LEAVE 'EM AND BREED 'EM PROGRAM

Heifers not picked up at sale time may be left at Loonans on the "Leave 'Em and Breed 'Em Program."

Loonans will furnish the feed, vaccinate, pelvic measure, breed to calving ease bulls and ultrasound for pregnancy the first of each month on any heifers which have been with the bulls 70 days or more. Turnout date will comply with buyer's request as nearly as possible.

Buyers may then pick up their heifer(s) with pregnancy guaranteed to date of pick up. There is no guarantee beyond pick up time.

The charge is \$1.50 per day from sale day until heifers are confirmed pregnant and the buyer is notified. Ten days after the buyer is notified, the charge will go to \$2.00 per day to encourage prompt pick up.

130 Bulls

Purebred and Percentage • Affordably priced at \$2,400, \$2,600 or \$2,800

BULL SALE TERMS

- Buy your bulls February 2 and we'll keep, feed, vaccinate, pelvic measure, carcass ultrasound & semen test.
- You may pick up your bulls after testing and prior to June 30 or, Loonans will deliver – free – up to 300 miles when in your area (over 300 miles, please inquire).
- Delivery will begin April 1 and be completed by May 10 when we start our AI season.
- If you cannot take your bulls when deliveries are made in your area, you may pick them up at Loonan's later (prior to June 30). Let us know.
- Bulls not sold February 2 will remain on sale until sold out, as in previous years.
- If you cannot be present February 2, we will have a representative on-hand to handle written and phone requests on a "least cost" basis. Satisfaction guaranteed.

80 Replacement Heifers

PUREBRED HEIFERS & SHOW PROSPECTS

Heifers will be priced individually and in groups – \$1,200 - \$1,500 (registration available).

RED ANGUS

Purebred individual and group heifers selected to represent our Red Angus program. Dependable, balanced genetics that would make excellent foundation females.

F1 RED ANGUS-SIMMENTAL CROSS

Several individual and group heifers with show or seed-stock potential.

SIMMENTAL

Most are sired by solid red, non-diluter, high-performing sires.

COMMERCIAL

HERD REPLACEMENTS

Heifers will be sold in uniform lots of 3-5 head, unregistered, but eligible, starting at \$800.

F1 RED ANGUS-SIMMENTAL CROSS

We are selling our entire 2012 production of F1 heifers – none held back. This is an outstanding, well-bred set of maternal females.

SIMMENTAL PUREBRED

After 38 years of performance selection, this is quite a set of heifers.

PUREBRED RED ANGUS (UNREGISTERED)

Many younger, moderate-framed heifers which will make good commercial herd replacements or additions to a registered program. They are priced unregistered, but eligible to register at \$20 per head, additional charge.

HEIFER SALE TERMS

- All heifers should be paid for sale day. Any not paid for within 30 days will be considered not sold, in order to complete the paperwork. You may pick up your heifers sale day and take them home, or leave them on the "Leave 'em and breed 'em" program. (Please inquire.)
- Thank you for your cooperation. We cannot deliver heifers as we start calving next week.

Welcome,

Welcome friends to our 38th annual sale and my 16th sale. It's been a great 16 years getting to know all of you. I have enjoyed talking with our customers and learning your thoughts about the cattle industry. Another year is upon us and we would like to thank you for your past patronage. It was quite a year with a summer full of hot weather and not a lot of rain. But it will rain again and, when it does, the cattle business will still be strong. If we stay the course and continue production we will all prosper for our commitment to the cattle industry.

Judy and I plan to continue raising high-quality cattle that the commercial producer is looking for. It is our goal to raise structurally sound bulls and females that excel in the feedlot and the pasture. Quiet dispositions and good maternal traits are a must in our operation and we will continue to strive to maintain these goals.

We are open to your thoughts. We want to know what you are looking for in you herds and our goal is to produce that product for you. With record-high feed costs, it is very important to have efficient cattle that grow rapidly and finish quicker. We think that the bulls and females in our sale offering can help you achieve this.

The sires of the offering are the same as last year

Judy Loonan

Rick Thompson

with the addition of Real Deal, our new outcross Simmental sire. As a special note this will be the last year we can offer Jubilation ST642 calves as we have used all the semen we had collected from him. He has been a great asset to our program and has produced exceptional calves.

This is a very outstanding set of bulls and females. If you are in need of a bull or female, let the Loonan program help move your herd in the right direction. Please join us February 2, 2013, and let us help you achieve your goals. Hope to see you on the 2nd.

