very helpful when dealing with less quality forage and high priced feed. I really believe this offering of bulls holds as much quality from top to bottom as we have ever produced.

I have broken our yearling bulls into 3 groups. We are starting out with a few front end bulls that offer fresh pedigrees and outstanding individual performance. I followed those up with a sire grouping of 5L Legend 425V and MLK CRK Express 9127 bulls. I feel the 425V and 9127 sire groups offer the best overall balance of birth weight, growth, carcass, and are the kind that will build some outstanding females for the future of your operation. The second group of bulls contains our calving ease offering. There are 5 different sire groups represented and they all seem to have the softer body condition and outstanding confirmation that will allow them to cover your heifers or cows for years to come. The final group of yearling bulls contains our growth bulls. These are larger framed, higher birth weight bulls that will sire heavy calves in the fall and leave you with a high performance oriented female should you choose to keep replacements. The aged bulls are embryo calves that have combined some of the best of the older pedigrees and newer pedigrees in the breed.

The bulls were ultra-sounded on February 17th and the results confirm that we are breeding natural muscle and thickness as opposed to feeding it on to them. This year's group of 54 bulls averaged 1.23 square inches of REA/CWT. In 2012, they averaged 1.26 and in 2011 they averaged 1.26. This speaks to the approach we have taken to breed well-muscled, big volume cattle that can be sustained for longer periods of time on lesser quality feeds and still rebreed and maintain body condition.

Thank you for your interest in our program and I look forward to visiting with you

Knott Family

about our offering. I would also encourage you to talk with others who have purchased bulls from us in the past and get their input and experiences with our bulls. I hope 2013 will be an outstanding year for you and your operation.

COOKSLEY RED ANGUS

Cooksley Family

As another bull sale approaches, I look back on the previous year and it was a test of one's resolve. Between the drought and the widespread fires, it was a certainly a year that won't soon be forgotten. As we move forward with the lowest cow numbers in recent history it is an exciting time to be in the cattle business.

Perhaps the most rewarding part of what we do is working together as a family on our operation. With the exception of Jilleen, my crew has gotten another year older and has developed into quite a formidable force around the ranch. We have a lot of fun together and it is a daily reminder that we are thankful and fortunate to share the lifestyle and family environment that we do. Thanks for your interest in our program and we look forward to seeing you on sale day, or sooner.

BIRNIE RED ANGUS

Welcome to the first annual Flat Water Red Angus Gang production sale and the fourth consecutive sale that we have been a part of with Cooksley Red Angus and Sandbur Ridge Red Angus. We are all very excited about seeing past customers, friends and new customers in Valentine on the 25th of March. Milissa, our family and I are thankful to be a part of this group of breeders and look forward to this event each year.

This set of bulls represents the long term direction of our program more than any other that we have offered previously. We have been able to accomplish this by utilizing two primary herd sire groups. The first is centered upon our main A.I. herd sire, Milk Crk Express 9127. He offers calving ease, fleshing ability, depth of body, width of base and natural thickness on a moderate frame. His first daughters have calved this year and thus far, we couldn't be happier with the results. They are capacious, soft and exhibit excellent maternal qualities.

The second sire group is courtesy of our top walking herd sire, Ridge Troubadour 0014. He is a 5L Tradesman son that has unparalleled depth and production on the maternal side of his pedigree. We purchased this bull from Sandbur Ridge in order to focus in on longevity, fertility and sustainability. Realizing that these traits are some of the least heritable only increases the need to try and propagate and select for them. Troubadour offers a nice balance of calving ease, length of side, power and carcass quality with a foundation of maternal strength.

Our bulls were developed again with Sandbur Ridge Red Angus' bulls. We have been growing our bulls together for the past 4 years. Despite the sticker shock on feed and input prices, Ross and I agreed to maintain our development ration and program due to the positive feedback that we have received from our customers in respect to the durability and longevity of the bulls that they have purchased. The bulls are developed and grown on a DDG, grain and oats mixture with free choice hay. The grain mix never exceeds 1% of body weight and is actually held at a maximum level from mid-January on. We are not trying to maximize performance. We are trying to maximize longevity and soundness in our product. The bulls gained 2.72 lbs. per head per day from weaning to yearling date and averaged 1.30 sq. inches of REA per CWT.

