## Professional Cattlemen's Brangus Bull Sale

**Saturday, February 22, 2014**

**1:00 EST pm • Fair Play, SC**

*Dear Friends and Customers,*

*This catalog contains complete performance information on bulls for our 2014 sale offering. These bulls represent our 30-plus-year commitment to supplying breed leading genetics to our customers. We have consistently striven to breed functional Brangus bulls to fill the needs of the profit minded commercial and registered Professional Cattleman and feel truly blessed to be holding our 21st annual sale.*

*Spitzer Ranch has a program structured around the disciplined breeding strategy of using only proven sires to increase genetic consistency. Our genetic program is different in that we are "Bull-Centric" and build that consistency by stacking generations of high accuracy sire lines proven to be curve benders. Please see [www.srbulls.com](http://www.srbulls.com) for a more complete description of our program. We have never wavered from pursuing our goals because of what is "trendy" or "fashionable" at the time. Spitzer Ranch has had a steadfast adherence to the Professional Cattleman's demand for profit driven cattle. We totally embrace a philosophy grounded in the twin thoughts of objective selection of cattle for economically relevant traits that enhance profitability; and a total orientation to the needs of the commercial beef industry. Increasingly often we are generating bulls that also grab the attention of other Registered Brangus Breeders.*

*Thanks again for your interest and attention; we are confident you will like our program and our bulls. Please come to our sale where you will find a super group of honest, solid bulls with the proven reliable genetics to put pounds on the ground and dollars in your pocket. Please contact us if you desire additional information, need us to buy your bulls for you or if there is anything at all that we can do to be helpful.*

*Sincerely,*

*Doc, Patricia and Ben Spitzer*

**Fancy Brangus and Brangus

2014 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen  
**Professional Cattlemen's Brangus Bull Sale**

**Saturday, February 22, 2014**

ANNOUNCEMENTS MADE ON SALE DAY TAKE PRECEDENCE OVER ALL PREVIOUSLY REPORTED INFORMATION

**SALE DAY SCHEDULE**

8:00 AM EST ..... Animals on Display  
 Noon EST ..... Complimentary Meal  
 1:00 PM EST ..... Sale Begins

**SALE DAY PHONES**

Home Office .....864/972-9140  
 John Spitzer .....864/710-0257  
 Patricia Spitzer .....864/710-4475  
 Ben Spitzer .....864/723-3779  
 Michael Hunt .....770/877-2098  
 Jamey Hunt .....678/986-4825  
 Wesley Hunt .....770/548-7950  
 Seth Hunt .....770/548-1667

**TELO-AUCTION AVAILABLE**

**NOTE:** For any telephone bidding you must contact us in advance to register a bid number.

If you will not be able to attend the sale, you will still be able to bid by way of a conference call hookup. Beginning at 1:00 EST PM on sale day, potential bidders should call:

**1-888-291-0312**

to join the conference call live from the sale.

Enter the passcode: **9410759** followed by the # sign. There is no charge to the caller to be on the conference call hook-up.

**CLAIMS FOR ADJUSTMENTS**

Claims for adjustment must be made in writing to the seller within 6 (six) months of the sale date. All settlements will be made with credit at a future sale and this will, in any and all cases, be deemed full satisfaction and settlement.

**LIABILITY**

All persons attending this sale do so at their own risk. Neither Spitzer Ranch nor anyone connected with management of the sale assume liability, legally or otherwise, for safety of buildings or premises, or for behavior of animals.

**TRUCKING**

While hauling is typically a responsibility of the buyer, Spitzer Ranch continues the following policies. FREE HAULING anywhere on bull purchases of \$10,000 (one or several). FREE HAULING on bulls back to our Partners for Quality Cooperator locations. Additionally, we guarantee a maximum trucking cost of \$200 per bull within the states of GA, NC and SC if arrangements are made with us prior to the sale. For other states we will be glad to assist with transportation and will get your bull delivered as economically as possible. Transportation on female lots is strictly the responsibility of the buyer.