Thanks again for your patronage.

Judy and Rick

Care and Management of Yearling Bulls

We occasionally receive questions regarding the proper care and management of yearling bulls. The following suggestions came from other seedstock producers and extension beef specialists:

1. Yearling bulls coming off test need to be in good condition in order to withstand the expected 100-300 lbs. weight loss during breeding season. Between the test period and start of breeding season, 8-13 lbs. of grain plus good quality hay or pasture is suggested.
2. During breeding season, young bulls are still growing in addition to their breeding duties. Semen production takes 60 days and poor pasture or inadequate nutrition can severely affect libido, semen quality and quantity.
3. A maximum 60-day breeding season is suggested for yearling bulls, or rotation, to allow them time to rest.
4. Following the 60-day breeding season, proper nutrition can pay big dividends in future development and usefulness of the young bull. This is a very critical age as they start losing their teeth at 18-24 months of age and cannot utilize roughage as well as with permanent teeth. Research indicates that a bull's usefulness as a two-year-old can be retarded if not properly reconditioned after use as a yearling. Feeding 10-15 lbs. of grain (depending on condition) until the bull is two years old, will help recover the lost weight and provide the nutrition needed for continued growth.
5. Annual deworming and treating for lice when needed helps reduce stress and improves feed efficiency.

These guidelines were developed by beef specialist to help maximize the benefits of superior genetics.

Sale Terms & Conditions

Health

Bulls and heifers were vaccinated by a licensed veterinarian as calves, including 7-Way, Blackleg, Hemophilus, BRSV, IBR, BVD, pasteurella and dewormed. Heifers were calfhood vaccinated for brucellosis.

Registration

On registered females, please give your name, address and association number to the clerk and the seller will transfer at no cost to the buyer. Unregistered females were priced without papers to keep the cost down for the buyer. If registration is desired on unregistered animals that are eligible for registry, seller will handle the paper work with the buyer to pay \$20 per head. On bulls, seller will pay this cost if you desire registration papers. Please notify the clerk.

Sale Procedure

- All cattle are priced in the catalog at affordable prices.
- No cattle are sold or reserved prior to 1:00 p.m., Saturday, February 2, 2013.

Selling Procedure

Cattle are ready for inspection now. All are affordably priced in the catalog. Please register as you arrive February 2nd. Sale order will be determined by the buyer in order of registration. If your selection is called to the ring prior to your buyer number being called, you will have the privilege of raising the bid. Normally, some bulls sell at the listed price and some bring more if several buyers are interested in the same animal, but every buyer has an equal opportunity to buy the bull of their choice.

If you cannot attend February 2nd, we can make arrangements to have someone represent you on a least-cost basis. Satisfaction guaranteed.

Sale Order

Bulls will sell first, starting promptly at 1:00 p.m., February 2, 2013. *None are sold or reserved ahead of time.* We plan a 15-minute break following the opening round of the bull sale to allow buyers who need additional bulls to make their selections.

Heifers will sell following the break at approximately 3:00 p.m. and will be sold under the same procedures as the bulls. If you have any questions, give Judy or Rick a call.

Guarantee

All cattle carry the standard breeding guarantee of the respective breed association. Bulls will be semen evaluated with a certificate furnished. Bulls will be wintered on a high roughage test ration, semen tested and ultrasound scanned in March. You may pick up your bulls beginning April 1st or Loonans will deliver when in your area. Most deliveries are made April 1 to May 10. Please contact Loonans on cost of deliveries over 300 miles.

- Dandy came out of the '08-09 Montana Midland Bull Test (MBT) where they weigh the individual feed and the individual bulls.
- With 200-plus Red Angus bulls on test, Dandy ranked:
 - #1 in MBT overall index (120 ratio, 1:4 ADG ratio, 1:4 YW ratio, 1:4 nursing ratio, 1:4 feedlot efficiency ratio)
 - #2 in RFI (residual feed intake) feed efficiency (#1 was his half brother)

- #2 in ADG at 4.06 lbs. per day (131 ratio). Only two bulls in the test gained over 4 lbs. per day on the 80% roughage ration
- 81-lb. actual BW, 4.06-lbs.-per-day ADG (131 ratio), -5.00 RFI
- We have some outstanding calves by Dandy again this year
- His calves carry more frame

- HSR Dakota Beef U653 topped the Dakota Xpress Sale in North Dakota at \$12,000 when we bought him.
- Dakota is moderate framed, deep bodied and had a 114 WW ratio and a 112 YW ratio.
- He makes a great combination on our own many Earthquake daughters, ranking in the top 1% of breed for WW, YW, MWW, CW and REA.

