The Pederson Family

Welcome to our 37th Annual Production Sale. We are certainly excited about the cattle industry and particularly the Red Angus breed. Not only are Red Angus cattle topping the markets across the country, our breed is taking a leading role in rebuilding the nation's cow herd as the favored female. It is certainly hard to believe the changes that the breed and the industry has been through over the past half century.

For the last 50 years in the Red Angus business, our ranches focus has been on the herd. We have continually selected for females that are feminine, highly maternal, with outstanding feet, legs, udders and have a quiet disposition. They are deep sided, soft made cattle with plenty of length, muscle and bone. For us these females offer a lot of longevity, fertility, and the ability to

raise market-topping steer calves who are efficient, high-gaining cattle in the feed yard and hang high quality carcasses in the packing plant. These combined traits offer a profitable animal to the industry.

Helen and Ralph

The yearling bulls and heifers were weaned in late September and early October. The bulls will be carcass ultrasounded in late February. A supplement sheet containing the carcass data will be provided sale day and on our web site (www.pedersonbhr.com). Videos will also be available on our website and on our Facebook page (www.facebook.com/pedersonbhr).

Chad, Lisa and Briceilyn

The heifers have come out of the heart of our replacement pen. The bred heifers were pregnancy ultrasounded by Dr. Brittany Chaney, Oahe Veterinary Hospital, Mobridge. We will be selling the commercial heifers first, then the bulls, and end with the registered heifers.

We'd like to thank our hired man, Tim Johnson, for his help through the past year. Tim is a valuable asset to our operation and we couldn't get everything done without his help. Logan Pederson, our great grandson, grandson, nephew was here this past summer. Logan was a huge amount of help and we appreciate his assistance.

Gary and Sue

If you have any questions or if there is any way we can assist you please don't hesitate to contact us. The cattle can be viewed at the ranch anytime. Stop in and have a cup of coffee with us – we'd love to visit with you. Check our website (www.pedersonbhr.com) and Facebook page (www.facebook.com/pedersonbhr) for updated color photos, videos and supplement sheets.

We look forward to seeing you on March 4.

Sale Information

DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls or bred heifers picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. The bred heifers have been ultrasounded by the Oahe Veterinary Clinic. The open heifers have been Bangs vaccinated and will have had two shots of Fusaguard. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

COMMERCIAL HEIFERS:

The commercial heifers have been sorted into three groups and will sell in groups of 10 head with the option to take as many as the buyer would like. There is no delivery on the commercial heifers, but we will assist in coordinating trucking as much as possible.

INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

We are also retaining the right to one in-herd flush interest in all females to be collected at the seller's expense and the buyer's convenience. Please contact us if you have any questions.

Broadcasting Real-Time Auctions

**View the Auction Live!
Bid Online... you're ringside
right at your desk!**

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

High speed internet is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

DVA Rep. Justin Dikoff (605) 290-0635 - email: jdikoff@dvauction.com
Please feel free to contact me with questions about the sale or to view the cattle for you.

In Loving Memory **Helen May Pederson**

On November 23, 2014, we said goodbye to our wife, mother, grandma and great-grandma, and ranch matriarch, Helen Pederson. She left us 96 years young and after being married to Grandpa Ralph for just over 71 years!

Grandma lead a great life. It's hard to imagine all the changes Grandma witnessed. Grandma Helen was a true ranch wife – many ladies of her era were housewives who occasionally helped on the ranch. Grandma Helen was a ranch wife through and through who could and would complete any task on the ranch. Two of her favorite ranch activities were working cattle, where she always had to be bringing cattle up the alley (even at 80+ years of age) and driving silage truck – I don't think her foot knew where the brake was at!

Grandma offered a vision and foresight that made our ranch the success it is today – both on the cattle and horse parts of our operation. It was her vision that convinced Grandpa Ralph that we needed to breed our then commercial Hereford cattle to Red Angus bulls, and then pushed him to purchase our first Red Angus female in the early 1960s. That decision has allowed us to remain faithful Red Angus breeders for well over 50 years.

It was Grandma's love and passion of horses, especially racehorses, that drove our ranch legacy of breeding Quarter Horses for over 50 years too. Grandma appreciated the economic impact of the cattle portion of our ranch, but her true love was her horses. Because of her love and dedication of breeding, she and Grandpa's home is filled with racing awards from around the country. They even bred and raised an AQHA World Champion in Western Riding.

Grandma was a humble and kind individual. She knew hard times and even harder work, both of which made her appreciate good times and success.

