2015 Certified Angus Beef  
"Seedstock Commitment To  
Excellence" Award Winner!

# TOKACH ANGUS RANCH

*Your NORTH DAKOTA SOURCE for  
LOW-BIRTH, HIGH-GROWTH genetics.*

# Welcome

Welcome to our 41st Performance Sale to be held February 15, 2016, at Kist Livestock Auction, Mandan, N.D.

As I reflect back on the past year, the one word that keeps popping into my mind is “change.” Let me explain!

**Family:** In early April, our family learned we were selected as the 2015 CAB Commitment to Excellence Award winner. Thank you to Terry Beller of Lindsay, Nebraska, for nominating us for this prestigious award. Kathy and I were also blessed to welcome two new grandsons into our family. Talk about exciting times!

**Cattle:** As you look over this catalog, you will notice that we have added a number of new and exciting AI sires. As many of you know, we like to use the same AI sires multiple years in a row to build a large number of genetically alike daughters. Because of the need to rotate a few new AI sires each year, several short-supply bulls and other factors, our 2016 line-up is vastly different then from 2015. You will find even more emphasis on calving ease and carcass traits. We have also decided to have all the bulls evaluated with the Zoetis LD-50K test. Depending on specific traits, GE-EPDs will provide a similar accuracy as an animal with 8-20 progeny.

**New Look:** By now, you have realized we have a new look to our catalog. Thanks to Tracey Koester at Cow Camp Promotions. Our basic catalog design has been the same for the past 36 years. We hope you like the changes.

**The things that have not changed:** The sale cattle have been handled the same as in the past. The cattle have not been on creep feed and are not on commercial feed. The bulls were weaned in late September and the bred heifers taken off grass on December 1. Birth weight are taken with a scale, weaning weights taken at weaning and yearling weights taken just in time for this catalog to go to press.

The cattle can be seen at Kist Livestock Auction in Mandan from February 13 until sale time. Prior to that time, they and the cowherd can be seen at the ranch at your convenience.

*2015 Certified Angus Beef "Commitment to Excellence" Award Winner*

## Sale Information

***PLEASE BRING THIS CATALOG WITH YOU TO THE SALE!***

# Terms & Conditions

## **AUCTIONEER:**

Roger Jacobs, Sheppard, Montana.....406-373-6124

## **TIME:**

The sale will start promptly at 1:00 p.m. CST

## **SALE LOCATION:**

Kist Livestock Auction, Mandan, ND.....701-663-9573.  
Located one mile west of the Memorial Bridge on the east edge of Mandan. For easiest route, take I-94 to Exit 155 to Memorial Highway.

## **ACCOMMODATIONS:**

Sale headquarters will be the Baymont Inn & Suites Mandan, ND, located at Exit 152 on I-94. Ask for the “Tokach Angus Ranch” block of rooms for lowest rates.  
800-597-7327 or 701-663-7401

## **HEALTH:**

The bulls have been vaccinated with a seven-way vaccine – B.V.D., I.B.R., PI-3, BRSV, Ivomec’d for lice, grubs and worms. The entire calf crop has been tested negative for PI BVD for years. All females have been bangs vaccinated. Bred females will have received their second dose of Scour Bos 4. Health papers will be furnished to cattle going out of state.

## **GENOMIC ENHANCED (GE) EPDS:**

All the bulls in this sale will have GE EPDs. Depending on specific traits, having GE EPDs will provide a similar amount of accuracy as if an unproven animal already had 8-20 progeny.

## **GENETIC DEFECTS:**

All registered cattle in this sale have been tested free of the AM, NH and CA genetic defects by pedigree or DNA test.  
The Lot 161 bull is a DD carrier.

## **VIDEO:**

If the weather cooperatives, we also plan on having video taken on the entire sale offering. While we would prefer you to be on the seats on sale day and seeing the cattle in person, we realize that is not always possible. The videos will also allow you to view the bulls prior to the sale.

Look for the video links on DVAuction.com or on our Facebook page - Tokach Angus Ranch.

## **WINTERING:**

Free Wintering on the bulls until April 1st, 2016. All bulls will be semen checked and delivered free at that time. If we are unable to deliver after April 1st then your bulls will have to be picked up at the ranch. The bulls will be handled as if they were our own but are the property of the buyer. We request that you purchase insurance on any bulls wintered at TOKACH ANGUS RANCH.

## **RETAINED INTEREST:**

Tokach Angus Ranch is retaining one-third revenue sharing semen interest in every bull selling in this sale. Full possession and salvage value sells on all bulls.

