Quality Red Angus Cattle Bred to Function Efficiently

Welcome

Welcome!

We would like to take this opportunity to thank you for your interest in our program and for taking the time to look at this catalog. We welcome you to view the information that we have assembled through this catalog as well as additional material on our website such as videos of the bulls and carcass ultrasound information. The additional information was not available at the time that this catalog was printed so we are attempting to get that information to you as easy as possible. We want to make any information that will help you in your selection of genetics available to you in the easiest possible way.

What a difference a year can make from 2011 being abundant in hay and grass, to 2012 being very little hay and the grass from 2011 carrying us through the summer and fall of 2012. On a normal year hay aftermath provides some extra kick nutritionally, this year there was none available and weaning weights reflect that. We find that the cattle that “weather” challenges from the environment like this past summer are meeting the demands that we have placed upon them. They produce a calf from birth to weaning, breed back and require very low inputs to produce profitable outputs.

The 2013 offering of bulls continue to offer a consistent pattern with width of base, thickness over the top line, along with structural correctness to provide longevity to the new owner. There are numerous bulls in the offering that are able to be used on heifers with confidence. New to the offering this year is a group of SimAngus™ bulls. We selected two of our top proven cows and flushed them to two top proven Simmental bulls. Through this endeavor we are offering customers that want to crossbreed an alternative.

As you look through the catalog and EPDs, you will notice some changes within the EPDs. The Red Angus Association in cooperation with the Simmental Association have produced multi-breed EPDs that allow you the producer to compare Red Angus cattle to the Simmental cattle and the Gelbvieh cattle on a level playing field. As these changes were implemented the breed averages have changed, but the percentile rank with the breed has not. EXAMPLE: A “Proven” sire that previously had a 62 YW EPD now has an 83 YW EPD...but he is still only average. Obviously, he’s the same bull, so he’s still an average bull...his 21-lb. increase in YW EPD mirrors RAAA’s 21- lb. increase in the YW EPD base (reference from American Red Angus Magazine January 2013, or page 8 of this catalog). If you have any questions in regards to this change please feel free to give us a call.

We look forward to this time of year as it gives us an opportunity to meet many new people as well as visit with old friends about their challenges and goals in their cattle operations. We are blessed to be able to share common interests in this cattle industry with so many good people.

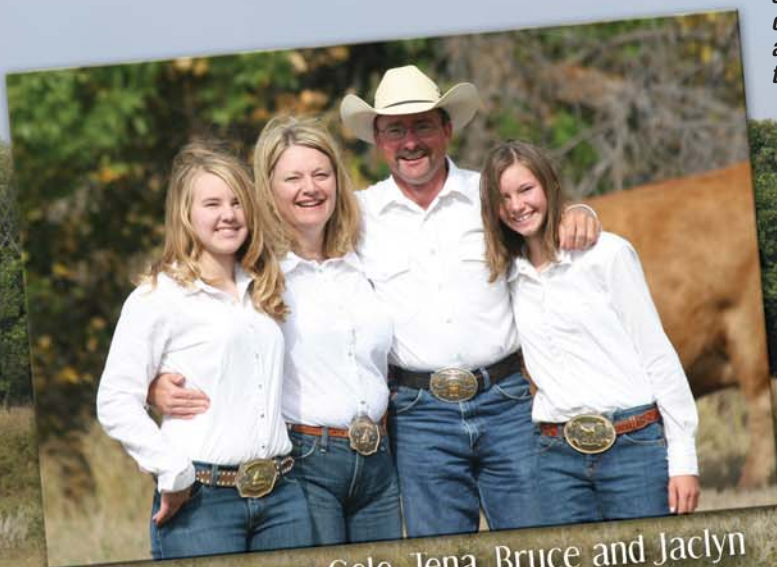

God Bless You!

Milk Creek Reds

Sale Information

Milk Creek Reds Bull Sale

Saturday, March 16, 2013

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling 69 Lots:

**62 Yearling Red Angus Bulls
7 Yearling SimAngus™ Bulls**

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

At the Ranch (see map on page 2 for directions)
2093 Plevna Road South, Plevna, Mont. 406-778-3819

CATTLE VIEWING:

The bulls can be viewed at Bruce & Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 13th. After this time the bulls will be at the ranch.

SALE VIDEO

The video of the sale cattle will be available to view at www.milkcreekreds.com or www.billpelton.com by March 1, 2013. If you don't have high speed internet or are unable to view the video over the internet contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

SALE CONTACTS:

Milk Creek Reds

AIR TRANSPORTATION

Billings, Mont. 230 miles
Rapid City, S.D. 190 Miles
Bismark, N.D. 230 miles

LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

ACCOMODATIONS:

Baker, Mont.

(If planning to stay please reserve early as the oil field activity can cause room shortages.)

Montana Motel 406-778-3315 or 800-779-8353
Roys Motel 406-778-3321
Sagebrush Inn 406-778-3341

Miles City, Mont.