We'll miss you Grandma Helen, but know you are watching cows and mares grazing belly deep in hard West River grass, while their calves and foals are playing in the sun on the hillside. We also know you won life's greatest race, and will be winning many more horse races in heaven.

We pledge to keep your humbleness, passion, faith, work ethic and kindness alive for many generations to come.

1918-2014

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

“What impact will each potential sire have on my operation’s profitability?”

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation’s primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.

HerdBuilder and GridMaster are expressed as differences in profitability per exposure.

HerdBuilder Example:

30 cows x 5 years breeding = 150 exposures

Bull A has a HerdBuilder Index of 175: $175 \times 150 = \$26,250$

Bull B has a HerdBuilder Index of 100: $100 \times 150 = \$15,000$

\$11,250 Difference in Profitability

Ranch Tested. Rancher Trusted.

Hard Drive is a larger framed bull that is extremely long bodied with great muscle expression. We purchased him for his length and the fact that his dam was still producing natural calves at age fourteen. Her lifetime average record on fourteen calves is 86 pounds for birth and 682 pounds for weaning. Hard Drive calves are definitely long bodied and wide topped. With the markets paying for pounds, Hard Drive's progeny have the market topping ability.

7207 is a larger framed bull that is very stylish, smooth made and very complete. This is our first year with Nebula bloodlines and we certainly can't complain. This bull's calves average 77 pounds at birth and 634 at weaning. They really grew throughout the summer and on test. Putting some of these Nebula bulls together for a breeding project will certainly add uniformity to your program.

New Chapter cattle are super quiet and very easy cattle to handle. We have used him for years and many of the top bulls sold around the county have New Chapter in their pedigree. New Chapter was a heavy muscled bull with a ton of rib shape and depth of body. A direct son of this legend will benefit your maternal genetics for years. It certainly has for us.

Little Ben has excellent feet and leg structure. His dam has a perfect udder and we are very pleased with the maternal genetics in his background. 1102 calves are level topped cattle that are coming along nicely this year. This is an easy keeping sire that adds thickness and muscle expression to his sound made physique. His calves average 84 pounds at birth and 647 at weaning.

Miss BHR King was part of a choice lot that we took to the ND Red Select Sale. She is a blocky heifer with a ton of muscle expression. The King daughters are doing a nice job for us in our herd.

She is bred and ultrasound safe to Feddes Cougar for a March 19 calving date.

The Packer females have really turned into some real sweet cows and this heifer is not disappointing us. She is a deep-bodied heifer that is very complete and stylish. Her weaning and yearling ratios are 120 and 107. Her dam has an MPPA of 107. We will pay for the parent verification testing on her calf.

She is ultrasound safe to one of our Nebula heifer bulls for an April 12 calf.

170 - 184 **GROUP 3**
Yellow tags

Commercial Red Angus Heifers

We will have our replacement heifers sorted into three groups.

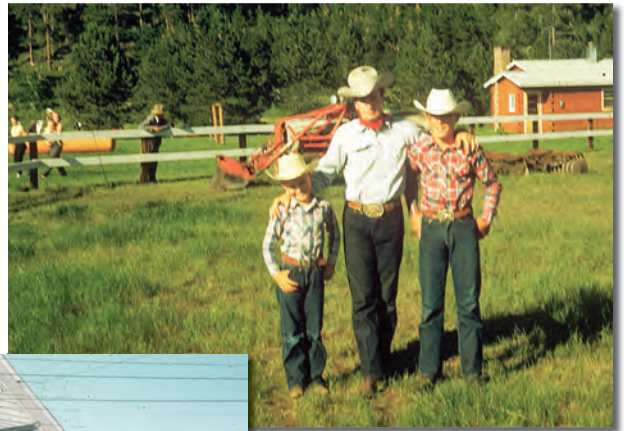

We will offer them in groups of 10 and the high bidder will have the option to take a minimum of 10 or as many of the whole offering as they choose. The purple tags will represent Group 1 and their lot numbers will be 110 to 139. Group 1 is comprised of a top cut from our registered herd. Groups 2 and 3 are a mixture of top cuts of heifers from both our registered and commercial herds.

Group 2 will have green tags and will represent 140 to 169 and the third group will have yellow tags and will be tagged from 170 to 184.

All of these heifers will sell as commercial. A video of these heifers will be available on our website, www.pedersonbhr.com.

Thank You!

We are fortunate to deal with some of the best cattle producers in the industry and we want to thank you for your past, present and future support!
