Selling

**85 YEARLING BULLS
35 COMMERCIAL HEIFERS**

Thiessen's REGENCY ACRES

Welcome to the 2015 Regency Acres Annual Production Sale!

First and foremost, I would like to say congratulations to all the cattlemen and women out there. 2014 finally brought the payout you deserve for all the hard work and effort you put in to raising the beef that feeds the world. Cheap feed base combined with all-time record prices for not only feeder cattle but also replacement females and slaughter animals has made for one of the best years to be in the business. A mild start to the calving season is just the icing on the cake!

Secondly, I would like to thank all past customers for their support in our program. Seeing the same faces in the crowd year after year that have been supporting our program since long before I knew what a cow means more to us than anything we do.

The bulls selling this year have once again been through the obstacle course and passed every test. They have been fertility tested, carcass ultrasounded and performance tested. They were developed on a high-roughage ration consisting of corn silage, chopped hay and corn designed for 3 lbs. of gain. This allows for natural development and growth while still testing their feedlot performance. They have been freeze branded and given two rounds of foot rot vaccine. The heifers selling have been freeze branded and will have their yearling shots prior to selling. They are the mates to the bulls selling and all are registered or can be registered.

New this year is a video of each lot selling. The video can be found at www.billpelton.com. We invite you to take a look. Better yet, come on out and look through the bulls at the ranch prior to the sale. We would be happy to show you the mothers behind the bulls.

Thank you for taking time to review the catalog. We look forward to seeing you on April 10th!

Tea and Tyler Thiessen*

Guarantee

Regency Acres is providing a first-year breeding season guarantee on all bulls selling for \$2,500 or more. Breeding season is defined as the 90-day period following turnout. All bulls selling for \$2,500 or more will be given 50% of the value of the injured bull – minus any salvage value – in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a licensed veterinarian. Please notify Regency Acres as soon as possible should injury occur and prior to the injured bull being sold for salvage. **All claims must be made by September 1st.**

Example 1:

A \$5,000 bull is injured and can't return to service. Salvage value is \$1,250. A credit of \$2,500-\$1,250=\$1,250 will be given to the buyer.

Example 2:

A \$2250 bull is injured and cant return to service. No credit is given and buyer retains all salvage value.

This is NOT a mortality guarantee. Mortality insurance will be available through Bill Pelton and John Goggins, American Insurance Co.

Helpful Hints for Care of Herdbulls ...

Having herd bulls adapt to the environment they will be in is very important to the success of a breeding program. Whenever possible, the bulls should be fed the same type of forage they will eat in the breeding pasture for a minimum of two weeks before turnout. Their rumen operates with little bugs to break down the diet and different forages each have their own little bugs. About two weeks is the time required for the rumen to adjust to a different diet. When a bull is turned out, he isn't thinking much about eat-

ing, so any advantage that you can give him will be beneficial to younger bulls.

Another trick for having a virgin bull ready is what we call "Jump-starting." If you have a cow or a heifer around that is cycling, put the bull with her. If he seems disinterested, put another bull in with the cow for him to observe. This should trigger his brain. When the bull appears interested, let him in and remove the other bull. Make sure a bigger bull doesn't start whipping on him, or that could defeat what you are trying to accomplish. It is rare that this procedure is necessary, but it is good insurance and, once the bull gets a taste of what his job is, he will be ready for those heifers.

When breeding season is finished, a reconditioning program for yearling bulls is good as they change their teeth at 18 to 24 months of age.

Uncommon was the high-selling bull in the 2010 Sitz fall sale and was admired by many as the most complete Angus bull to come along in a long time. This is a bull that will put the jump muscle back into the breed. He will sire extra capacity, length and volume. Uncommon daughters are absolutely pleasant to be around. They are quiet, nice uddered, easy calving, moderate framed, and have great maternal instinct.
