B&L RED ANGUS BULL & FEMALE SALE

Friday, October 9, 2020

Hosted by B & L Red Angus • Putnam, Oklahoma

Welcome to the B&L Red Angus Bull & Female Sale. We at B&L Red Angus want to start with thanking our customers who make us a success. We also want to thank the team of Red Angus breeders who help provide the genetic offerings in both of these sales. So much planning and effort goes into making these sales a possibility, but we continue to be blessed by our customers, team and family.

We started our registered seedstock program after seeing our commercial Red Angus females outperform our other commercial cattle. We spent many years developing commercial replacement heifers, and Red Angus continued to blow us away. This sparked an excitement to see the possibilities of growth in the breed, and coupled with the years of experience as a commercial producer, it laid the foundation of what has become B&L Red Angus. We believe our years of experience as a commercial producer and developer gives us the edge in understanding what our commercial producers need. The breed continues to gain the successful ranchers' trust as a complete package of fertility, fleshing ability, good disposition, longevity and excellent overall production all inside a moderate frame. We continue to hear from our customers that our program's genetics are working for them.

The B&L Red Angus program is progressive and performance driven, keeping the commercial cattleman in mind each step of the way. We place strong emphasis on maternal traits, carcass quality, soundness, a moderate frame and good disposition. We have teamed up with like-minded breeders in genetically similar programs to provide an even greater selection of both registered bulls and females. We continue to push forward utilizing artificial insemination and embryo transfer to capitalize on the superior genetics inside our herd and within the breed. We do so to be able to pass these genetics on to you, our customer. In addition, we are a seedstock partner in the \$Profit system that provides our commercial cattlemen with an index system to help recognize the expected profitability of a bull's progeny over his lifetime when accounting for 30% of heifers retained.

The team of bull producers is proud to offer a select set of bulls available this spring. All of the bulls are developed together here at B&L Red Angus and have completed feed efficiency testing on Grow-Safe, which provides individualized data on feed-to-gain on each bull. The genetic quality of bulls you find here are hard to beat, whether you sell your calf crop at weaning or retain ownership to the feedyard. The bulls are fed a high-roughage ration to ensure they are ready to turn out and go to work for you as soon as you leave. Disposition continues to be of utmost importance. The bulls are developed just steps away from our backdoor and where our children play. Overall, this isn't just a development center, it's also our home and we welcome you to join us for another great sale day.

HEALTH TESTING AND PAPERS

Health papers will be available for all bulls leaving Oklahoma. If you live in a state that requires additional testing, this will be done after the sale and animals delivered after that time.

FERTILITY TESTING

All bulls were tested and have passed a BSE by Dr Jeff Pollock of Taloga Vet 580-922-5629

BREEDING GUARANTEE

All bulls are guaranteed through the first breeding season. If a fertility or breeding issue occurs, we require that you notify us. In that event a replacement bull of similar value will be provided, if available, or a credit given for a future purchase. Credit will be for purchase price minus salvage value. We also reserve the right to have the animal seen by a vet of our choice. **This Does Not Include Coverage For Death.** Mortality Insurance will be available on sale day when you check out.

INSURANCE

Insurance options available from Brad Wright with G4 Insurance Specialists.

SEMEN INTEREST

Seller will be retaining 50% semen interest in all bulls selling. Buyer will have full possession.

Sale Information

SALES TERMS AND CONDITIONS

All sales are cash or check to clerk at conclusion of sale, unless otherwise arranged. Cattle will be paid for in full before being loaded or delivered. Cattle will sell under the terms and conditions as recommend by the Red Angus Association of America. The auctioneer will settle any disputes on bids and his decision is final.

SIGHT-UNSEEN GUARANTEE

If you are unable to attend or to view bulls online, please contact Benji White, Lori White, Quentin Shieldknight or Clint Berry. We will be happy to assist you with your needs. In the event you are not satisfied with the bull upon delivery, simply request the bull to be returned and you will receive a full refund of purchase price.

DELIVERY

\$50 discount given off purchase price, of every bull, if you take bulls home day of the sale. Free delivery within a 300 mile radius of B&L Red Angus on all bulls. Any bull purchases over \$20,000 will be delivered for free. All other deliveries will be done at a fair cost to the buyer.

ANNOUNCEMENTS

Announcements made from the block on sale day take precedence over printed material in the catalog or otherwise.

SALE TERMS AND CONDITIONS

Except for those stated in the below terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees are set forth in these Terms and Conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the purchaser or any party claiming through purchaser, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

TERMS

Terms of the sale are cash or check to the clerk at the conclusion of the auction. Animals are not to leave until paid for in full.

BIDDING

Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

PURCHASER'S RISK

Each animal will be at the Purchaser's risk as soon as sold. Animals will be fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of (72) hours after the sale for animals being picked up by the Purchaser. After that, there will be a per day feed cost added to the purchase price, payable before possession occurs.