Thanks for the opportunity to serve your Red Angus genetic needs. We look forward to visiting with and seeing you all on sale day. Please feel free to contact us with any questions that you may have. We welcome you to stop by if you are in our area. We welcome visitors and always like to visit about cattle.

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- 1) Visit the DVAuction web site at www.dvauction.com
- 2) Click on the "Register" tab
- 3) Enter a user name, password and your contact information.
- 4) Click on "Apply for Bidding."
 - Select the sale from the list of other auctions and click "Apply".
 - Complete the process by filling out the Banking & Lending information requested.
 - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call (402) 316-5460.
 - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Profit \$implified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared - regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

One of the most impressive calving ease bulls in the breed today. 9127 sires wide-based, easy fleshing cattle that are structurally sound and stylish. He sires solid bull calves with depth, muscle and spring of rib on moderate frames. His daughters exhibit a lot of dimension and capacity with solid udder structure and soft dispositions. 9127 has the best disposition of any bull we've ever been around. Owned by Birnie Red Angus, Milk Creek Red Angus and Sandbur Ridge Red Angus. Exclusive semen packages are available.

Structurally sound from nose to pins, this Tradesman son exhibits tremendous depth, volume and muscle pattern on a moderate frame. His spread from birth to yearling displays an ideal growth pattern as exhibited by his 94 BW ratio, 109 WW ratio, and 103 YW ratio. Maternally, Troubadour stands alone with unparalleled depth in production and longevity as his mother, grandmother and great grandmother, never missed a calving opportunity and display MPPAs of 106.5, 103.8, and 104.7 respectively. One would be hard pressed to find this much proven consistency, longevity and production in a cow family anywhere in the industry. Owned by Sandbur Ridge Angus and Birnie Red Angus. Semen available.

Mighty Mouse was Cooksley's pick of the 09 5L sale. His good disposition and easy going nature are well known. His calf crops have displayed low birth weights with lots of performance in very moderate packages. He has been the lead herd sire at Cooksley Red Angus for the last few years. Owned by Cooksley Red Angus and 5L Ranch.

733 is a red Blazin Ram son out of what I think is the best cow we have ever raised. 915 is a cow you wish you could have a whole herd of. She will out milk and perform cows with twice her size and EPDs. Her small frame and -8 ME really set her apart from most cows. The only calf bull or heifer we have ever let go of was a Sakic Bull to Wilde Ranch that was one of the high selling bulls in 2011. Owned by Cooksley Red Angus.

Herd Bull Prospect. We had this bull 50K tested to see if the BW was real and the results show that the actual birth weight is not a true indicator of the size of the calves this guy will sire. Loads of performance on a moderate frame, with a big rib eye and out of a first calf heifer that has another stud nursing this spring. Excellent opportunity to build a program around this guy. Retaining 50% Semen interest.

Outstanding potential in this moderate framed, dark red, meat wagon. Look at the ratios on this prospect, coming from a first calf Normandy Canyon daughter. She has calved again this spring and is doing an excellent job. Start him out on your replacement heifers and then turn him out for years to come to build outstanding females with extra volume and quiet dispositions. Retaining 50% Semen interest.

This rascal has been a stand out ever since my good friend, George, put his ear tag in backwards at birth. Seriously, he is a top-notch calving ease herd sire prospect out of a great young cow with a history of production and longevity in her pedigree. This bull is the cat's pajamas for calving ease and convenience traits. He is top 3% for BW and CED, top 14% ME and top 18% on HPG. His performance record falls in line perfectly with a 69 lb. BW for a 94 ratio, 658 lb. WW for a 110 ratio and 1103 lb. YW for 109 ratio. We are retaining a 1/2 semen interest.

Double Barrel is the stout calf that was pictured in our early advertisements this fall and winter. He is an impressive individual that we are having a hard time parting ways with. As my Grandpa John says, "he's broader than an axe handle and two bars of soap." 202Z represents the type of animal we are striving to produce. He is dark cherry red, with expansive rib shape, thickness and depth of body on a very moderate frame. To top it off, he displays excellent carcass qualities as shown by his 4.25 IMF for a 126 ratio and a REA of 12.14 in. for a 103 ratio. His performance record is 76 lbs. for a 104 ratio, 627 lb. WW for 105 ratio and YW of 998 for a 98 ratio. He is ideal for moderating frame and keeping mature cow size in check. We are retaining 1/2 semen interest.