- Dakota not only has breed-leading EPDs, but his calves are impressive here.
- The four consignors at the Dakota Xpress sale commented, "He's better than the A.I. bulls." So before we could get him picked up, they collected him and divided the semen.

- Earthquake is rapidly becoming one of the nation's top Red Simmental sires.
- A moderate 6.1 frame, thick bull that topped the Sioux Empire Sale.
- A rare combination light birth weight and heavy yearling weight trait leader.
- A non-diluter (both black parents) will not cause gray calves out of black cows.
- Earthquake's EPDs get even better each year as more data on his calves enters the national data bank. The birthweight and calving ease is getting even better and all performance and carcass EPDs continue to improve.
- Take a look at the recent analysis from the American Simmental Association.

- He is one of those rare bulls that excels in calving ease and light birthweight, growth traits and carcass without shortcomings in any other trait.
- He is an excellent choice to complement English-bred females to increase pounds and carcass cutability.

- A top-selling bull for the Fink program in North Dakota.
- Shear Force is a moderate-framed, top calving-ease Simmental that excels in milk, marbling, ribeye and maternal weaning weight.

- A dark red son of Shear Force that throws feminine females and good-doing bulls.

Two Added Value Options

Red Angus FCCP

GENETIC + SOURCE + AGE

Combines Access to "Angus" Product Lines with the Benefits of Source and Age Verification

- Traceability to at least 50% Red Angus Bloodlines
- Source Verified to Ranch of Origin
- Group Age Verified

Example: FCCP

Commercial cow herds utilizing only Registered Red Angus bulls

Allied Access

SOURCE + AGE

Providing Solutions for Crossbreeding Programs

- Source Verified to Ranch of Origin
- Group Age Verified

Example: Allied Access

Crossbreeding programs utilizing multi-breeds, hybrids or composites.

Rancher Friendly Enrollment

- Contact Red Angus at (940) 320-8316.
- Tags are shipped and applied at ranch of origin.
- Return your signed customer Enrollment Agreement.
- Send a copy of your Calving Record(s).
- USDA approved Certificate of Compliance issued.

Still the Best Value at 99¢ & No Enrollment Fees!

Combo sets available for \$3 per set (Panel & EID)

Red Angus Bulls

R3W – A son of Nebula U553 out of a Warrior first-calf heifer.

R5W – A Jubilation ST 642 son with a 106 YW EPD.

R21W – A two-star, smooth-bodied U049 son with a -7.3 BW EPD.

R25W – A Nebula U049 son with lots of thickness and length, weaning at 824 lbs., no creep.

R30W – A Jubilation 42W x Hustler bull with length and an 82-lb. birthweight.

R32W – A Hasten W753 x Pure Country son with a 0.63 Marb EPD.

Red Angus Bulls

R52W – Bred-in natural thickness, weighing 994 in December.

R53W – An Accent x Hill Country son with thickness.

R59W – Dandy Day x Major League son with frame and style.

R72W – An Accent W226 x Hustler son showing both sires' characteristics.

R89W – A smaller-framed U049 son with bred alike EPDs.

R114W – A young April U049 son showing lots of promise, weighing 1000 lbs. in Dec.

	RE .27 P	BW History of Dam on 4 Calves: Range 76-110 Ave. 91# Cow Wt. 1560													
	BF .01 P	Own son of Jubilation ST642 which we no longer have any more semen on. He has a great pedigree with a Hustler dam and his granddam, 598L, is the dam of LSFR Hill 29U, and she is still producing in our herd. Look at his -2.7 birthweight and 102 yearling spread. He has lots of eye appeal. Two maternal brothers had 13.6 and 13.5 Rib Eyes and Choice + and Choice - marbling.

1769w's dam is a transplant female that we didn't get bled so 573L's calves are considered a Cat 111 even though she is a 1A. 1269G didn't fit in any group so we put her in this pen. You can choose one or both.																	

Profit Simplified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

A Look At Frame Score

One frame score equals roughly 2" in hip height.

We have agreed with our bull buyers for several years that the frame scores calculated for our catalog using the BIF formula seem unrealistically low. The bulls grow out bigger than that. For 2000-2004, we re-measured the bulls in March and compared that to the original frame score based on December measurements. In all cases the frame scores

went up. Some by more than a full frame score.