LIABILITY

All persons who attend the sale do so at their own risk. The seller, the sale manager, and its employees, cooperators, consignors and all other persons connected with the management of the sale, assume no responsibility, liability, legal or otherwise.

FOR THE

B&L RED ANGUS BULL SALE!!

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior

feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

\$PROFIT™

Why \$Profit:

Today, ranchers have to make proper genetic decisions to improve profitability and the return on their investment. However, most seedstock providers confuse potential customers with too many EPDs. Most Angus have over 25 EPDs plus DNA rankings are also often provided. While this data is useful, it is also very hard to analyze. This makes buying the best bull very difficult. Every bull is good on some traits and weak on others. The challenge is figuring out how each of those traits is going to impact your bottom line. Buyers try to determine which bull will make the most money from birth to slaughter, but most of the time, they end up guessing.

When Boeing Airlines starts to build a plane, do you think they guess how it is going to fly? How much fuel it is going to use? How many pounds of cargo it can carry? No, they don't guess – instead they use their knowledge to build a computer program that simulates the outcomes based on the design of the plane that they have in mind. This same simulation technology can be used in beef cattle to improve selection decisions.

How \$Profit works:

\$Profit is based on results from an advanced simulation model, developed by Dr. Steve Miller (now the Director of Genetic Research at the American Angus Association) in conjunction with other geneticists at Guelph University. The simulation develops partial budgets that look at how a genetic factor influences cost and/or revenue. The model factors in all of the effects on both income and expense to come up with a net profit figure for each bull.

\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. The model assumes that you keep 30% of your heifers as replacements and that you retain ownership on the remainder of the calves through harvest. Further, it assumes that you will sell on a grid with premiums for quality grade and yield grade.

Most importantly, \$Profit allows you to easily compare any two bulls and calculate the difference in profit that they are expected to generate in your herd. Let's compare a \$14,000 \$Profit bull to a \$10,000 \$Profit bull. The predicted difference between the bulls is \$4,000 or about \$40 per calf. For comparison, the average 2015 Angus bull has a \$Profit of approximately \$9000.

What traits are included in \$Profit:

\$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is the list of what is included and its effect:

Revenue Traits

- Calving ease = more calves means more revenue.
- Weaning & yearling EPD = more weight equals more revenue.
- Fertility (days to conception) = more weight and more calves
- Carcass weight = worth more up to 477 kg.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts yield grade
- % Retail Product = more yield is more saleable meat

Cost Traits

- Cow mature size = bigger eats & costs more
- Cow intake = more intake eats & costs more
- Feedlot feed efficiency = more feed per kg of gain means more cost

Some traits are not so easily characterized for \$Profit. Milk, for example, is a good thing until you get too much. When over +25, milk EPD has a more negative effect on fertility than it has a positive effect on weaning weight. There are a few traits not yet included in \$Profit: longevity, structure, and disposition. These traits are important but difficult to express in dollars.

Feed Efficiency EPDs Explained:

Feed:Gain: Difference in the amount of feed a bull's progeny will consume to produce one pound of gain.

Example: A -0.50 F:G EPD means this animal's progeny will consume 1/2 pound less feed per pound of gain than would progeny of a zero F:G EPD sire.

Feed Intake: Difference in feed consumption of each of a bull's progeny in a 112 day feeding period.

Example: A steer whose sire has a -100 Intake EPD will eat one hundred pounds less feed in 112 days than one whose sire had a zero Intake EPD.

11%	11%	32%	30%	29%	58%	8%	9%	6%	13%	13%	4%

This might be the best black/red carrier bull that I've seen. When you lay eyes on him, I believe that you will agree that he is a tank! I can already imagine the moderate, easy fleshing daughters out of him that are loaded with calving ease, performance and fertility as well as being low input cattle. He knocks it out of the park on end product merit as well with top MB, YG, CW, FT and REA. Outcross genetics and one of the most balanced EPD lines you're going to find with 13 EPDs in the top 35% or better, this could be the highlight bull of the year.

Patricia Rose does it again! She proves once again that great genetics don't cost, they pay. If you want to get serious about your end product game, you had better load up this stud. With his off the chart MB EPD he can get you where you need to be in a hurry. Look at those performance EPDs that rank in the single digits, he will put out the pay weight for you. With all this it's easy to see how he scores such an impressive \$P.

If you are looking for a herd sire that allows you to keep the daughters and grid the steers, this stud needs to be on your "buy" list. Take a look at this phenomenal EPD set. With his high rankings for CED, BW, WW, YW and ADG he allows you to have an uneventful calving season but still be rewarded with pounds at pay weight time. If you've yet to market your steers you sure might want to start with his end product merit and top GMI.

You want to talk about pounds in the right package, this guy is it. Just imagine how fast he can pay for himself just off the extra pounds that he can produce with his growth EPDs that rank completely off the chart for both WW and YW. Even with all this performance you still get the fertility, check out that HPG. He crushes it on carcass merit, whether you need marbling, muscling, yield or pounds he has it. You can see with all this how he scores such impressive #P and \$R.