Comfort Inn 406-234-3141
Holiday Inn Express 406-234-1000

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 300 miles. Over 300 miles we will work with the buyer to make arrangements on delivery. A \$50 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale. Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding and then are pre-conditioned in September with Pfizer One Shot Ultra 7, Bovishield 5 Gold. The bulls were poured with Ivermax in October and boosted with Bovishield 5 Gold. The Fusiguard was boosted in January and they were poured with Dectomax at this time. Semen evaluations are performed by Don Beck of the Fallon Co. Vet Service prior to the sale with all evaluations available sale day.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls for big country. They are fed to gain 2.5 lb per day. The ration consists of whole kernel corn (7.5 lbs), distiller's grain (1.5 lbs), and a mix of ground grass/alfalfa hay and ground hay barley. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb gain. They have been developed at Bruce & Eric Bowman's feedlot which is located 1 mile south of Rhame, N.D.

SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale..

Sale Information

WATCH AND BID ONLINE AT DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

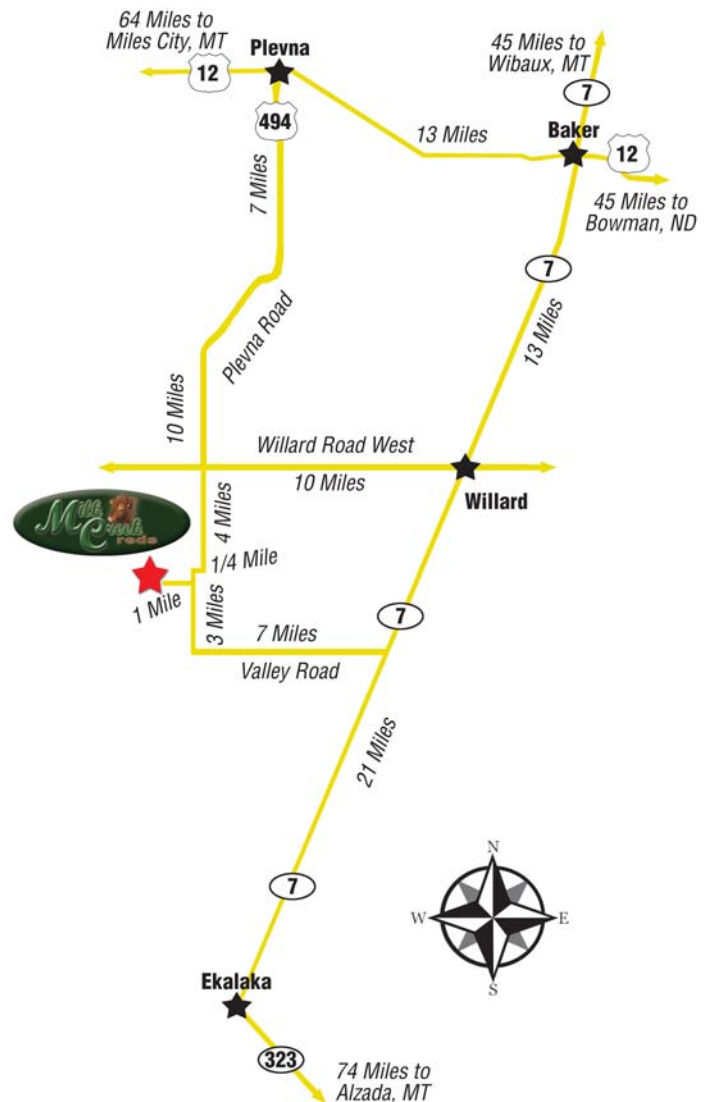

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

9141 is a bull that we retained out of the 2009 calf crop to replace his sire 5L Grand Express. He is a very attractive, moderate-framed bull that packs a lot of muscle and depth. He is also very easy fleshing and this picture was taken one month after he came out of pasture with 80 head of cows.

7153 sold in our 2008 sale to Heart River Ranch and Diamond B Red Angus. He sires dark-red, attractive calves that have plenty of performance. Heart River and Diamond B have daughters in production with very nice udders.

9240 was purchased in the fall of 2010 from Dale and Kay Lacy of Lacy Red Angus in Missouri. When we visited the Lacy's ranch, there were two sire groups of young cows that we really liked (moderate framed, easy fleshing, good feet and udders). 9240 combines those two sires and follows with the moderate frame and above average muscle.

Impressive is a Genex sire that was produced by Joe and Connie Musherush in Kansas. He is very moderate yet thick and deep. I think you will appreciate some of the lower quarter thickness in some of his sons.

This is the seventh bull crop out of the R397K sire. Through the years his sons have been well received because of the depth, thickness, and performance that they offer in a moderate frame. His daughters have also done a good job for us as you will see by some of the bulls in the offering that were produced by them.

924 was purchased at the 2010 Midland Bull Test to continue the genetics that we began with the TR Julian LT 142. 924 is a full ET brother to the LT 142 bull and was purchased as an embryo package by Holden Red Angus at the 2009 NILE and consigned to the Midland Test and sale. I think you will like the low birth weight and good performance that his sons offer.