A black/red carrier heifer bull with a nice pattern and shape that draws strong maternal qualities from the bottom side of his pedigree. He traces back to Steadfast Boaz, and a black red carrier named, SCC B602 Baron, that left us low birth weight daughters with perfect udders. He has an ideal growth curve as he started out at 70 lbs for a 96 BW ratio, weaned at 637 for 107 ratio and leveled out at 1047 lbs for a 103 ratio.

We love the combination of 9127 X Signature and hope to do a lot more of it in the future. This bull shows the width of base, depth of body and easy fleshing ability that we have come to appreciate from 9127. He should leave excellent females with desirable udder qualities. IMF ratio of 114 and REA ratio of 111.

One of the best EPD profiles of any bull in the offering with 6 EPDs in the top 17% of the breed. He is a calving-ease bull that doesn't sacrifice power and has excellent carcass qualities as highlighted by his 4.47 IMF (133 ratio), 13.03 REA (111 ratio). His dam is a moderate-framed, full-bodied young cow with length of side and strong udder and teat qualities. She bred back early and has a thickset Troubadour bull calf at side. Retaining 1/2 semen interest.

The first Troubadour son of mine to sell. This heifer bull comes from one of the very best cow families I have. His mother has a 102.8 MPPA, BW Ratio 90 WW Ratio 104 on 6 head, His Grand Mother has a 104.2 MPPA, BW Ratio 95 WW Ratio 105 on 10 head, His Great Grandmother has a 103.9 MPPA, BW Ratio 95, WW Ratio 104 on 13 head, and she just had a heifer calf at the age of 15. His Great Great Grandmother has a 100.4 MPPA, BW Ratio of 93 WW Ratio of 100 on 14 head. Show me another program that can produce this type of cow family. Retaining 50% Semen interest.

We really like the way the Norseman King X Troubadour combination clicks. This bull shares the same maternal lineage as lot 61 and they are as good of dispositioned cows as we have in our herd. Remember that Ridge Troubadour 0014 is backed by 4 generations of longevity and production. If you plan to build a herd with heifer retention, these Trouby sons are hard to beat.

This is one of those bulls that has been sneaky good. He kept coming on as he grew out and has a great hip with muscle expression and style. His dam is a very quiet cow that eats cake from our 5 year old's hand. We have a daughter of 241's that is just the same that has a Troubadour bull selling as the next lot. Take notice of the moderate birth weight of 76 lbs and the excellent carcass qualities. He's finer than cream gravy and won't be hard to find in the pen come sale day.

The Troubadour progeny have a longer pattern to them and this bull is no exception. He will be best suited for mature cows. His dam is one of my old favorites that we bought from Cooksley's several years ago. She is a dark red, easy fleshing, moderate framed old gal that is still solid at 12 years old.

Holy heifer bulls, Batman! A 58 lb. actual birthweight that places him in the top 1% of the breed for BW and top 5% CED. He started out small but had a positive growth trend all the way through. We initially thought he was sired by Ridge Empire 0028, but he has been parent verified to 9127. There are a limited amount of 9127's available this year. This may be your last chance.

Colin Cooksley running one back

The final Atlas son is from an excellent Normandy Canyon daughter with a 104.9 MPPA. I intentionally mated the Atlas bull to similar pedigree cattle to line up the goodness in the Canyon based genetics and to increase the predictability of their progeny. These bulls will work in several different environments.

Commercial bull. Lots of muscle and style in the deep red bull. He is out of a purebred bull and purebred cow. I thought he was an ET calf but could not get the DNA to match with the egg we put in. Don't know what happened but this is a very good Red Angus bull.

"Paycheck" is a super neat gelding that is going to make a really nice horse whichever way you take him. He has a sound mind with a really cool personality. This horse is smooth moving, athletic and really handles himself nicely. Check out his breeding, this guy can move. He is green but is riding really solid and is very sound with good bone and feet. He is tracking cattle and being pen roped on and handles everything like a pro.