**FREE HAULING ON BULLS TO:**

Georgia.....Hunt's H+ Brangus, Calhoun, GA  
 South Carolina.....Will Taylor, Honea Path, SC

**SALE MOTEL**

**Quality Inn-Seneca**  
 226 Hitec Rd. Seneca, SC 29678.....864/888-8300  
 Spitzer Ranch Rate of \$67 + Tax

**DIRECTIONS TO SPITZER RANCH**

Exit North off I-85 at Exit 2, Go North on SC Hwy 59 for 2 miles and look for our ranch sign on your left.

# 2014 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen

Bulls designated with the "Calving-ease Flag" are felt to be Low-Risk Bulls for calving difficulty and are suitable for use on first-calf females.

1. Calving Ease Direct EPD – is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease which a sire's calves will be born when he is bred to first-calf heifers.
2. Birth weight EPD – predicts calf size and calving ease.
3. Weaning weight EPD – predicts preweaning growth potential.
4. Yearling weight EPD – predicts overall growth potential and post-weaning gain.
5. Milk EPD – predicts the maternal contribution a bull passes to his daughters for milk production and mothering ability.
6. Total maternal EPD – predicts the overall weaning weight of calves from daughters of a bull due to growth potential as well as milk production and mothering ability.
7. Calving Ease Maternal – is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
8. Scrotal circumference EPD – predicts testicle size.
9. Ribeye area EPD – predicts muscling.
10. Percent intramuscular fat EPD – predicts marbling and quality grade.
11. Fat EPD – predicts external fat thickness and yield grade.
12. To make it easier to evaluate EPDs, the percentile ranking is shown below each individual EPD. This is a great way to understand where the individual ranks in the breed for that particular EPD. For example, where it shows "10%," this means that particular EPD value is in the highest, or TOP 10%, of all non-parent bulls in the entire breed. (A 10% for BW, however, means lowest, or lightest.)
13. Actual birth weight within 24 hours of birth.
14. Weaning weight adjusted to 205 days of age and for age of dam.
15. Ranking of individual 205-day adjusted weaning weight in relation to average adjusted weaning weight of weaning contemporary group of this calf. The contemporary group has an average ratio of 100.
16. Average daily gain (pounds per day) during Spitzer Ranch's 168-day performance growth test.
17. Lifetime weight per day of age (actual weight divided by days of age) at the end of Spitzer Ranch's 168-day performance growth test.
18. Ranking of individual WDA in relation to average WDA of the entire test group, which has an average ratio of 100.
19. Yearling weight adjusted to 365 days of age and for age of dam.
20. Ranking of individual adjusted 365-day yearling weight in relation to the average adjusted yearling weight of yearling contemporary group. The contemporary group has an average ratio of 100.
21. Yearling frame score adjusted to 365-days of age.
22. Yearling scrotal circumference (testicle size measured in centimeters) adjusted to 365-days of age.
23. Curve Bender Index (CBI). Our exclusive INDEX which combines values for low birth weight EPD and high yearling weight EPD into one value. This Index has a highest achievable numeric value of 148 and goes down from there. Bulls with a higher numeric value for CBI would be expected to sire calves with lighter birth weights and yet heavier weaning and yearling weights. Please see [www.srbulls.com](http://www.srbulls.com) for a more complete discussion of the CBI or call for a printed version.
24. CBI Quartile Rank. The CBI as described above and is ranked as First, Second, Third or Fourth Quartile. There is probably very little difference among bulls within the same Quartile Rank for CBI. There are greater dif-