0002 was purchased from Sandbur Ridge Red Angus in Nebraska in the Spring of 2011. He offers a good lower quarter and wide top with above average depth of rib and flank. He came out pasture the last two years looking as good as he went in which speaks to his easy-fleshing ability.

188V was our pick of the calving-ease bulls in 5L's 2009 sale. We have used him on heifers the past four seasons and really like his moderate-framed, eye-appealing offspring.

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%

223 offers calving ease with a combination of low birth weight, low birth weight EPDs, and multiple generations of bulls that we have used on heifers in his pedigree. Phenotypically he offers more dimension than what you would expect in a low birth weight bull.

2200 is a bull that will catch your eye in the pen. He is very deep and thick for a low birth weight bull. He is the type of bull that will work on cows and heifers and provide enough substance in his progeny. He is one of the highest gaining bulls in the offering and has a great disposition.

This Knight 7153 son is deep and thick with very good width of base. His dam is a very moderate Guiliani daughter that is very fleshy no matter what time of the year it is. She is a cow that I would like a pasture full of when it comes to body type, fleshing ability, udder, feet and disposition not to mention she brings in good calves year after year.

Bulls like 2211 is why we are calving the 7th calf crop out of the Beckton Epic sire and still plan to use him heavy in the 2013 breeding season. This bull is moderate in his frame but has all the thickness, depth and width of base that we strive to produce in our cattle. His dam is a moderate framed Shoco Data daughter that we would like to have a pasture full because of all the convenience traits that she brings to the table.

2214 is the performance bull that has hit all the bases at weaning, gain, and yearling weight. He is built like a tank and will sire progeny that will perform and hang a lot of red meat on the rail. When you study this bull's numbers and want to produce calves that will perform at weaning, gain in the feedlot and not have daughters that get to big 2214 will fit the bill.

This is one of the first Grand Statement bulls that we are offering and it appears that when mated to an Epic daughter that this combination of genetics works well. The outcome is a balanced animal phenotypically and numerically that will be very usable for producing steers and replacements.

We only have 2 Boaz bulls in the offering but they both offer more than just calving ease. 2219 has above average depth of rib and flank and adequate muscle and combines the Signature, Data, and LT 142 lines together which have all made excellent females.

2222 is a bull that combines traits that are usually antagonistic. This calving ease bull is as wide based and topped as I have seen for a 68-lb., -4.7 BW EPD bull. Not only has this bull defied traits that usually don't go together he also excels in performance as well. He is a bull that you could buy for heifers but has enough punch to use very comfortably on cows.

We are very pleased with our first set of Lacy King bulls and hope that you will be pleased with what you see. This King X Knight bull has performed all the way from weaning to yearling and has posted one of the higher gain ratios. He also puts together a very well balanced phenotype with adequate depth, length and thickness.

Crossing Impressive with this Data daughter has proved worthy of replicating. As you look in the pens and search for bulls that have depth of rib and flank beyond the average and carry muscle deep in the quarter I think you will come across this bull quite easily. He combines this phenotype with a very moderate birth weight and above average growth.

Julian 924 sons excel for calving ease and low birth weights but offer above average growth. 2242 is another one of the bulls in the offering that could be purchased to breed heifers to but has more than adequate performance to be a cow bull.

Moderate, low 5 frame bulls with the amount of muscle, depth and fleshing ability that 2254 offers is something we hope to produce more of in the future. His very moderate LT 142 dam has done an excellent job on her 2nd calf. This bull has performed well across the board but also ranks in the top 24 percent for 9 out of the 15 EPDs measured.

This Julian 924 offers a package phenotype, performance and an interesting pedigree. His dam is a cow that we purchased out of the Canadian Red Roundup as an embryo. She is sired by YY Red Knight and out of Ole Oscar's dam. Her production includes a 106 weaning ration and a 102 yearling ratio with a 104 MPPA.

Ridge Tradesman has sired another moderate framed, easy fleshing, thick son. 2272 also has performed very well all the way across the board posting one of the higher gain ratios. His dam was purchased from Heart River Red Angus and has posted a 103 weaning ratio and a 109 yearling ratio with a 102 MPPA.

2278 and his three full sibs 2287, 2290, and 2297 are our first representation of SimAngus™ genetics. Our SimAngus™ genetics were developed by taking some of our top cows and flushing them to top proven Simmental bulls. These four Top Gun sons offer halfblood Red Angus and Simmental genetics that should enhance any crossbreeding program.

2291 is an eye-appealing Lacy King son that has performed very well across the board. I expect him to pass on his moderation and thickness to his progeny and his females should be easy fleshing cows that do well.

Don't miss this young April 1st Julian 924 son. His dam is a powerful Shoco Data daughter that we purchased from Heart River Red Angus at the NILE sale in Billings, MT. She has posted a 114 weaning ratio, 112 yearling ratio and a 109 MPPA. You will be seeing more of her progeny in the future but don't miss this bull sale day.

For every bull you purchase, your name will be thrown in a hat for the chance to be drawn to be one of the lucky winners that will receive their expenses paid for the Commercial Cattle Symposium at the National Red Angus Convention in Lewistown, MT, September 2013.

DIAMONDS IN THE BIG SKY