## **PREGENCY INFORMATION:**

The females have been pregnancy checked by a competent veterinarian and guaranteed to be safe in calf. The A.I. breeding dates listed in this catalog through ultrasound examination are determined by a skilled technician. They are not unconditionally guaranteed as to breeding dates.

## **BIDS:**

Buyers unable to attend the sale may call or send their bids to the owners, auctioneer or representatives. Satisfaction guaranteed.

## **TERMS:**

All animals will sell fully guaranteed according to the terms and conditions of the American Angus Association

## **FIRST SEASON BREEDING GUARANTEE:**

All bulls selling for \$3,000 or more will be covered 50% by Tokach Angus Ranch if they have an untreatable injury that would keep the bull from being a breeder for the first breeding season. Breeding season is defined as the 90 day period following the first turnout of the bulls. If a problem occurs, 50% of the value of the injured bull, minus one-half the salvage value, will go toward a replacement bull if one is available or will be given as credit in a future sale. Injury resulting in death of the bull will not be the responsibility of Tokach Angus Ranch. This is an insurable risk that the purchaser can obtain coverage for through various livestock insurers. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to September 1, 2016.

## **SALE DAY PHONE:**

701-663-9573, Toll Free 1-800-732-1163. In case of severe storm sale day, phone 663-9573 or turn your radio to 550 KFYR, Bismarck.

## **DELIVERY:**

FREE DELIVERY to central stockyards in North Dakota and surrounding states on all registered lots. Commercial Females at cost. Deliveries will start immediate after the sale on the registered bred females.

## **EXPECTED PROGENY DIFFERENCES:**

The EPDs published in this sale catalog are current as this catalog was being put together. With weekly updates from the American Angus Association the EPDs will change slightly by sale day.

# Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-20 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	21	Docility	12
Birth Weight	13	Heifer Pregnancy	10
Weaning Weight	19	Mature Weight	13
Yearling Weight	22	Carcass Weight	10
Milk	14	Carcass Marbling	9
Yearling Height	11	Carcass Rib	11
Yearling Scrotal	14	Carcass Fat	12
Dry Matter Intake	18		

## How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo or those of partnering labs Zoetis (HD50K, i50K) or GeneSeek (GGP-HD, GGP-LD). These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

[www.angus.org](http://www.angus.org)

# American Angus Association® Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

**Yield Grade (\$YG)** \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

**\$G** combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

# Reference Sires

## A BARSTOW CASH

BD: 1/28/11 Reg. #: 17145326

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
11	0.4	69	16	135	0.41	1.29	58.41	113.49	30.37	164.40

- CASH was selected to be used in our program because of his unique pedigree, his wide birth to yearling EPD spread and his thick made, wide based phenotype.
- CASH started out with a 64 lb birth weight, recorded a 776 lb 205 day weight, ratio 113, a 1427 lb yearling weight and recorded a 18.6 in rib eye scan
- CASH records a 0.4 birth weight EPD and still ranks in the top 1% of the Breed for yearling weight and rib eye while ranking in the top 3% for \$B
- Use CASH sons to lower birth weight, add muscle, increase both pre and post weaning growth and increase carcass values.

## B CONNELY BLACK GRANITE

BD: 1/13/11 Reg. #: 17028963

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
13	0.2	62	30	109	0.60	1.17	76.03	62.92	39.30	140.04

- BLACK GRANITE is a sure-fire calving ease sire that adds more length, frame size and yearling weight then you would expect in a low birth weight sire
- BLACK GRANITE was a \$80,000 feature in the 2012 Connealy sale and his sons have topped numerous sales across the west this past spring
- BLACK GRANITE started out with a 69 lb birth weight, recorded a 822 lb 205 day weight, a 1470 lb yearling weight and ranks in the top 1% of the breed for rib eye EPD
- Use BLACK GRANITE to lower birth weight, add body length, increase rib eye size and improve dispositions

## C HOOVER DAM

BD: 1/25/08 Reg. #: 16124994

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
8	-0.3	49	27	96	0.77	1.14	60.17	61.19	51.55	132.72

- HOOVER DAM is a proven low birth weight sire that will add tremendous thickness, improve dispositions and moderate frame size
- HOOVER DAM has been a long time member of the ABS Bull Stud with over 2100 daughters in production.
- HOOVER DAM ranks in the top 1% of the breed for rib eye size, the top 5% for heifer pregnancy and his sons topped the feed efficiency trails at the 2012 Midland Bull Test
- Use HOOVER DAM to lower birth weight, moderate frame size, add breed leading muscle and increase feed efficiency genetics

### CALVING EASE GUIDE

In order to more accurately describe the calving ease of various bulls, we have instated the following rating system based on actual birth weight, CED and BW EPDs and DNA information.