I would advise you to keep as many daughters out of this guy as possible. They should be loaded with fertility and be profit centers in your herd for years to come with his top of the chart HPG and top ST. With EPDs like that it's certainly easy to see why he ranks of the chart for HerdBuilder Index. His steers should be exceptional as well with his single digit ranking for MB that helps to give him a very impressive GridMaster Index.

Even with all the Red Angus royalty on both sides of his pedigree, this stud can stand on his own merits. If you've yet to market your steers on a grid, you sure might want to start if you get this guy home with his super high-ranking MB EPD and top of the chart GridMaster Index. He has you covered if you market by the pound as well with exceptionally high WW and YW EPDs. Even with all this pay weight you still get an impressive CED.

This guy could be the female builder of the entire sale. If you are looking to raise fertile replacements that should remain profit centers in your herd for years to come you need to load up this bull with his top HPG and off the chart ST that is one of the highest in the sale. Notice also that you get to inherit the goodness of his incredible dam that boasts a very impressive 105 MPPS in every one of his daughters that you retain.

How about the pounds that this guy can produce? He is a performance machine with his impressive WW and top of the chart YW. If you feed out your cattle pay close attention to his ADG EPD. His progeny will put out the pounds. Even with all this performance he still puts out loads of fertility. Check out that top of the chart HPG EPD. If you need end product merit, he has you covered with great MB and a top ranked GMI.

If you have a set of straight bred English cows that you are looking to inject some hybrid vigor into, you need to take a look at this stud. With his 75/25 English/Continental blood the resulting calves would be right in that sweet spot of that works so well across a range of environments and in the feedlot. You sure might want to keep every daughter with the combination of his top of the chart HPG and their hybrid vigor.

PROFIT. REPEAT.

Generate repeated profits with the industry's most-favored female.

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit RedAngus.org for details on the industry's most-favored female.

What a way to start off the female portion of our sale. This is a very special offering of a rare Pledge daughter (they're hard to find and if you do find one it's difficult to get the owner to let go of her.) This gal could produce the next breed leader, look at that incredible end product merit with her great combination of marbling and muscling. She'll produce the pounds as well with that top WW, YW and ADG.

You might want to get this gal loaded up in the trailer before we change our mind! Vindicator is turning out to be a female producer extraordinaire and this daughter will make her daddy proud. Check out the pounds that she will produce with her superb WW, YW and ADG. Even with all that performance she has loads of fertility with her top HPG. Throw in her top marbling and GMI and she could produce your next herd sire.

WOW! You have to love the balanced EPD line that this outstanding young lady offers. This might be the best EPD set in the entire sale. Whether you need pounds or calving ease she has it with her top-rated WW and YW combined with her single digit rankings for both CED and BW. She knocks it out of the park on herd building traits with her HPG and CEM. Throw in her exceptional combination of marbling and muscling and will be easy to find a sire to flush to her.

Check out those cow builder ERTs. Her daughters should excel at fertility and be profit centers in you herd for years to come with her single digit rankings for both HPG and ST. With statistics like that it's easy to see why she ranks so high for HerdBuilder Index. My advice would be to try and get as many daughters as possible out of her. Take a look at those end product numbers, and you will find that she gives you both marbling and muscling as well as pounds.

It's pretty easy to see why Domain was the most used bull in the Red Angus breed the last year, he produces top end females. This gal will produce the pounds with her top ranked WW, YW and ADG. You can expect her daughters to stay in the herd and be profitable with her top ST that helps to give her a single digit ranking for HerdBuilder Index. If you need carcass, she has it with her top MB EPD and GridMaster Index.

This girl has the ERTs that you would want to build a herd. Her daughters should be loaded with fertility and calving ease as well as require reduced inputs with her fantastic HPG, CEM and ME. You can certainly see why is has one of the highest \$Ranch numbers in the entire sale. She knocks it out of the park on end product merit and destroys the antagonisms between marbling and muscling with her off the chart MB and top ranked REA EPDs.

Who made up the sale order? If this were a bull it would be the lead off animal. We are rewarding your patience with the top \$Profit animal in the sale. With her \$Ranch you might want to build an entire herd around her. She is also one of the top F:G animals in the sale. You have to love the EPD line that she brings to the table. Go out and see how many females that you can find with an amazing 13 traits in the top 28% or better. If you can find one, see how difficult it is to buy her. Take advantage of this opportunity.

LIVESTOCK NUTRITION CENTER

BETTER FEED, BETTER RESULTS

Livestock Nutrition Center specializes in blending customized rations, supplements and premixes to meet the specific nutritional needs of your operation. We understand that management, performance objectives and feeding practices can be vastly different between operations, and that these differences dictate specific nutritional or formulation requirements. Our experienced sales staff and nutritionists will work with you to design a feeding program that is specific to your operation.