- ferences among bulls in different Quartile Rank for CBI.
25. Ultrasound measurement of rib eye area, which is indicative of muscling and positively correlated with retail beef.
  26. Ranking of individual adjusted 365-day rib eye area in relation to the average adjusted rib eye area of the yearling contemporary group. The contemporary group has an average ratio of 100.
  27. Ultrasound measurement of percent intramuscular fat or marbling in the ribeye muscle which is a predictor of quality grade.
  28. Ranking of individual adjusted 365-day percent intramuscular fat in relation to the average adjusted percent intramuscular fat of the yearling contemporary group. The contemporary group has an average ratio of 100.
  29. Ultrasound measurement of fat thickness at the 12th rib, which is a good indicator of yield grade.
  30. Ranking of individual adjusted fat thickness at the 12th rib in relation to the average adjusted fat thickness at the 12th rib of the yearling contemporary group. The contemporary group has an average ratio of 100.
  31. The tattoo or private herd number (PHN) of the dam of this calf.
  32. Age of dam at time of birth of this calf.
  33. Number of calves born to dam
  34. Average actual birth weight of dam's progeny.
  35. Average birth weight ratio of dam's progeny compared within contemporary groups.
  36. Average weaning weight ratio of dam's progeny compared within contemporary groups.
  37. Average yearling weight ratio of dam's progeny compared within contemporary groups.
  38. Average ultrasound ribeye area of dam's bull calves.
  39. Average ultrasound % intermuscular fat of dam's bull calves.
  40. Average ultrasound fat thickness of dam's bull calves.

**NOTE:** All ultrasound scans (25-30 and 38-40) are adjusted to 365 days of age.

**For your convenience, non-parent breed average EPDs are on each page.**

## RESERVE SALE POLICY

Pretty well everyone has a floor price under their bulls at auction. You know the game; a lot of bulls get bid off to the same number or the same name and no bull sells below a certain price. We believe that's pretty devious. We don't like playing games and we want to tell you our minimum price up front in an honest and straightforward manner. We have a reserve "Base Price" on each bull selling in this sale.

Each bull will be started at the listed "Base Price." If you are willing to bid the base price do so before we are past that bull in the sale order. Once we move on to the next bull in the sale order, any passed-over bull is still available for sale, but the price will then be \$100 over the base price as listed in this catalog. In fact, any bull not sold on sale day will be available at that price through March 16, 2014, from our private treaty pens. But, no bull sold after sale day will ever be lower than the reserve base price plus \$100.

## RETAINED-INTEREST BULLS

Spitzer Ranch (and/or our cooperators) reserves the right to retain a 50% revenue sharing semen interest on any bull sold. Bulls are in your possession and under your control for natural service and you get 100% of the salvage value. We will continue to own half interest in bulls for the purpose of collecting and marketing semen, as well as using semen in our herds. While it is unlikely large amounts of semen will be collected or sold for many bulls, we need that as an option on bulls sold. As a buyer and at your option, you can also have a 50% revenue sharing semen interest and participate in revenue from semen sales. We have developed a Bull Partnership Agreement spelling out further details. Buying a retained-interest bull obligates you to that agreement only for semen collection and sales. To avoid any misunderstandings, if you have any questions at all, please ask. If you chose not to be involved with semen sales, we still reserve the right to collect and market semen on any retained interest bull.

***Bulls are cataloged by sale order and sell in sale order based on the highest Curve Bender Index (CBI).***

## SPITZER RANCH HAS BEEN SERVING OUR CUSTOMERS SINCE 1982

*When you purchase an animal from Spitzer Ranch you become part of our program and have an option to become part of our future sales. We are committed to you as a customer and deliver service with each sale. You will automatically be updated with current EPDs on your bull purchases and the females sired by those bulls become candidates to return as part of our Customer Commercial Brangus Female Sales. We pledge to conduct our business in a manner that demands providing only the best in genetics and services that make you a repeat customer. We definitely provide VALUE ADDED GENETICS and strive to provide VALUE ADDED SERVICE.*

## CALVING EASE BULLS

Over the years we have become more and more conservative on which bulls get flagged "Calving Ease Bulls". We have adopted the philosophy that it is better for us to have stricter guidelines than for you to be sorry at calving time. Obviously there are no guarantees for preventing difficult births in heifers. Even the most proven "Calving Ease Bulls" of any breed will sire a large calf every so often. However, this information is meant to serve as a guide for managing risk of calving difficulty in your first-calf females. Our goal is to help you eliminate heifer calving problems to the best of our ability.