- ★★★ Recommended for heifers
- ★★ Recommended for larger-framed heifers and cows
- ★ Recommended for cows

# Reference Sires

- *TEN X* is a standout low birth weight, high carcass sire who is the number one sire for registrations in the breed for 2015
- *TEN X* sons, daughters, grandsons and granddaughters have topped sales all across the country the past several years.
- *TEN X* ranks in the top 1% of the breed for marbling, \$W and \$B while ranking in the top 5% for weaning weight, yearling weight and RADG
- Use *TEN X* for his ability to lower birth weights, add marbling, improve feed efficiency, improve dispositions and outstanding eye appeal

## D AAR TEN X 7008 SA

BD: 2/9/07 Reg. #: 15719841

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
8	0.3	68	22	129	1.29	0.77	87.19	99.99	51.42	192.81

- *COUNSELOR* is a unique calving ease and muscle combination bull that ranks among the breeds top proven carcass sires for rib eye EPD
- *COUNSELOR* ranked in the top 1% for total profit and #1 for maternal index through the Angus Sire Alliance
- *COUNSELOR* offers highly sought after genetics because of his unique pedigree combined with his solid no holes EPD profile
- Use *COUNSLER* sons to increase calving ease, add body length, increase rib eye size, add pay weight and leave behind outstanding maternal genetics

## E CONNELY COUNSELOR

BD: 2/13/10 Reg. #: 16761497

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
12	0.1	61	27	109	0.58	1.31	61.66	59.28	45.16	126.85

- *TIME FRAME* is a big outlined, long bodied bull who was the top selling bull for our 2013 production sale going to the Genex AI Stud
- *TIME FRAME* started out with a 80 lb birth weight, recorded a 775 lb 205 day weight, ratio 127 and a 1537 lb yearling weight, ratio 118
- *TIME FRAME* ranks in the top 2% of the breed for weaning weight, yearling weight, docility and milk
- USE *TIME FRAME* sons to increase frame size, add body length, add both pre and post weaning performance and higher maternal values

## F TOKACH TIME FRAME 2109

BD: 2/12/12 Reg. #: 17369058

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
8	2.5	72	36	130	0.24	0.64	76.05	74.55	11.37	143.41

# VOLUME NUMBERS OF LOW BIRTH WEIGHT BULLS WITH INDUSTRY-LEADING GROWTH

## Reference Sires

### G CONNEALY ARSENAL 2174

BD: 1/25/12 Reg. #: 17314528

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
10	0.4	70	24	130	0.62	0.58	75.03	97.76	35.13	137.82

- ARSENAL is a calving ease bull that offers a tremendous amount of performance and muscle in a very attractive package
- ARSENAL is a member of the Altra Genetics AI Stud and is a bit of a outcross to most commonly used bloodlines of Angus genetics.
- ARSENAL ranks in the top 3% of the breed for weaning weight, yearling weight and heifer pregnancy while maintaining a 0.4 lb birth EPD
- Use ARSENAL sons for calving ease with explosive growth and muscle, increase heifer pregnancy and for outcross genetics

### H TOKACH UPDATE 9009

BD: 2/1/09 Reg. #: 16458143

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
8	2.2	65	25	120	0.50	0.44	61.93	65.77	26.70	127.68

- UPDATE is a long bodied, extra thick muscled bull who was the top selling bull for our 2010 production sale going to the Genex AI Stud
- UPATE started out with a 80 lb birth weight, recorded a 782 lb 205 day weight, ratio 121 and a 1598 lb yearling weight, ratio 120
- UPDATE sons have sold at the top of our sales for years but the real treasures are his highly productive, deep ribbed easy fleshing daughters.
- Use UPDATE sons to add body length, muscle dimension, increase performance and for the next generation of great females.

## Our newest additions!

*Cooper Acheson*

BD: 5/14/2015

- 6169 records a 779 weaning weight, ratio 123 and a 1431 yearling, ratio 112

# Commercial Bred Heifers

## Selling 45 Commercial Bred Heifers

A special highlight of the spring sale season across the Northern plains each year has been the selling of our elite commercial bred heifers. Just like in years past, we have sorted out this special group of females shortly after weaning and then culled, sorted and culled again before they were synchronized and AI bred to some of the most sought after genetics of the Angus breed. You can literally feel the excitement fill the air as these high volume, deep ribbed, large outlined, feminine fronted females fill the ring at Kist Livestock Auction to capacity.