Note: *We hear a lot about the need for uniformity in beef cattle. Frame size measurement is not an exact science, but we do believe the uniformity in the entire Loonan program, along with the natural fleshing ability, is why calves by Loonan bulls excel on the rail.*

About The Catalog

RED ANGUS has four categories of registered Red Angus.
1A – Purebred 100% Red Angus with no disqualifying characteristics.

1B – 87% to 99% Red Angus with no disqualifying characteristics.

II – 86% or greater Red Angus blood, also 1A and 1B animals that are disqualified because of scurs, white in front of navel, etc. Multiple sire animals (more than one purebred bull in pasture) are also Category II.

III – Less than 87% Red Angus blood.

SIMMENTAL has a complete upgrading program from the half-blood to the purebred.

POLLED: P = Polled
P/S = Polled/Scurred,
DP = Double Polled (both parents polled)
H = Horned

EPDs (Expected Progeny Difference)

Simmental data is from the American Simmental Association, calculations by Cornell University formula. Red Angus data is from the Red Angus Association of America, calculations by Colorado State University formula.

Note: *Breed EPDs are useful for comparing animals within a breed but should not be used to compare animals between breeds due to the difference in the computer formulas.*

EPDs in the catalog are current as of this fall. When new data is processed by the associations, these figures will be updated and adjusted and the EPDs on your registration papers may not be the same as those available at sale time due to new data at the association.

EPD Terms

CEh – *Calving Ease Heifer:*

Simmental: Expected ease with which calves sired by the bull will be born to first-calf heifers. Highest (+) figures mean more unassisted births. Lowest (-) figures mean less unassisted births.

Red Angus: Expresses calving ease as CED (Calving Ease Direct). We have ranked each bull one-, two- or three-star based on the best information we have available on the individual and close relatives.

*** Should produce few calving problems when bred to first-calf heifers.

** Should work well on growthy heifers and cows.

* Recommended for use on cows only.

BW – *Birth Weight EPD*

Expected birth weight of calves sired by this bull. Heavier (+) or lighter (-) than "0" EPD animals are expressed in pounds. The BW EPD takes into account the genetics of the sire and dam and the actual birth weight of this bull. We weigh all calves on a spring scale within 24 hours of birth. We do not estimate any birth weights. Some calves born late on pasture are not weighed and are reported as UNK (unknown).

WW – *Weaning Weight EPD*

Expected weaning weight of this bull's calves, heavier (+) or lighter (-) than an animal with a "0" EPD are expressed in pounds. Weaning weight EPD takes into account the genetics inherited from the sire and dam in addition to the actual 205-day weaning weight of the individual.

YW – *Yearling Weight EPD*

Expected weight of this bull's calves at 365 days of age, expressed in pounds, heavier (+) or lighter (-) than an animal with a "0" EPD.

MCE-h – *Maternal Calving Ease EPD of first-calf heifer*

Simmental: Expected ease with which this bull's daughters calve as first calf-heifers. Larger positive figures indicate a higher percent of unassisted births (*MCEc* - cow).

MWW – *Maternal Weaning Weights EPD – Simmental*

TM – *Total Maternal EPD – Red Angus*

Expected weaning weight of calves born to daughters of this bull due to his contribution for growth and milk.

ME – *Maintenance Energy EPD – Red Angus*

The ME EPD predicts differences in energy requirements of mature daughters of an individual and is expressed in Mega-calories per month.

MM – *Maternal Milk EPD*

Simmental: Expected increase or decrease in weaning weight of daughters of this bull due to milk production compared to breed average. **Note:** *Data on this trait is limited, and, in many instances, has low accuracy.*

Marb – *Marbling EPD*

Predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass grades.

REA – *Ribeye Area EPD*

Predicts differences of carcass rib eye area between the 12th and 13th rib. Ribeye area is positively correlated with carcass yield grade which also considers fat thickness and carcass weights.

FAT or BF – *Backfat EPD*

Predicts differences for carcass fat depth over the 12th rib as expressed in inches. Fat thickness is negatively correlated with carcass yield grade which also considers ribeye area and carcass weights.

Red SimAngus™ –

The Red Angus Association of America and American Simmental Association have worked together to build a multi-breed database that includes SimAngus™. In the catalog, I have used the Association for the sire of each calf to publish as long as available.