REMEMBER: Compare Brangus to Brangus – No across-breed EPD comparisons can be made! Bulls indicated by the calving ease symbol in their data block are considered to be low-risk bulls for calving difficulty. To be designated as calving ease, they have a birth weight EPD of 0.8 pounds or less (Non-Parent breed average) and an actual birth weight of no more than 79 pounds.

2014 Spitzer Ranch Bull Sale - Profitable Genetics from Performance Cattlemen

We work very hard to provide the most accurate performance testing program possible and you can feel confident in each piece of data reported. Accurate contemporary grouping is essential in this effort as it is the differences in animal performance within a contemporary group that is reflected in EPDs. Animals from us and our cooperator herds were obviously not raised together and cannot possibly be in the same contemporary group. Therefore, when you look at the individual performance data, a ratio of 100 (average) will not correlate to the same weight among the groups. Be sure you know which animals are in the same contemporary group to know how to compare. Better yet, ignore absolute weights and look at weight ratios and look very, very much harder at EPDs.

Looking to re-build your herd?

**BUILD WITH BRANGUS**

**ON THE RANCH**

- Higher conception rates
- Environmental adaptability
- More pounds of calf per cow
- Fescue Fungus Tolerant
- Increased Longevity

**IN THE FEED YARD**

- Increased efficiency
- Added heat tolerance
- Fewer days on feed

**ON THE RAIL**

- Consistently earn premiums in Angus product lines including CAB
- Lower yield grades
- Research proven tenderness

210-696-8231 www.GOBHRANGUS.com

**HARNESS THE POWER OF HETEROISIS**  
 BUILD A BETTER COW HERD  
 KEEP YOUR ANGUS PREMIUMS

International Brangus Breeders Association  
**BRANGUS**  
 Predictable/Adaptable/Profitable

"A Brangus-Angus cross probably gives you as much heterosis relative to Angus genes as you can extract, because you can get the benefits of Cow Efficiency by making a Brangus-Angus cross."  
 -Dr. Dan Moser, Kansas State Univ.

**(210) 696-8231**  
[www.GOBRANGUS.com](http://www.GOBRANGUS.com)

**On the Ranch:**

- Higher conception rates
- Environmental adaptability
- More pounds of calf per cow
- Fescue Fungus Tolerant
- Increased Longevity

**In the Feedyard:**

- Increased efficiency
- Added heat tolerance
- Fewer days on feed

**On the Rail:**

- Consistently earn premiums in Angus product lines including CAB
- Lower yield grades
- Research proven tenderness

**BEEF CATTLE HERD HEALTH**

We and our cooperators take very seriously our commitment to provide you with a healthy animal and to minimize the risk of introducing disease into your cow herd. The following chart depicts our comprehensive, intensive and proactive approach to disease control. It indicates when we administer vaccines, vitamins, parasite control and all testing procedures. Our cooperators follow an identical protocol. We are **Tuberculosis Accredited** {Spitzer Ranch #58348, Taylor #200615T and Hunt's #381} and **Brucellosis Certified** {Spitzer Ranch #2226, Taylor #200615B and Hunt's #381}. Spitzer Ranch and Will Taylor have been testing for Johne's Disease since 1999; first achieved Johne's

Disease Surveillance Program Level 4 in 2003; and advanced to be designated as **Johne's Disease Test-Negative Level 6 Herds** under the new program. The Hunt family has been testing for Johne's Disease by fecal culture since 2010 with all cows testing negative each time and they are working towards designation as a Test-Negative Herd. Additionally, every bull in the sale as well as their sisters back home have been "ear notched" and guaranteed to be **Negative for PI-BVD** by IDEXX Antigen Capture Elisa (ACE).

**Health Papers (Certificate of Veterinary Inspection) will be provided at no charge to buyers in order to allow shipment to Anywhere, USA.**

**Herd Health Protocol - Spitzer Ranch Calving Season OCT THRU DEC**

**HEALTH CALENDAR FOR ALL CALVES**

Calf Working @ 2-3 months of age	Clostridial Diseases	IBR-PI3-BVD-BRSV	Leptospirosis