For the past 28 years, the region's top cattlemen have gathered to experience the auctioneer's chant first hand and take part in the fast and furious bidding that takes place to see who gets to take the prize of the spring sale season home with them. New and repeat buyers alike have told us the heifers have exceeded their every expectation for quality, disposition, milking ability, breed back and the quality of the offspring they have produced. You can purchase bred commercial heifers from a lot of places but you simply will not find any that are more tightly related, higher quality or having the genetic potential that these heifers and their offspring possess. As one top-notch cattlemen once told us, "Where else are you going to find heifers like the TOKACH females?"

As a added bonus, this year's heifers were synchronized and AI bred on

June 7th through 14th to BASIN EXCITEMENT. EXCITEMENT is a very popular member of the Genex AI Stud where he is a noted short-gestation, calving-ease bull the ranks in the top 2% of the breed for his growth numbers. The Excitement progeny are very smooth, long-bodied cattle that rank in the top 1% of the breed for RADG and DMI. The Excitement sons dominated the most recent Midland Bull Test. TOKACH HOOVER DAM 4517 served as the clean-up bull on all of the commercial heifers. He is a low birth weight Hoover Dam son out of an outstanding first-calf daughter of Sitz Upward. 5417 recorded a 76 lb actual birth weight, a 719 lb. 205 day weight, ratio 112, a 1,332 lb yearling weight, ratio 109 and a 108 %IMF ratio. He records a +2.1 birth EPD, a +64 lb. weaning EPD, a +120 lb. yearling weight EPD, a +34 milk EPD and ranks in the top 10% of the breed for both docility and \$B.

All the heifers will have received their second dose of Scour Bos 4, rechecked for pregnancy and health papers completed to allow them to go anywhere.

Remember all these females were raised right here on our ranch and carry one of our brands. If you are in search of a special group of closely related foundation females AI bred to the exciting BASIN EXCITEMENT, please be on the seats on sale day February 15th.

## You will not be disappointed!

Service Sire

### BASIN EXCITEMENT

BD: 2/3/08 Reg. #: 16047404

CED	BW	WW	MILK	YW	MARB	RIB	\$W	\$F	\$G	\$B
11	-0.2	73	18	128	0.36	0.56	70.96	95.85	21.22	129.11

Tokach Angus Ranch

- Excitement has been one of the most popular true calving ease – high growth bulls in the Genex AI Stud lineup
- Excitement is a short gestation length, moderate milk bull that ranks in the top 2% of the breed for his growth traits
- Excitement ranks in the top 1% of the breed for both Residual Average Daily Gain and Dry Matter intake while ranks in the top 25% for \$B.
- Excitement topped the 2009 Basin Angus Ranch sale and his sons have dominated sales and bull tests ever since.

# Purebred Bred Heifers

As you look over our 2016 sale catalog, you will note that we have once again made every effort in selecting an outstanding group of registered bred heifers for our 2016 sale.

Just like in years past, we have selected numerous females representing every major sire group from our 2014 calf crop. The majority of these females were selected right out of the middle of our AHIR data to give you a true cross-section of our genetic program.

The balance of the heifers were placed in this sale as true sale attractions as they represent some outliers in terms of performance, carcass values and phenotype. These heifers and their progeny represent the most current and highly sought after genetics that the Angus breed has to offer. They are the

type of genetics to build a cowherd around and the very same genetics that we are building our future around.

The heifers have been synchronized and AI bred to either the highly sought after ABS sales leader, Bennett Absolute or the exciting Basin Excitement from the Genex bull stud. The heifers will have received their second shot of Scour Bos 4 by sale time, rechecked for pregnancy and health papers will be provided to allow them to go anywhere.

Join the growing ranks of Angus breeders who have put the power of the TOKACH FEMALE to work for them!

You will be glad you did!

- 2031 will sire nice pattern cattle with extra body length and a tick more frame
- The Update daughters are easy fleshing, calm mottered and are great mothers.
- Pasture exposed to S/A Excitement from 6-10th to 8-10th. Expect an early April calf

Tokach Angus Ranch

## COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or [agi@angus.org](mailto:agi@angus.org) for more information.
